

Summary

Senior-level Data Analytics and Business Intelligence professional with deep hands-on experience designing, developing, and maintaining enterprise BI platforms, analytical data models, and automated data pipelines in public-sector and regulated environments. Demonstrated expertise across the full analytics lifecycle—data ingestion, transformation, modeling, validation, governance, and visualization—using Power BI, SQL, Azure Data Factory, SSIS, Snowflake, and Python. Proven ability to translate complex business requirements into scalable, reliable, and executive-ready analytics solutions that directly support mission-critical decision-making.

Experience

Loker Student Union

Aug 2023 – May 2025

Information Technology Analyst / Data Analytics & Reporting Lead

- Architected and owned enterprise Business Intelligence solutions, designing end-to-end analytics workflows from raw data ingestion to executive dashboards using Power BI, SQL, Excel, and Azure Data Factory.
- Designed, developed, and maintained semantic data models, including star and snowflake schemas, supporting KPI tracking, operational analytics, and ad-hoc reporting across financial, facilities, and administrative domains.
- Built and optimized automated ETL pipelines using Azure Data Factory, SSIS, Power Query, and Python, integrating data from databases, APIs, and flat files into analytics-ready structures.
- Established data quality frameworks including profiling, validation rules, reconciliation checks, and exception reporting to ensure accuracy, completeness, and consistency of all analytics outputs.
- Led dashboard and report development using Power BI, applying visual storytelling best practices to deliver intuitive, consistent, and decision-focused analytics for leadership.
- Partnered directly with business stakeholders to define KPIs, metrics, and analytical requirements, translating business needs into scalable technical designs.
- Performed advanced SQL analysis and performance tuning to improve query efficiency, dashboard responsiveness, and refresh reliability.
- Troubleshoot and resolved data and reporting defects in both development and production environments, ensuring continuity of analytics services.
- Produced executive-level analytical briefings and reports used for operational reviews, risk assessment, and strategic planning.
- Authored and maintained technical documentation including data dictionaries, ETL logic, reporting specifications, and SDLC artifacts to support governance and long-term maintainability.
- Coordinated with IT governance, security, and compliance teams to ensure analytics solutions aligned with enterprise data standards, change management processes, and audit requirements.

Webacy(Extern).

Aug 2024 – Oct 2024

Technology Risk & Data Analytics Analyst

- Supported enterprise analytics validation and reporting accuracy across decentralized systems used for governance and compliance decision-making.
- Performed SQL-based data analysis, reconciliation, and validation testing to ensure integrity of analytical datasets.
- Collaborated with cross-functional technical teams to standardize data processes, quality controls, and documentation.
- Developed management-ready analytical reports and dashboards supporting leadership risk reviews.

Accopixel Technologies, India

Oct 2021 – Dec 2023

Strategic Data Systems Consultant

- Designed and supported enterprise-scale analytics platforms processing 5M+ records per month, enabling operational and strategic reporting.
- Engineered ETL pipelines and analytical datasets supporting dashboards, reporting, and downstream analytics use cases.
- Developed optimized SQL queries and views for data extraction, reconciliation, and reporting performance improvement.
- Partnered with data architects and engineers to ensure models were scalable, performant, and aligned with enterprise standards.
- Led data profiling, validation, and reconciliation efforts, reducing reporting discrepancies and improving stakeholder trust in analytics outputs.
- Coordinated with vendors and internal teams to define data integration requirements, data dictionaries, and governance standards.
- Produced comprehensive SDLC documentation, SOPs, and technical specifications supporting audits, enhancements, and system changes.

American Express, India.

July 2019 – Sep 2021

Technology Risk & Operations Analyst

- Supported enterprise analytics and reporting systems for financial and customer operations.
- Conducted data integrity validation, reporting accuracy checks, and root-cause analysis for production incidents.
- Assisted in translating business and operational requirements into reporting and analytical outputs.
- Contributed to change management, SDLC documentation, and audit readiness activities.
- Delivered trend analysis and management reporting highlighting system performance and data issues.

Academic Projects

Enterprise Program Continuity & Performance Dashboard

- Designed a centralized monitoring system consolidating multi-source datasets to support continuity awareness, operational transparency, and executive oversight.
- Implemented automated validation and exception reporting to identify risks impacting service delivery and compliance readiness.
- Delivered policy-oriented briefings supporting leadership decisions during operational planning and response activities.

Grant Operations Resilience & Compliance Simulation

- Developed a simulated enterprise continuity and compliance reporting system mirroring statewide grant management workflows.
- Automated risk checks, audit validation, and recovery-ready data structures supporting fiscal accountability and continuity of operations.

Community Services Access & Risk Impact Study

- Conducted **impact analysis** to identify service accessibility risks affecting vulnerable populations.

- Translated analytical findings into **risk-informed operational recommendations** aligned with public-sector continuity and equity objectives.

Education

Master of Science in Computer Science | California State University Dominguez hills, CA

Dec 2022 – Aug 2025

Skills

- **Programming & Databases:**Python (automation, validation scripts), SQL (data integrity checks, reporting queries), Snowflake, Excel
- **Visualization & Reporting:**Power BI (DAX), Tableau, Executive Dashboards, Operational & Risk Reporting
- **Risk, Analysis & Quality Assurance:**Risk & Impact Analysis (BIA-style assessments), Data Quality Assurance, Trend & Variance Analysis, Control Validation, Exception Analysis
- **Data & Systems Management:**Data Extraction, Transformation, Validation, ETL Automation, System Dependency Analysis, Recovery Readiness Support
- **Tools & Platforms:**Azure Data Factory, SSIS, Power Query, Snowflake, Enterprise Reporting Systems (GrantVantage-style), O365 (Excel, PowerPoint, SharePoint)
- **Continuity, Governance & Compliance:**Business Continuity Support (COOP concepts), SOPs & Runbooks, Audit Readiness, Compliance Documentation, Policy & Control Alignment
- **Leadership & Collaboration:**Stakeholder Coordination, Cross-Functional Team Leadership (non-supervisory), Executive Briefings, Process Improvement, Training & Knowledge Transfer.
- **Framework Familiarity:** BIA concepts, COOP principles, Incident Command support models, NIST-aligned risk management practices.
