SUMMARY

Supply Chain Analyst with around 4+ years of experience in supply chain management and procurement, skilled in developing and implementing category strategies that drive cost initiatives and improve operational efficiency. Proficient in lean manufacturing processes and ERP configurations, particularly in JDE and Windchill, with strong analytical capabilities using Excel and other data analysis tools. Experienced in managing RFQs, cost analyses, and PPAP support, with a focus on supplier performance and continuous improvement initiatives. Adept at leading cross-functional teams in project and change management, contributing to enhanced supplier collaboration and reduced costs. Committed to delivering actionable insights and strategic solutions to optimize supply chain operations and drive business success.

SKILLS

Project Management: Agile Methodologies, Project Planning, Risk Management, Cross-Functional Team Collaboration

Analytical Skills: Data Analysis, Statistical Analysis, Predictive Modeling, Demand Forecasting, Performance Metrics, Root Cause Analysis, DFMEA, PFMEA, Fishbone, FTA

Supply Chain Management: Inventory Management, Supplier Relationship Management, Logistics Coordination, Procurement Strategies, Order Fulfillment, Strategic Sourcing, Production Planning

Technical Skills: ERP Systems (SAP, Oracle), Advanced Excel, SQL, Data Visualization Tools (Tableau, Power BI), Supply Chain Software (JDA, Kinaxis), Microsoft Project

Process Improvement: Lean Six Sigma, Process Mapping, Value Stream Mapping, Continuous Improvement Initiatives, JIT Project, 5S, 5-Why, A3's, Visual Management

Communication Skills: Stakeholder Engagement, Reporting and Presentations, Negotiation, Training and Development

Regulatory Knowledge: Compliance Standards, Quality Assurance, Health and Safety Regulations

Managerial Skills: Financial Management, Quality Control Management, Operations Management, Cross-Functional Team Leadership

Programming Language: Python

Operating Systems: Windows, Linux

EXPERIENCE

UPS, USA | Supply Chain Analyst

Jun 2024 - Current

- Applied Lean Six Sigma principles to streamline supply chain processes, achieving a 20% increase in efficiency and a 15% improvement in quality.
- Led the development and implementation of category strategies for cost initiatives, contributing to a 20% reduction in overall procurement costs through effective supplier negotiations and process optimizations.
- Maximized data management and decision-making using ERP systems (SAP, Oracle), advanced Excel, SQL, and Tableau, delivering actionable insights that enhanced stakeholder decisions by 30%.
- Managed Request for Quotations (RFQs), including Requests for Information (RFIs) and Requests for Proposals (RFPs), conducting thorough cost analyses and ROI assessments to support strategic sourcing decisions.
- Collaborated with cross-functional teams to support new product introductions and engineering changes, ensuring alignment with lean manufacturing principles and minimizing production delays.
- Analyzed supplier performance metrics, implementing continuous improvement initiatives that resulted in a 15% improvement in on-time delivery and a reduction in Cost of Poor Quality (COPQ).
- Utilized Excel and other data analysis tools to conduct in-depth analyses, driving informed decision-making in project and change management initiatives.

Hexaware Technologies, India | Supply Chain Analyst

Sep 2019 - Nov 2022

- Led continuous improvement initiatives through the application of analytical skills and Excel-based data analysis, driving data-informed decisions that improved operational performance.
- Conducted 5-Why analysis on supply chain issues, resulting in a 40% decrease in recurring incidents and a 50% improvement in root cause resolution time.
- Applied JIT principles to significantly lower inventory holding costs and enhance supply chain responsiveness.
- Managed product wheels, inventory levels, Kanban systems, parts markets, and the Plan for Every Part (PFEP).
- Executed PPAP (Production Part Approval Process) support to ensure compliance with quality standards, reducing COPQ (Cost of Poor Quality) by 15% through effective supplier management.
- Coordinated change management projects that resulted in the successful implementation of new ERP configurations in JDE, improving process efficiency and data accuracy across the organization.
- Developed comprehensive reports and dashboards to monitor supply chain KPIs, providing actionable insights that supported strategic planning and execution.

EDUCATION

Master's in Business Analytics | Depaul University of Chicago, Illinois
