PROFESSIONAL EXPERIENCE

NMB Bank | Intern

September 2023 - November 2023

- Streamlined budget reconciliation and expense tracking using Excel, reducing monthly reporting errors by 9%.
- Led a cross-functional initiative to implement a digital queuing system, cutting service time by 17% and improving customer satisfaction.
- Supported the finance team in audit preparation, transaction processing, and cash flow analysis.
- Implemented and managed a token system, reducing customer wait times by 17% and increasing operational efficiency by 20%.

Maa Chandrika Fix Itta Udyog Private Limited | Financial Analyst

January 2022 - June 2023

- Performed cost-benefit analysis on CapEx for raw material procurement, increasing profit margins by 5%.
- Conducted financial benchmarking and market trend analysis, revealing 0.78 correlation between input prices and product cost.
- Built regression-based forecasting models to guide procurement strategy, reducing variable production costs by 7%.
- Created monthly cash flow and working capital reports, aiding management in short-term liquidity planning.
- Prepared journal entries, balance sheet reconciliations, and AP/AR summaries.
- Led cross-functional collaboration with procurement and operations teams to optimize inventory and procurement planning.
- Developed financial reporting templates for management use, streamlining month-end reporting cycles by 20%.

PROJECT EXPERIENCE

Capstone Project: Foundation (Endowment Fund)

February 2025 – May 2025

- Designed an asset allocation strategy for a \$1 Billion endowment fund distributed across five asset classes (equities, fixed income, real assets, alternatives, and cash equivalents).
- Utilized Bloomberg Terminal to retrieve historical data, perform stress testing, and validate assumptions behind allocation and long-term investment horizon.
- Allocated fixed income investments across T-Bills, T-Bonds, and Vanguard TIPS ETF to maintain capital preservation and inflation protection while achieving a portfolio return of 6%.
- Created a dynamic financial monitoring dashboard to support periodic rebalancing and performance reporting.

Leveraged Buyout (LBO) Model of Twitter

November 2024 – December 2024

- Executed an all-inclusive Twitter LBO analysis that resulted with an IRR of 38.95% and an MOIC of 3.73x, demonstrating excellent financial modelling capabilities.
- Estimated a \$1.8 billion exit multiple and structured a deal with over \$90.5 billion sponsor equity value while also leveraging \$109.3 billion enterprise value working with 60.9x exit multiplier and total initial investment of \$24.3 billion.

SKILLS

- **Financial Modeling:** Sensitivity & Scenario Analysis, LBO Modeling, DCF Valuation, M&A Modeling, 3 Statement Modeling, Monte Carlo Simulation, Comparable Company Analysis, Budgeting & Forecasting, Variance Analysis.
