

Summary:

- Having **10 plus years** of experience in Database Design, Development, Testing and Production Environments as a **BI Developer**.
- Strong experience with **Data Warehouse** modeling of **ER, 3NF**, and Dimensional **Star Schemas** models for BI reporting.
- Development skills with **Azure Data Lake, Azure Data Factory** and **Azure Databricks**.
- Experience in developing solutions with **Snowflake Cloud platform** and **Mulesoft Anypoint Studio**.
- Strong experience in multiple **Data Warehouse** concepts (**Kimbal, Inmon, Hybrid, Data Vault**) .
- Experienced in the full life cycle (**SDLC**) of **Data Warehouse** - design and implementation, and **ETL** development and support.
- Experience in building **dashboards** using **Power BI**.
- Strong experience of designing **Star Schema** and created **Fact and Dimension** tables for the **Data Warehouse** using **Erwin ,MS Visio and ER/Studio**.
- Proficient in **ETL** processes for **Data Conversion** using **Integration Services (SSIS)**.
- Expert in **designing and scheduling complex SSIS Packages** for transferring data manually from multiple data sources like MS SQL Server 2000, Oracle Database, Excel and Flat file to Microsoft SQL Server by using SSIS and **DTS** utility of SQL server **2005/2008 R2/2012**.
- Experienced in implementing **Slowly Changing Dimension wizard** and Check Sum Transformation to load data into slowly changing dimensions in Data Warehouse.
- Experience in **providing Logging, Error handling** by using **Event Handler** and **Custom Logging** for SSIS Packages.
- Expert in **scheduling jobs, SSIS Packages** and **sending Alerts** using **SQL Mail**.
- Experience in creating SSIS **package** and **project parameters** and deploying in **SSIS Catalog Server**.
- Experience in creating **SSAS Tabular Models** off the data warehouse and built Pivot Table templates for the end users
- Experience in **Creating SSAS OLAP CUBES** and migrating DTS Packages from **2000 to 2005**.
- Experience in Microsoft Visual **C#** in script component of **SSIS**.
- Good experience in development of **T-SQL scripts, SSIS, SSRS, Stored, Procedures, Triggers, Functions** and **Views** for business logic implementation.
- Good knowledge of development using databases like **Oracle10g** on windows 2000/2003 using **SQL, PL/SQL, Stored Procedures, Database Triggers, SQL * Plus, Toad**.
- Experience in creating reports in various formats like Table format and Matrix format using **SQL Server Reporting services (SSRS 2005/2008/2012)**.
- Experience in deploying created reports in various sources like Web Browser, XML and PDF.
- Experience in creating ad-hoc reports by using **Report Builder** in SQL Server Reporting Services (**SSRS**).
- Experience in designing, developing and consumption of **WCF services** using **C#**.
- Experience in creating **Windows** and **form based applications** using **C#** .
- Experience in **Windows Powershell scripting**.
- Experience with **data analysis, data profiling, and data mapping**.
- Experience in working with **Source Gear Vault** for the development and administration of projects.
- Experience as a developer and administrator in **SharePoint services (Moss 2007)**
- Experience of working on integration of **InfoPath 2007** with SharePoint portal.
- Experience of developing of custom **web parts, Features, Event Handlers**.
- Excellent knowledge & experience of **SharePoint/MOSS Server, Search Server, Windows SharePoint Services, IIS, SQL Server, InfoPath 2007 and SharePoint Designer 2007**.
- Knowledge of using the **Stored Procedures, Functions and Triggers** at Data Base level and imported them in **Informatica** for **ETL**.
- Experience working within **Agile development** techniques
- Self-Motivated with good verbal and written communication skills.

Technical Skills:

Database:	Oracle 10g/11g, MS SQL Server 2012,2008, 2005, 2000, 7.0, Microsoft Access
Database Tools:	PL SQL developer, T-SQL, Enterprise manager, Query Analyzer, SQL Agent, SQLTrace,Erwin, Performance Monitor
Data Modeling Tools:	Microsoft Visio, DB Designer, Front Page, Erwin
Web Server:	IIS 5 and 6
Reporting Tools:	POWER BI,SQL Server Reporting Services (2012,2008 and 2005), Crystal Reports
Analytical Software :	SSAS Tabular
Languages:	Powershell,C#, WCF, C++, Visual Basic, Python,Dataweave
Other Tools:	Microsoft Visual Studio 2005/2010/2013, VMware,Microsoft Office, Mulesoft Anypoint Studio
Operating Systems:	Windows 2000 & 2003 Advanced Server, Windows NT/95/98/2000/XP/Vista/7, UNIX, Linux, MS DOS, Mac OS X.

Education:

MS-Computer Software Engineering
Bachelors in Electrical Engineering

Certifications:-

- **MTA:** Introduction to Programming Using Python - Certified 2020.
Credential URL :
https://www.youracclaim.com/badges/3da38ef7-8294-4ed7-8906-65579f3fb6dc/linked_in_profile
- **Python** Basics by University of Michigan on Coursera. Certificate earned at Sunday, September 29, 2019 6:41 AM GMT". Credential URL:
<https://www.coursera.org/account/accomplishments/certificate/SRTFYYQKRP5Z>
- Informatica **S- Power Center 8 Mapping designer** Certification.

Professional Experience:

Fintbyte LLC – Columbus,OH
Azure Data Engineer

Feb 2024 – March 2025

- Developed robust **ETL/ELT** in **ADF (Azure Data Factory)** workflows to ingest, transform, and cleanse structured and unstructured data from various sources.
- **Extract Transform** and **Load** data from source systems to **Azure Data Storage (Azure Data Lake Gen 2)** using a combination of Azure Data Factory and **T-SQL**.
- Created **pipelines** in ADF using linkedservices/Datasets to Extract, Transform and load data from different sources like **Azure SQL, Azure Data Lake, Blob Storage , Azure Synapse**.
- Developed and maintained basic **SQL queries** to support data validation, reporting, and transformations.
- Helped monitor and troubleshoot pipeline issues and performance bottlenecks using **Azure Monitor** and **Log Analytics**.

Lakeland Regional Hospital – Lakeland,FL
Data Engineer

Oct 2023 – Jan 2024

- Serves as an data warehouse consultant within the department. This includes gathering and interpreting business requirements. Is able to formulate and implement data warehouse solutions based on requirements and following IT methodologies, processes and standards.
- Deployment of **SSIS ETL Jobs**, **Stored Procedures** and **Views** to production servers.
- Participates in the ongoing maintenance of the **data warehouse** and ETL programs.
- Developed and maintained end-to-end operations of **ETL** data pipelines and worked with large data sets in **Azure Data Factory**.
- Extract Transform and Load Data from Source Systems to **Azure Data Storage** services using a combination of **Azure Data Factory (ADF)** and **T-SQL**
- Remains vigilant of data architecture standards and best practices to ensure solutions are maintainable and scalable.
- Oversee the creation and maintenance of specifications, requirements, designs, data flows, test scripts and support plans documentation of data warehouse artifacts.
- Create and modify the structure of database objects in database using **T-SQL DDL**.

Nationwide Childrens Hospital – Columbus,OH
ETL DWH Developer

April 2023 - July 2023

- Provide monitoring and application support for the ETL application environments.
- Create and maintain support documentation for the team
- Analyze and resolve ETL job failures.
- Be the first responders, regularly communicate the status of the daily ETL jobs or any issues through appropriate communication channels.
- Resolve all incidents and code migrations within SLA targets.
- Diagnose and escalate issues where applicable.
- During crisis conditions, willing to act in the role of problem facilitator to drive cross functional efforts of various teams toward issue resolution.
- Ensure proper handoffs of issues or support as necessary.

Ohio Department Of Mental Health – Columbus,OH
Senior Data Warehouse Developer /Data Engineer

March 2022 - April 2023

- Responsible for creating **DWH** project solutions using SSIS
- Created various reports utilizing **SSRS** and **Power BI** and used various source to pull data into **Power BI** such as **SQL Server**, **Oracle**.
- Developed and maintained end-to-end operations of **ETL** data pipelines and worked with large data sets in **Azure Data Factory**.
- Extract Transform and Load Data from Source Systems to Azure Data Storage services using a combination of Azure Data Factory (**ADF**) and T-SQL. Data ingestion to one or more Azure Services like **Azure Storage** , **Azure Data Lake** and **Azure DWH (Azure Synapse)**
- Performed extensive debugging, data validation, error handling mechanism, transformation types and data clean up analysis within large datasets.
- Collaborated with **DevOps** Engineers to developed automated **CI/CD** and Test driven development pipeline using **Azure** as per client standards.
- Created the **Data Scraping** process in order to extrct the data from the web page using **MS Powershell** scripting.
- Extensively used SSIS transformations such as **Lookup**, **Derived column**, **Data conversion**, **Aggregate**, **Conditional split**, **SQL task**, **Script task** and **Send Mail task** etc.
- Responsible for Data profiling, validation and cleansing of the data.
- Responsible for daily support for the **production** SQL agent jobs.

Kern Health – Berkshores,CA
Senior Data Warehouse Developer

May 2021- March 2022

- Responsible for creating ETL to load the data from **EDW (Data Vault 2.0)** To **Datamart/Infomart**
- Responsible for the creation of **EDW** (enterprise data warehouse) and **Data Marts**.
- Responsible for Data profiling, validation and cleansing of the data.
- Responsible for creating Data Vault 2.0 mapping and modeling.
- Created DWH dimensional modeling using Star Schema and Snowflake schema methodologies.
- Worked with BI developers to deliver reporting objects (Fact, Dimensions tables as well as business views) to deliver insightful reporting.
- Developed **Slowly Changing Dimension** Mappings for **Type 1 SCD** and **Type 2 SCD**.

Ohio Department of Developmental Disabilities –Columbus,OH
Senior Data Warehouse Developer

Oct 2014- May 2021

- Responsible for the creation of **EDW** (enterprise data warehouse) and **Data Marts**.
- Responsible for **leading** development of several projects and worked in collaboration with team and business users.
- Implemented activities like Lookup, Get Metadata and data flow transformations to **incrementally** load the data in **Azure Blob Storage** from **Salesforce** and **Azure SQL Server**.
- Created the end to end pipeline in **Azure Data Factory** to incrementally load the data from **Salesforce** to **Azure SQL Server** and finally into **Snowflake** cloud platform.
- Created the **dynamic** stored procedure in **Snowflake** cloud platform which takes input parameters and update the entities .
- Created the **python** script in **Azure DataBricks** to call stored procedure in **Snowflake** cloud platform.
- Created the dynamic workflow in **Mulesoft Anypoint Studio** in order to incrementally load the data into **Azure Data Lake (Gen2)** from **Azure SQL database** and finally into **Snowflake** cloud platform.
- Created the **snowpipes** in Snowflake cloud platform in order to load the data in entities from the external stage tables.
- Developed the **SSIS Deployment Utility** in **powershell** for deployment of packages to different SSIS catalog servers.
- Implemented regular expressions in **python** to find different text patterns from large collection of files.
- Implemented **dimensional model (logical and physical)** in the existing architecture .
- Implemented **Data Vault Modeling** and created the SSIS packages to load the **delta records** in Data Warehouse tables from **MS CRM** applications.
- Developed SSIS packages for **data migration** to **MS CRM** using **SSIS/COZYROC** and **Web Service Integration**.
- Responsible for creating the **Windows Powershell** scripts to query the data from **Active Directory** and **Entitlements Managements System (EMS)** and load into staging tables.
- Built SSIS packages to perform extraction,transformation and load (ETL) data into the DWH.
- Worked on creating the **Change Data Capture (CDC)** on Transactional system and created SSIS packages to load the Data in Audit Tables.
- Developed an end to end data warehouse solutions with custom ETL Framework and built the design using **Kimball's** Method with several **facts** and **dimensions**.
- Developed **Slowly Changing Dimension** Mappings for **Type 1 SCD** and **Type 2 SCD**.
- Created SSIS packages to **clean** and load data to data warehouse and to transfer data between **OLTP** and **OLAP** databases.
- Extensively used SSIS transformations such as **Lookup, Derived column, Data conversion, Aggregate, Conditional split, SQL task, Script task and Send Mail task** etc.

- Created reports using **SQL Server Reporting Services (SSRS)** from OLTP and OLAP data sources and deployed on report Server.
- Created **Sub-reports, Drill-down reports, Drill-through reports, Summary reports and Parameterized reports** in SSRS.
- Tested **Cognos** reports to check whether they are generated as per the company standards.
- Responsible for **scheduling** the **subscription** reports with the subscription report wizard.
- Developed **Windows based application in C#** ,which checks the data in the excel file and indicate the error data.Finally used excel as a source to load into the OLTP database.
- Prepared the complete **data mapping** for all the migrated jobs using SSIS.
- Created databases and schema objects including **tables, indexes** and applied **constraints**, connected various applications to the database and written **functions, stored procedures** and **triggers**.
- Designed and developed **SQL Server Analysis Services (SSAS)** databases and **OLAP cubes** used in ad-hoc analytic research and automated reporting.
- Involved in designing cubes in **SSAS** environment using **Snowflake** and **Star Schemas**.

Environment: SQL BI Suite (SSAS, SSIS, SSRS), Azure SQL Server, Azure Storage Explorer, Azure Databricks,Python 3,Snowflake Cloud,Mulesoft Anypoint Studio 7.7,Windows Powershell, Visual Studio 2008/2012/2013, .NET Framework 3.5/4.0, SQL Server 2008 R2/2012/2013,Oracle 11g/10g, ASP.NET, C#,MS Team Foundation Server 2010,COZYROC

University Of Toledo Physicians –Toledo,OH
BI Developer/ Report Writer

June 2013- Sept 2014

- Responsible for **leading** development of project and worked in collaboration with team and business users
- Experience in building and deploying SSRS **Report Models** with the help of Visual Studio 2008.
- Built **SSIS package** to extract the data from Oracle database and SFTP to remote server.
- Experience in creating SSIS packages using different type's task, with **Error Handling, Log particular event by doing logging and worked on package configuration.**
- Created SSIS Packages to convert oracle **CLOB datatypes** to text and load them into database.
- Applied various **data transformations** like Merge, Aggregate, Sort, Multicasting,Lookup, Conditional Split and Derived column.
- Experience in deploying the SSIS packages to stage and production environments and creating **SQL server agent jobs** for scheduling .
- Developed ASP.NET applications and wrote **business logic code** in **C#** code behind files to read data from database stored procedures.
- Used **C#** and **ADO.NET** to define and implement secure middle-tier components using both connected and disconnected environment strategies.
- Developed **Windows based application** in C# ,which displays the data in data grid and enable the users to load the data into the SQL database.
- Created **printed report** functionality in **ASP.NET** application with the help of **report viewer control**.
- Developed and scheduled reports in **Cognos 10.1** Report Studio.

Environment: SQL BI Suite (SSAS, SSIS, SSRS),Cognos10.1, Visual Studio Professional 2010,Visual Studio 2008, .NET Framework 3.5/4.0, SQL Server 2008 Enterprise Edition,Oracle 11g/10g,Toad v11, ASP.NET, C#,MS Team Foundation Server 2010

OHIO Department Of Insurance –Columbus,OH
SQL BI/.Net Developer

Dec 2011- April 2013

Roles and Responsibilities:

- Responsible for **leading** development of project and worked in collaboration with team and business users

- Responsible for creating **.NET** application which consumes **WCF web services** to fetch and load the data into Staging tables.
- Built **SSIS package** to perform **extraction,transformation** and **load (ETL)**, the data into OLTP data warehouse.
- Responsible for **testing** and modifying the existing SSIS packages.
- Modified the existing SSIS packages to meet the changes specified by the users.
- **Scheduled Jobs** for executing the stored SSIS packages which were developed to update the database on a daily basis.
- Built the SSIS package to **e-mail** the generated SSRS reports in PDF format to business users.
- Experience in deploying the SSIS packages to stage and production environments and creating **SQL server agent jobs** for scheduling .
- Generated reports in various formats like **Table** and **Matrix** using **Reporting services (SSRS 2008)**.
- Install and configure **report server** and generated the **report models** for user interactions.
- Involved in the creation of **subscription (file share)** of **SSRS reports** on report server.
- Built the windows form application in C# (**Subscription Editor**),to edit the report subscription parameters.
- Experience in bulding and deploying SSRS **Report Models** with the help of Visual Studio 2008.
- Experience in deploying the SSRS reports to stage and production environments with the help of **TFS 2010**.
- Responsible for giving the business and end users the training for **Report Builder 3.0**.
- Used **Microsoft Visio** and **ERWIN** for Logical and Physical database Modeling.
- Involved in the optimization of PL-SQL queries.
- Created **technical documentation** on existing ETL application and SSIS packages.

Environment: SQL BI Suite (SSAS, SSIS, SSRS), Visual Studio Professional 2010,Visual Studio 2008, .NET Framework 3.5/4.0, SQL Server 2008 Enterprise Edition,Oracle 11g/10g, ASP.NET, C#,MS Team Foundation Server 2010

United Health Group –Westerville,OH
SQL Developer (BI Developer)

May 2011-Nov 2011

Roles and Responsibilities:

- Designed SSIS Packages to extract data from various OLTP Sources like **Oracle, Text Files, XML (Extensible Markup Language) Files, Excel and MS Access 2007** to Data Warehouse System (SQL Server).
- Experience in creating SSIS packages using different type's task, with **Error Handling, Log particular event by doing logging and worked on package configuration** to run package on different server.
- Modified the existing SSIS packages to meet the changes specified by the users.
- **Scheduled Jobs** for executing the stored SSIS packages which were developed to update the database on a daily basis.
- Applied various **data transformations** like Merge, Aggregate, Sort, Multicasting, Conditional Split and Derived column.
- Responsible for creating **stored procedures** to pair down the databases.
- Generated reports in various formats like Table format and Matrix format using **SQL Server Reporting services (SSRS 2005/2008)**.
- Responsible for creating the dashboard reports for **TFS 2010** by querying and analyzing the **OLAP cube** for **TFS warehouse**.
- Responsible for the development for various **dashboard reports** for the database environment.
- Responsible for creating the dashboard reports for displaying the **performance metrics** of all servers.
- Responsible for stylish design layout like Pie charts, Graphs and Linked Reports (**SSRS**).
- Configure the **report server** and generated the **Report models** for user interactions.
- Involved in designing **Matrix Reports** and also **Cascaded Parameterized Reports (SSRS)**
- Involved in **migration of reports** from **SSRS 2005** to **2008**.
- Experience in deploying the SSRS reports to Development Server with the help of **TFS 2010**.
- Used **SQL Profiler** for monitoring and troubleshooting performance issues in **T-SQL code and stored procedures**.
- **Optimized queries** by looking at Execution Plan for better tuning of the database.

- Created **Clustered** and **Non-clustered Indexes** for Query Optimization and also involved in Database Tuning.
- Provided documentation for all kinds of reports, DTS and SSIS packages.
- Involved in designing and Development of **SOA** services using **Web Services/ WCF**.
- Built **WCF web services** and consumed them for mass mailing application for custom interfacing with partners.
- Wrote **business logic code** in **C#** code behind files to read data from database stored procedures.
- Used **C#** and **ADO.NET** to define and implement secure middle-tier components using both connected and disconnected environment strategies.

Environment: SQL BI Suite (SSAS, SSIS, SSRS), Visual Studio Team System 2008, Visual Studio 2005, .NET Framework 3.5, SQL Server 2008 Enterprise Edition, Oracle 10g, ASP.NET, C#, Source Gear Vault 5.0.1, MS Team Foundation Server 2010

PerformCare (AmeriHealth Mercy Company) -Robbinsville,NJ
SQL Developer (SSRS/SSIS)

Oct 2009-April 2011

Roles and Responsibilities:

- Responsible for report generation using **SSRS** based on business requirements. Create **drill down** and parameterized reports using **SQL server reporting services (SSRS)**.
- Generated reports in various formats like Table format and Matrix format using **Reporting services (SSRS)**.
- Generated Sub-Reports, **Drill down** reports, Drill through reports and **Parameterized reports** using MS SSRS for the end user requirements.
- Responsible for stylish design layout like Pie charts, Graphs and Linked Reports (**SSRS**)
- Involved in designing **Matrix Reports** and also **Cascaded Parameterized Reports (SSRS)**
- Involved in design and deployment of Report Models for generating **Ad-Hoc reports** as per the client requirements.
- Designed, Developed and **Deployed** reports in MS SQL Server environment using SSRS-2005.
- Created **Report Subscription** using **SSRS 2005/2008**.
- Configure the **report server** and generated **the report models for user interactions**.
- Experience in deploying created reports in various sources like **Web browser, XML and PDF**.
- Created reports to retrieve data using Stored Procedures that accept parameters.
- Experience in building reports through **Report Builder**.
- Developed reports in MS SQL Server environment using **MS SSRS 2008** in Business Intelligence Development Studio (BIDS).
- Created complex reports with the help of **Telerik reporting Q2 controls**.
- Responsible for Monitoring and Tuning Reports build in SSRS and **Telerik**.
- Designed **SSIS Packages** to extract data from various OLTP Sources like **Text Files, XML (Extensible Markup Language) Files, Excel and MS Access 2007** to Data Warehouse System (SQL Server).
- Experience in creating **SSIS** packages using different type's task, with **Error Handling, Log particular event by doing logging and worked on package configuration** to run package on different server.
- Responsible for creating **stored procedures** and **user-defined functions**, and ability to create well-architected databases from scratch.
- Created **joins and sub-queries** for complex queries involving multiple tables.
- Used **SQL Profiler** for monitoring and troubleshooting performance issues in T-SQL code and stored procedures.
- Design the **UI RIA** for Silverlight applications using **Microsoft Expression Blend**.
- Applied the **jQuery DatePicker** object to create calendar pop-ups. Adjusted calendar display and date range by setting the **buttonImage, minDate, maxDate, numberOfMonths, and showOn** properties.
- Developed the data access layer class using **C#** which is reusable for data transactions of entire project. Extensively used **ADO.NET** objects like **Dataset, Data Adapter, Data Reader, Command, Data Table** and **Data Relation** objects
- Responsible for maintaining the different releases of the versions using the **Version control tool "MS TFS"** and **"Source Gear Vault"**.
- Responsible for **Branching** and **merging** different versions of code.

- Responsible for maintaining the database for different releases.
- Responsible for creating and maintaining UAT and Staging environment in the server.
- Prepare, package and test deployment packages destined for the production environment in accordance with company practices
- **Build and Deploy** web application on Staging and production servers.
- Responsible for creating **build flow process** from Dev -> QA-> UAT-> Production environments.
- **Created documentation** for producing the efficient method of building and deploying application for the development ,sandbox and production environment.
- Responsible for preparing technical documentation for defects and orders change.

Environment: SQL BI Suite (SSAS, SSIS, SSRS), Visual Studio Team System 2008, Visual Studio 2005, .NET Framework 3.5, SQL Server 2008 Enterprise Edition, MS Server 2003, ASP.NET, C#, Source Gear Vault 5.0.1, MS Team Foundation Server, Telerik reporting Q2 2009

Apex Technology Systems, Inc – Edison, NJ
SSIS/SSRS/ASP.NET Developer

Oct 2008 – July 2009

Roles and Responsibilities:

- **SSIS** development and troubleshooting/bug fixing on staging **SQL Server 2005** platform
- Developed and implemented a standard, configurable, custom logging function within SSIS to allow detailed logging of pipeline row counts, container execution durations and container errors.
- Modified the existing SSIS packages to meet the changes specified by the users.
- Experience in building reports through **Report Builder** and **Report Designer**.
- Created SSRS Reports using Report Parameters, Debugging Parameter Issues Matrix Reports and Charts, **Drop-Down Parameters**, Multi-Valued Parameters.
- Experience in creating reports on **SQL Server Reporting Services 2005**.
- Involved in Migration of SQL Server 2000 Reporting Services to SSRS 2005.
- Experience on creating **Drilldown reports** from **Analysis Services cubes**.
- Involved in design and deployment of Report Models for generating Ad-Hoc reports as per the client requirements.
- Involved in Planning, Defining and Designing data based on the business requirement and provided documentation.
- Involved in gathering data, reviewing and documenting it for further reference.
- Involved in designing and Implementinon of **N-Tier Application** Architecture.
- Database designs, and a standardised manner of coding stored procedures to include headers, comments, version information as well as good object naming and **T-SQL** formatting practices.
- Used dataset, data reader, data view to read data using **ADO.Net objects**.
- Web Form design and coding using **Master Pages**, Server controls, Cascading Style sheet, **JavaScript**, **HTML**
- Wrote **business logic code** in **C#** code behind files to read data from database stored procedures.
- Used **C#** and **ADO.NET** to define and implement secure middle-tier components using both connected and disconnected environment strategies.
- Designed and developed the database and wrote **stored procedures** for **SQL Server 2005**.
- Update **ASP.NET** Pages, UserControls, **C# Classes**, SQL Databases, **CSS**, and **JavaScript**.
- Was responsible for managing project documentation and for Visual Source Safe administration.

Environment: Microsoft Visual Studio 2008, .NET Framework 3.5, SSIS, SSRS, DTS, SQL Server 2005, ASP.NET, C#, ,ADO.NET, CSS, HTML, SQL Server 2005, Visual Source Safe 6.0.

Training:

- **Apex Systems, South Plainsfield ,NJ**
Have taken training in ASP.NET where I have:
- Gained valuable concepts of C# & OOPS programming.
- Learned to develop windows application using Visual Studio 2008 & 2005.
- Learned to develop complex WebApplications using Visual Studio 2008 & 2005.

- Learned the concepts of ADO.NET
- **Scalable Systems, North Brunswick ,NJ**
Have taken training in Informatica where I have:
 - ✓ Gained valuable knowledge about Data Warehousing Concepts.
 - ✓ Learned to create mappings in Informatica version 7.1.1
 - ✓ Learned to use Data Modeling tool ERWIN.
 - ✓ Learned basic and advance features of PL/SQL.

Technical Project in Bachelors:

Protection of transformer in Thermal power station using digital Buchholz relay. Demo Simulation being created in C++.

Software Projects:

- Transient response of series RLC circuit and analysis
- To find receiving end voltage of EHV line
- Design of Transformer
- Lightening Arrester simulation using Mat lab and C++

Technical Presentations:-

- National level paper presentation on **Network Security using Cryptography** at Bansal institute of Science and Technology, Bhopal INDIA.
