

Tella Manisha Lakshmi

Data Analyst / Business Analyst

California, USA • Phone: +1 (334) 220-9663 • Email: manishalakshmit@gmail.com • [LinkedIn](#)

Professional Summary

Orchestrated data-driven solutions as a Data Analyst and Business Analyst with 4.5 years of experience in finance, retail, and healthcare sectors. Engineered ETL pipelines, advanced visualizations, and statistical models using SQL, Python, Power BI, and Tableau, achieving up to 25% efficiency gains. Expert in crafting BRDs, user stories, and process flows, driving Agile/Scrum projects to deliver actionable insights and optimize business operations.

Technical Skills

- **Programming Languages:** Python (Pandas, NumPy, Seaborn, Matplotlib, Plotly), R (tidyverse, ggplot2), SQL (T-SQL, PL/SQL, Window Functions), Excel (Power Query, VBA)
- **Data Visualization:** Power BI, Tableau, Google Data Studio, Looker, Excel Dashboards, Qlik, KPI Metrics, DAX
- **ETL & Data Integration:** Azure Data Factory, AWS Glue, GCP Dataflow, Informatica, Talend, SSIS, REST APIs, JSON/XML Parsing, Python ETL Scripts
- **Databases & Warehouses:** SQL Server, PostgreSQL, MySQL, Oracle, MongoDB, Snowflake, Redshift, BigQuery, Azure Synapse, Databricks
- **Cloud Platforms:** Azure (ADF, Synapse, Blob Storage), AWS (S3, Redshift, Athena, Lambda), GCP (BigQuery, GCS, DataPrep)
- **Business Analysis Tools:** JIRA, Confluence, MS Visio, Lucidchart, Figma, BRD, FRD, Use Cases, User Stories, Wireframes, Stakeholder Interviews
- **Documentation & Reporting:** UAT Scripts, SOPs, Functional Specs, Data Dictionaries, Compliance Reports (SOX, HIPAA, IFRS 17, NAIC), Audit Logs
- **Domains:** Finance (Risk, Claims, Investments, Compliance), Insurance (LTV, Loss Ratio, IFRS), Healthcare (Clinical/Billing Data, HIPAA), Retail (Customer 360, Inventory), E-commerce (User Behavior, Sales Funnel)
- **Statistical & ML Skills:** Regression (Linear, Logistic), A/B Testing, Clustering (K-means), Hypothesis Testing, Anomaly Detection, Forecasting
- **ML & Automation Tools:** Scikit-learn, XGBoost, TensorFlow (Basic), AutoML, Prophet, PyCaret, Jupyter Notebooks, ML Pipelines
- **Data Governance & QA:** Great Expectations, dbt, Data Lineage, Data Catalogs, QA Testing, Data Profiling, Reconciliation, Rule-Based Validations
- **Project & Agile Tools:** Agile/Scrum, Sprint Planning, Product Backlog Grooming, Jira Boards, UAT, Standups, Change Management

Professional Experience

Business Data Analyst, UnitedHealth Group, USA

September 2024 – Present

- Analyzed 1M+ clinical, claims, EHR/EMR, and billing records using SQL (T-SQL, PL/SQL), Python (Pandas, NumPy), and Excel (Power Query, VBA), delivering Power BI and Tableau dashboards for KPIs like HEDIS, CAHPS, and appointment adherence, reducing reporting time by 20 hours weekly.
- Engineered ETL pipelines with AWS Glue and Lambda to ingest and transform 500K+ daily records from Epic and Cerner, stored in S3 with IAM controls, and monitored via CloudWatch, automating monthly reports and saving 15 hours of manual effort per cycle.
- Conducted root cause analysis for claim denials and readmissions using A/B testing, regression, and K-means clustering, reducing no-show rates by 12% and forecasting chronic disease risk with Prophet models, improving care planning accuracy by 15%.
- Performed data mapping and validation across HIPAA, CMS, ICD-10, and NCQA datasets, writing SQL stored procedures for audits, achieving 99.8% data accuracy and supporting compliance reporting.
- Facilitated Snowflake and BigQuery migrations, validating encryption and IAM controls, reducing data retrieval time by 30% and ensuring HIPAA compliance during UAT and SIT phases.
- Authored BRDs, user stories, and SOPs in Jira and Confluence, delivering drill-through dashboards and data storytelling presentations, improving stakeholder decision-making efficiency by 25%.

Data Analyst, Hexaware, India

January 2020 – April 2023

- Transformed 2M+ financial, insurance, and e-commerce records from SQL Server, PostgreSQL, Snowflake, and BigQuery, building ETL pipelines with Azure Data Factory and GCP Dataflow, processing CSV, JSON, and Parquet files, and reducing data processing time by 25%.

- Developed Power BI, Tableau, and Looker Studio dashboards tracking claim approvals, underwriting trends, CAC, and conversion funnels, increasing stakeholder engagement by 60% and cutting report generation time by 18 hours monthly.
- Built forecasting models with Python (Scikit-learn, XGBoost, Prophet) for claims, revenue, and churn, applying regression and time series analysis, improving prediction accuracy by 20% and aligning with IFRS 17 and NAIC standards.
- Managed secure data storage in S3, Azure Blob, and GCP Cloud Storage with IAM and encryption, enhancing QA with Great Expectations and UAT test cases, achieving 99.9% data integrity for compliance audits.
- Created BRDs, wireframes, and user stories in Jira and Lucidchart, collaborating with cross-functional teams in Agile/Scrum ceremonies, delivering KPI-driven dashboards for finance, risk, and sales analytics, improving decision-making speed by 15%.
- Supported Azure and GCP cloud migrations, optimizing query performance by 40% with Azure Synapse and BigQuery materialized views, enabling resilient analytics and self-service data discovery.

Data Analyst Intern, Hexaware, India

August 2019 – January 2020

- Benchmarked Medicare Advantage cost trends using Excel (INDEX-MATCH, Data Tables) and Power BI, analyzing 100K+ provider and payer records with Python (Regex, Pandas), identifying network gaps and reducing contract inefficiencies by 10%.
- Conducted gap analysis for preventive care utilization using CMS, ICD-10, and HEDIS standards, merging claims and provider data with Alteryx and Power Query, improving quality metric alignment by 15% and reducing compliance risks.
- Developed SQL queries (CTEs, temp tables) in Snowflake for actuarial modeling and audit trails, validating HIPAA-compliant data masking, and delivering PMPM trend reports in Excel, saving 12 hours weekly in reporting tasks.
- Contributed to QA/UAT testing of Power BI and Tableau dashboards, maintaining data catalogs and ETL pipeline documentation in Confluence, streamlining governance processes and reducing audit preparation time by 10 hours per cycle.

Education

Master of Science, Computer Science

May 2023 – December 2024

Auburn University at Montgomery, Alabama

- Relevant Coursework: Data Mining, Cloud Computing, Advanced Database Systems

Bachelor of Science, Computer Science

July 2017 – July 2021

Malineni Lakshmaiah Womens Engineering College, India

- Relevant Coursework: Data Structures, Algorithms, Database Management Systems

Certifications

- Google Data Analytics Professional Certificate, Coursera, 2023
- Microsoft Power BI Data Analyst Associate, Microsoft, 2023
- AWS Certified Data Analytics – Specialty, Amazon Web Services, 2022
- IBM Data Science Professional Certificate, Coursera, 2022
