SUMMARY

Software Engineer with expertise in building scalable, cloud-native applications, specializing in data-driven systems and cross-platform development.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, C/C++

Cloud and DevOps: GCP, AWS, Azure, Docker, Kubernetes, Jenkins, Git, Shell Scripting

Frameworks and Libraries: React.js, Node.js, Pandas, Express.js, PySpark, Next.js, Vue.js

Tools and software: MySQL, MongoDB, PostgreSQL, Tableau, Power BI, Microsoft Fabric, Splunk, ServiceNow, Postman, Selenium

Certifications: AWS - [CLF-CO2](#), Microsoft Azure - [AZ-900](#), GCP - [Associate Cloud Engineer](#)

EXPERIENCE

California State University, Los Angeles

Oct 2023 - May 2025

Software Developer

- Launched the NSF CATSUS website using React, Node.js, and MongoDB on AWS EC2, and published Cal State LA websites leveraging JavaScript, HTML, and Drupal, increasing user engagement by 45%.
- Ensured uninterrupted access to 3,000+ faculty records by deploying a scalable Faculty Management Portal on AWS Lightsail with 99.9% uptime.
- Led the planning, design, and development of a Cal State LA web app for research students, managing a team to implement form submissions and enrollment workflows using React, Node.js APIs, and MongoDB.

Accenture

Aug 2021 – Jul 2023

Software Engineer

- Constructed and orchestrated batch and streaming data pipelines using GCP services such as BigQuery, Pub/Sub, Dataproc, Dataflow, Cloud Composer and Cloud Run.
- Devised alerting policies and monitored data workflows in Cloud Composer and Data Fusion to ensure reliability and early failure detection.
- Improved real-time visibility across environments by managing 20+ Apache Airflow jobs for BigQuery, Dataproc, and Dataflow workloads.
- Enhanced data processing speed by 40% through composer-based orchestration and CI/CD scheduling using Google Cloud Functions.
- Automated 50+ Python scripts for data manipulation, task automation, and performance improvements, resulting in 25% faster processing times.
- Architected Dataflow pipelines to ingest JSON from GCS to BigQuery, enabling scalable and efficient analytics workflows.
- Automated provisioning of IAM policies across dev, staging, and prod environments using Terraform, ensuring consistent access control.
- Engineered enterprise-level middleware integrations using Oracle SOA Suite and BPM Suite to orchestrate 30+ critical banking workflows across consumer, retail, and enterprise units.
- Designed SOA composites using BPEL, OSB, Mediator, and Adapters, enabling seamless data flow between legacy systems and external platforms.
- Programmed synchronous and asynchronous web services using Java, JMS Queues, and Oracle SOA Suite for high-performance, scalable integration.
- Built and maintained RESTful and SOAP APIs using WSDL, XSLT, and XSD, ensuring seamless data exchange and reliability through SOAP UI validation and custom logging frameworks.
- Enhanced performance by tuning service orchestration logic and integrating with Oracle ERP systems using XML, XQuery, and XSLT transformations.
- Applied Agile and DevOps best practices by building CI/CD pipelines with Jenkins and GitHub Actions, increasing release frequency while maintaining quality.

PROJECTS

AI-Powered NutriBot (RAG, Semantic Search)

- Implemented a retrieval-augmented generation (RAG) application from scratch using OpenAI GPT-4o, Pinecone, and Streamlit to generate contextually accurate responses.
- Streamlined retrieval performance, achieving 86.67% context recall, 61.83% faithfulness, and 67% factual correctness, using embedding models, vector databases, and automated evaluation with retrieval augmented generation assessment (RAGAs).

Smart Shopping App (Unity, AR)

- Designed a smartphone application using Android Studio and Unity, incorporating augmented reality features and user authentication for enhanced functionality.
- Developed a Firestore database to manage user history and integrated payment gateway functionality for streamlined data management.

Snippet Application (Node.js, MongoDB, Vue.js)

- Developed a full-stack Code Snippet Manager with user authentication, CRUD operations, and real-time search.
- Implemented JWT authentication and modular database schemas with Mongoose, improving query efficiency by 30% and ensuring 99.9% uptime under load testing.

EDUCATION

Master of Science in Computer Science

California State University, Los Angeles

May 2025

GPA: 3.80/4.0

Bachelor of Engineering in Information Technology

Savitribai Phule Pune University

May 2021

GPA: 3.83/4.0
