SUMMARY

- Over 3 years of hands-on experience in full-stack application development using .NET technologies, including C#, ASP.NET, VB.NET, ADO.NET, and SQL Server, delivering scalable Web and Windows-based enterprise solutions.
- Strong proficiency in designing and developing RESTful and SOAP-based web services using WCF and .NET Web Services, supporting service-oriented architectures in distributed environments.
- Expertise in front-end technologies such as HTML5, CSS, JavaScript, AJAX, and XML, with a focus on building responsive, user-friendly interfaces and maintaining cross-browser compatibility.
- Deep experience in T-SQL for database design and development, writing stored procedures, functions, views, indexes, and performance-tuning in SQL Server 2000/2005/2008 and Oracle 10g/9i.
- Worked extensively with design patterns like MVC and MVVM, applying OOP principles and UML modeling in Agile and Waterfall environments to ensure maintainable, testable code.
- Experienced in building and deploying SSRS reports, SSIS packages, and integrating Crystal Reports for real-time data visualization and reporting in business-critical applications.

SKILLS

Programming Languages:	C#, T-SQL, LINQ
Frameworks:	ASP.NET Core, ASP.NET MVC, Web API, WCF, Entity Framework
Web Technologies:	HTML, CSS, JavaScript, Angular, Razor Views
Web Services & APIs:	RESTful APIs, SOAP, WSDL, XML
Database Technologies:	SQL Server, MySQL, PostgreSQL
Tools:	GitHub, SVN, Jira, MS Office suite, IDEs
Design Patterns:	MVC, Singleton, Factory, Decorator, Facade
Methodologies:	SDLC, Agile, Scrum, Waterfall
Operating Systems:	Linux, Windows Server

EXPERIENCE

Lumen Technologies, USA

.Net Developer

| Oct 2024 - Present

- Designed and developed ASP.NET MVC applications using the MVC design pattern, incorporating efficient data access strategies and exception handling blocks to ensure robust database connectivity and error management.
- Developed WCF Service Libraries and Web Services using XML, SOAP, and WSDL to facilitate secure data exchange between desktop and centralized applications, supporting core business logic workflows.
- Wrote and optimized stored procedures, user-defined functions, and T-SQL scripts in SQL Server to handle complex data operations and improve database performance.
- Built custom user controls using ASP.NET data controls (GridView, MultiView, DetailsView), improving UI functionality and enhancing user experience.
- Collaborated closely with cross-functional teams and clients to gather requirements, participate in demos, manage source code with TFS, and deliver technical support for production systems.

HCL Tech, India

Software Engineer

| Jan 2021 - Jul 2023

- Developed scalable web applications using ASP.NET Core, MVC, Web API, and Angular, ensuring responsive design and seamless user experience across devices.
- Built RESTful and SOAP services using WCF & Web API, enabling secure integration with third-party apps and internal systems.
- Created and customized Razor views and MVC models to render dynamic web content and support widget-based architecture in multiple projects.
- Leveraged LINQ, delegates, anonymous types, and lambda expressions in C# to manipulate complex datasets and improve code readability and performance.
- Used Entity Framework to perform CRUD operations on SQL Server databases, optimizing performance through stored procedures and LINQ-to-SQL queries.
- Employed design patterns like Singleton, Factory, Decorator, and Facade to implement robust and reusable software components and streamline development.
- Coordinated with offshore teams, managing daily task allocation and tracking sprint progress for successful on-time delivery.
- Developed & maintained Windows Services to handle large data processing loads across multiple Dev, QA, and Production teams.
- Utilized TFS & Git for version control & continuous integration, supporting code deployments across QA and Production environments during biweekly release cycles.
- Collaborated with business analysts and stakeholders in Agile development cycles, participating in daily stand-ups, sprint planning, and frequent demos to ensure alignment with business needs.

EDUCATION

M. S. in Computer Science; Auburn University at Montgomery, AL, USA

| May 2025
