

MANISH KUMAR SABBANI

☎ +1-469-473-9356 — @ sabbanimanish2606@gmail.com — 🌐 GitHub — 📍 United States

PROFESSIONAL SUMMARY

Business Analyst with 4+ years of experience supporting business and IT initiatives by translating requirements into functional solutions. Strong background in requirements gathering, stakeholder coordination, data analysis, process improvement, and UAT. Experienced working in Agile and SDLC environments, partnering with engineering, data, and product teams to deliver business value.

PROFESSIONAL EXPERIENCE

Business Analyst - IT Operations

USA

Strategy Snap INC

Jul 2025 – Present

- Partnered with business stakeholders and technical teams to analyze data and reporting requirements, supporting scalable enterprise analytics solutions across Azure platforms.
- Improved data quality and reporting reliability by **30%** by defining validation rules, reconciliation checks, and exception-handling processes.
- Automated business data delivery and reporting workflows using **SQL and Azure-based tools**, reducing manual operational effort by **40%**.
- Identified process inefficiencies and supported workflow optimization initiatives, contributing to a **25%** reduction in end-to-end processing time.
- Delivered analytics-ready datasets and dashboards consumed by **5–10 business stakeholders**, enabling faster operational insights and data-driven decision-making.

Business Analyst - Data & Reporting

USA

University of North Texas

Aug 2025 – May 2025

- Analyzed dining operations data (sales, transactions, inventory) to support operational planning and management decision-making.
- Gathered and documented business and reporting requirements in collaboration with dining management and campus stakeholders.
- Defined and tracked key KPIs such as daily revenue, transaction volume, and peak service hours to monitor dining performance.
- Validated data accuracy across POS systems and reports, identifying discrepancies and supporting corrective actions.
- Developed operational dashboards and reports using **Excel and Power BI** to provide actionable insights to leadership.

Business Analyst

India

Spectra Assistive Technologies

Jan 2022 – Jun 2023

- Worked with business and technical stakeholders to understand data and reporting requirements, supporting analytics and operational use cases.
- Analyzed and transformed datasets using **SQL and Python** to prepare clean, validated data for business analysis and reporting.
- Performed data validation and reconciliation checks to ensure accuracy and consistency of analytics datasets.
- Supported development of dashboards and reports by preparing analytics-ready datasets for stakeholder consumption.
- Assisted in documenting business rules, data definitions, and requirements in collaboration with senior analysts and engineers.
- Participated in Agile ceremonies, supporting sprint planning, requirement clarification, and delivery coordination.
- Prepared status updates and summary insights for stakeholders, ensuring alignment on requirements, timelines, and deliverables.

TECHNICAL SKILLS

Business Analysis: Requirements Gathering, BRD, FRD, Use Cases, User Stories, Acceptance Criteria, Gap Analysis, Process Mapping
Data Analytics: SQL, Advanced Excel (Pivot Tables, VLOOKUP/XLOOKUP), Data Validation, Reconciliation, KPI & Metrics Definition
Reporting & Visualization: Power BI, Tableau, Excel Dashboards
Tools & Platforms: JIRA, Confluence, ServiceNow, Azure DevOps
Methodologies: Agile (Scrum), Waterfall, SDLC, Hybrid
UAT & Delivery: UAT Planning, Test Case Review, Defect Tracking, Business Sign-off
IT Operations Knowledge: Incident, Change, and Release Management, SLA & Operational Metrics
Documentation & Communication: Stakeholder Management, Process Documentation, Executive Reporting

EDUCATION

Master's Degree in Information Technology <i>Specialization: Data Analytics and Warehousing</i>	USA
Bachelor's Degree in Electronics and Communication Engineering <i>Specialization: Electronics, Programming</i>	India

ACADEMIC PROJECTS

F1 Racing Data Analysis – Ergast API & Azure Stack

Academic Project

- Built an Azure Data Factory ETL pipeline to ingest Formula-1 racing data from the Ergast API using incremental loading for efficient data refreshes.
- Processed and transformed semi-structured JSON data using Databricks (**PySpark**) into optimized **Delta Lake** tables for analytics consumption.
- Stored curated datasets in **Azure Data Lake Storage Gen2** and prepared analytics-ready data models for reporting and visualization.
- Designed and developed interactive **Power BI dashboards** to analyze race results, driver performance, constructor standings, and seasonal trends.
- Defined key metrics and KPIs such as lap times, podium finishes, points distribution, and win ratios to support data-driven insights.
- Implemented filters, slicers, drill-downs, and time-based comparisons in Power BI to enable self-service analytics.
- Validated data accuracy and consistency through schema validation, versioning, and data quality checks prior to dashboard publication.
- **Tech Stack:** Azure Data Factory, Databricks, PySpark, Delta Lake, ADLS Gen2, Power BI, Python

Next Word Prediction using LSTM & GRU (Deep Learning)

Academic Project

- Implemented **LSTM and GRU architectures** to compare model performance and training efficiency for next-word prediction.
- Performed comprehensive **text preprocessing** including tokenization, sequence padding, and vocabulary encoding.
- Trained deep learning models using **categorical cross-entropy loss** and optimized with the **Adam optimizer**.
- Applied **early stopping** to prevent overfitting and improve model generalization.
- Built an **interactive inference pipeline** to generate real-time next-word predictions from trained models.

CERTIFICATIONS

AWS Certified Associate Data Engineer
Azure Solution Architect
Azure Administrator Associate
