
PROFESSIONAL SUMMARY

Data driven Analyst with 5 years of experience delivering scalable analytics solutions using Python, Snowflake data marts and Power BI, Looker Studio to analyze trends, support growth plans, and create presentations that guide executive decisions.

WORK EXPERIENCE

Data Analyst

Infinity Village Lab Inc

Remote, USA February 2025 – Present

- Developed sonification project integrating with **Snowflake data mart** to manage and process survey datasets, created **interactive Power BI dashboards** that visualize data, and enabled real-time tracking of KPI demographic trends.
- Built **SQL queries in Snowflake** to support timely and accurate analytical reporting from complex datasets.
- Performed **data wrangling and data modelling** to prepare datasets for demographic analysis and sentiment modeling; created Power BI dashboards that highlight key **perception trends**, such as customer satisfaction and sentiment analysis.
- Collaborated with **Agile teams** to gather requirements, delivering analytics solutions aligned with business objectives.

Data Analyst

Cal State LA

Los Angeles, USA September 2023 – December 2024

- Retrieved and cleaned** Duo authentication logs for **university-wide** users; transformed CSV data using Power Query and SQL and **developed Power BI dashboards** to visualize usage patterns by department and method.
- Automated compromised user data extraction** using **Power Automate, Python scripts** and built self-updating dashboards, saving 3+ hours weekly on manual reporting.
- Built **DAX measures** for tracking authentication anomalies and trends, improving report accuracy by 27%.
- Implemented RLS and automated report delivery in Power BI Service, ensuring compliance with **100% of university data governance policies**.

Technology Consultant

Hp Global Soft Private Limited

Bangalore, India September 2011 – April 2014

- Provided **on – site support for clients in Australia**, assisting teams with troubleshooting and performance monitoring.
- Leveraged **advanced SQL** to pinpoint care gaps in complex Telecomm datasets, driving improved outcomes.
- Ensured **data accuracy and consistency** across enterprise reporting tools, streamlining submissions and **reducing reporting errors by 22%**.
- Supported senior analysts in **creating visualizations and ad-hoc reports**, meeting tight deadlines for presentations.

Computer Engineer Intern

Hp Global Soft Private Limited

Bangalore, India January 2011 – July 2011

- Monitored 7,000+ servers via HP OVO, resolving alerts and **implementing application monitoring** and log analysis.
- Analyzed incident data using **Pivot Tables and Excel charts**, identifying key metrics to inform decision-making.

EDUCATION

California State University - Los Angeles

Master's in information systems

GPA: 3.94/4

Avinashilingam University for Women - India

Bachelor of Engineering in Computer Science

GPA: 3.25/4

CERTIFICATIONS

- CompTIA Data+**, October 2024 [Credential ID: PY1PC2GYQ1BQQFGZ]
- Microsoft Certified: **Azure** Fundamentals, February 2025 [Credential ID: D29559B7BFA288B7]

SKILLS

- ETL and Data Processing:** Power Query, Azure Data Factory, Databricks, Power Automate.
- BI & Reporting:** Power BI (Advanced, Service, DAX, RLS), Looker Studio, Tableau, Crystal Reports.
- Programming:** Python (Pandas, NumPy), SQL, PySpark.
- Data Management:** Snowflake (Data Marts, Query Optimization).
- Big Data & Cloud:** Hadoop, Hive, Azure (Synapse Analytics, Data Lake, Event Hubs).
- Tools:** Advanced Excel (Pivot Tables, VLOOKUP), PowerPoint.
