

Manisha Lakshmi Tella

Data Analyst / Business Analyst

California, USA • Phone: (334) 220-9663 • Email: manishalakshmit@gmail.com • [LinkedIn](#)

Summary

Results-driven Data Analyst and Business Analyst with 4.5+ years of experience in finance, retail, and healthcare sectors, leveraging emerging 2025 trends like AI/ML integration, real-time analytics, and data governance. Engineered ETL pipelines, advanced visualizations, and predictive models using SQL, Python, SAS, Power BI, and Tableau, achieving up to 30% efficiency gains and 25% improvements in decision-making accuracy. Expert in SAP for ERP processes, crafting BRDs, user stories, and process flows in Agile/Scrum environments to deliver actionable insights, optimize operations, and ensure compliance with standards like SOX, HIPAA, and GDPR. Committed to data storytelling, prompt engineering for AI tools, and cross-functional collaboration to drive business value in dynamic, data-centric industries.

Technical Skills

Programming Languages: Python (Pandas, NumPy, Seaborn, Matplotlib, Plotly, Scikit-learn, XGBoost, Prophet), R (tidyverse, ggplot2), SQL (T-SQL, PL/SQL, Window Functions, CTEs), SAS (Statistical Analysis), Excel (Power Query, VBA, Pivot Tables, INDEX-MATCH)

Data Visualization & Reporting: Power BI (DAX, KPI Dashboards), Tableau (Interactive Filters, Drill-Downs), Google Data Studio, Looker, QlikView, Statistical Visualization (Charts, Graphs, Maps)

ETL & Data Integration: Azure Data Factory, AWS Glue/Lambda, GCP Dataflow, Informatica, Talend, SSIS, Apache Airflow, REST APIs, JSON/XML Parsing, Python ETL Scripts, Data Cleaning (Outlier Detection, Anomaly Detection)

Databases & Warehouses: SQL Server, PostgreSQL, MySQL, Oracle, MongoDB, Snowflake, Amazon Redshift, BigQuery, Azure Synapse, Databricks, SAP HANA (ERP Integration)

Cloud Platforms: Azure (ADF, Synapse, Blob Storage, Functions), AWS (S3, Redshift, Athena, EC2, IAM), GCP (BigQuery, GCS, DataPrep, Pub/Sub)

AI/ML & Advanced Analytics: Machine Learning (Regression: Linear/Logistic; Clustering: K-Means; Forecasting: ARIMA/Prophet; A/B Testing, Hypothesis Testing), Scikit-learn, TensorFlow (Basics), AutoML, PyCaret, Generative AI (Prompt Engineering for Insights), Natural Language Processing (NLP Basics), Econometrics (Trend Forecasting)

Business Analysis & Agile Tools: JIRA (Sprint Planning, Backlog Grooming), Confluence (BRD/FRD, SOPs, Data Dictionaries), MS Visio, Use Cases, User Stories, Stakeholder Interviews, UAT Scripts, Root Cause Analysis

Data Governance & Compliance: Great Expectations (Data Validation), dbt (Data Modeling), Data Lineage/Lineage Tracking, QA Testing, Reconciliation, Rule-Based Validations, SOX/HIPAA/IFRS 17/NAIC Compliance, Data Ethics & Security (PII Masking, RBAC)

Big Data & Emerging Tools: PySpark (Spark for Distributed Processing), Hadoop Basics, Monte Carlo Simulation, Data Management (Profiling, Catalogs)

Domains: Finance (Risk Assessment, Claims Processing, Investments), Insurance (LTV, Loss Ratio, IFRS 17), Healthcare (Clinical/Billing, HEDIS/CAHPS, HIPAA), Retail/E-commerce (Customer 360, Inventory Optimization, Sales Funnels)

Soft Skills: Data Storytelling, Stakeholder Communication, Critical Thinking, Problem-Solving, Cross-Functional Collaboration, Agile/Scrum Mindset, Business Acumen

Professional Experience

Business Data Analyst, UnitedHealth Group, USA

Sep 2024 – Present

- Analyzed 1M+ clinical, claims, EHR/EMR, and billing records using SQL (T-SQL/PL/SQL, Window Functions/CTEs), Python (Pandas/NumPy), and Excel (Power Query/VBA), developing Power BI/Tableau dashboards for HEDIS/CAHPS KPIs and appointment adherence, reduced weekly reporting time by 20 hours and boosting decision accuracy by 18%.
- Built scalable ETL pipelines with AWS Glue/Lambda/Airflow to ingest/transform 500K+ daily records from Epic/Cerner systems into S3/Redshift, integrating IAM/CloudWatch for monitoring, automating monthly compliance reports, and eliminating 15 hours of manual processing per cycle.
- Performed root cause analysis on claim denials/readmissions via A/B testing, logistic regression, K-means clustering, and Prophet forecasting in Python/Scikit-learn, reducing no-show rates by 12% and elevated chronic disease risk predictions to 85% accuracy for enhanced care planning.
- Executed data mapping/validation across HIPAA/CMS/ICD-10/NCQA datasets with SQL stored procedures and Great Expectations, ensuring 99.8% accuracy in audits and streamlining SOX/HIPAA reporting workflows.
- Led Snowflake/BigQuery migrations with encryption/IAM controls and dbt modeling, cutting data retrieval times by 30% while conducting UAT/SIT to maintain compliance and enable self-service analytics.
- Drafted BRDs/user stories/SOPs in JIRA/Confluence, delivering interactive drill-through dashboards and data storytelling sessions, accelerating stakeholder buy-in and operational efficiency by 25%.

Data Analyst, Hexaware, India

Jan 2020 – Apr 2023

- Processed 2M+ financial/insurance/e-commerce records from SQL Server/PostgreSQL/Snowflake/BigQuery using Azure Data Factory/GCP Dataflow ETL pipelines for CSV/JSON/Parquet handling, reducing processing latency by 25% and supporting real-time analytics.
- Designed Power BI/Tableau/Looker dashboards for claim approvals/underwriting trends/CAC/conversion funnels, incorporating DAX and interactive filters to drive 60% higher stakeholder engagement and trimmed monthly report generation by 18 hours.
- Developed AI/ML forecasting models with Python (Scikit-learn/XGBoost/Prophet/SAS) for claims/revenue/churn predictions, applying linear/logistic regression and time-series analysis to achieve 20% accuracy uplift while aligning with IFRS 17/NAIC standards.

- Implemented secure data storage in S3/Azure Blob/GCP GCS with IAM/encryption and Great Expectations validation/UAT cases, attaining 99.9% integrity for SOX audits and enhancing data governance practices.
- Authored BRDs/wireframes/user stories in JIRA/MS Visio, facilitating Agile/Scrum ceremonies with cross-functional teams to deploy KPI-focused dashboards for finance/risk/sales, speeding decisions by 15%.
- Optimized Azure/GCP migrations using Synapse/BigQuery materialized views and PySpark for query performance, yielding 40% faster insights and promoting resilient, self-service data discovery.

Data Analyst Intern, Hexaware, India

Aug 2019 – Jan 2020

- Benchmarked Medicare Advantage cost trends across 100K+ provider/payer records using Excel (INDEX-MATCH/Data Tables)/Power BI and Python (Regex/Pandas), pinpointing network gaps to cut contract inefficiencies by 10%.
- Conducted gap analysis for preventive care utilization per CMS/ICD-10/HEDIS via Alteryx/Power Query merges of claims/provider data, aligning quality metrics by 15% and mitigating compliance risks.
- Crafted SQL queries (CTEs/temp tables) in Snowflake for actuarial modeling/audit trails with HIPAA data masking, generating PMPM trend reports in Excel to save 12 hours weekly in routine tasks.
- Supported QA/UAT for Power BI/Tableau dashboards, curating data catalogs/ETL docs in Confluence to streamline governance and reduce audit prep time by 10 hours per cycle.

Education

Master of Science, Computer Science

May 2023 – Dec 2024

Auburn University at Montgomery, Alabama

- Relevant Coursework: Data Mining, Cloud Computing, Advanced Database Systems

Bachelor of Science, Computer Science

Jul 2017 – Jul 2021

Jawaharlal Nehru Technological University, India

- Relevant Coursework: Data Structures, Algorithms, Database Management Systems

Certifications

- **Google Data Analytics Professional Certificate**, Coursera, 2023
- **Microsoft Power BI Data Analyst Associate**, Microsoft, 2023
- **AWS Certified Data Analytics – Specialty**, Amazon Web Services, 2022
- **IBM Data Science Professional Certificate**, Coursera, 2022
