

Manjusha Devi Sunkavalli

Data Analyst | Data Engineer | AI & ML Enthusiast

Email: manjushadevi526@gmail.com

Portfolio: <https://glittering-vacherin-965723.netlify.app>

LinkedIn: www.linkedin.com/in/manjusha-devi-sunkavalli-511212326

Ph#: +1 (203) 606-5192

PROFESSIONAL SUMMARY:

Results-driven Data & Technology Professional with 5+ years of experience in healthcare, insurance, and research domains. Skilled in building data pipelines, BI dashboards, and cloud-based (AWS, Azure) solutions. Proficient in Python, SQL, ETL (Informatica, SSIS), Power BI, Tableau, and ServiceNow. Experienced in AI/ML, NLP, and model deployment. Strong at translating complex data into insights to support decision-making in HIPAA-compliant environments.

TECHNICAL SKILLS:

Languages & Tools: Python, R, T-SQL, Shell Scripting, Git, Jupyter, Excel, Power Query

Data Engineering: SQL Server, Informatica, SSIS, Teradata, Flat Files, Azure, ETL Pipelines

Data Visualization: Power BI, Tableau

Cloud Platforms: AWS (EC2, S3, Lambda), Azure

Monitoring & Scheduling: Control-M, Autosys, ServiceNow, JIRA

AI/ML & Analytics: Scikit-learn, NLP, Computer Vision, Predictive Modeling, Deep Learning

Other Tools: Unix/Linux, Oracle 11g, Rack Servers, Patch Panels, Fiber/Cat6, BIOS

PROFESSIONAL EXPERIENCE:

Client: Downtown Evening Soup Kitchen, Newhaven, CT,USA

Feb 2025 – Aug 2025

Role: Data Analyst

Responsibilities:

- Developed interactive dashboards using Power BI and SQL Server to track food distribution and inventory metrics.
- Automated data ingestion and transformation processes using Informatica ETL and Shell scripting, improving reporting efficiency by 30%.
- Performed root cause analysis and system monitoring using Unix/Linux logs and Control-M job scheduling tools.

Environment: Python, Power BI, Looker Studio, AWS (EC2, S3), SQL Server, Unix/Linux, Shell Scripting, Git, Oracle, Teradata, Flat Files, Control-M, HP ALM, JIRA

Client: University Of New Haven, Newhaven, CT

Mar 2024 – Jan 2025

Role: Research Assistant

Responsibilities:

- Conducted research on Artificial Intelligence topics including machine learning, NLP, and computer vision using Python, Scikit-learn, and Jupyter.
- Developed and deployed predictive models on GPU-enabled Linux servers, supporting real-world research in ethical and interpretable AI.
- Created interactive dashboards in Power BI and built web-based visualizations using HTML and CSS for academic projects and presentations.

Environment: Artificial Intelligence, Machine Learning, Python, Jupyter, Scikit-learn, NLP, Computer Vision, Power BI, HTML, CSS, Ubuntu/CentOS, GPU Servers, Git, Shell Scripting, Windows Server

Client: University Of New Haven, Newhaven, CT

Sep 2024 – Dec 2024

Role: Teaching Assistant

Responsibilities:

- Supported hands-on labs in machine learning, data pipelines, and cloud data engineering (AWS), guiding students through model development and ETL concepts using Python, SQL, and Power BI.
- Facilitated classroom exercises on AI ethics, data visualization, and dashboard storytelling using real-world datasets in Power BI.
- Managed lab infrastructure including Linux/Windows systems, virtual machines, and access control for AI/ML coursework.

Environment: Python, Power BI, Machine Learning, Artificial Intelligence, Data Engineering, SQL, Jupyter, Scikit-learn, AWS, ETL Concepts, Linux, Windows 11, Visualization Design, Excel, Git

Client: Cigna, Bangalore, India

Apr 2023 – Jan 2024

Role: Senior ETL Developer

Responsibilities:

- Developed and maintained ETL pipelines using Informatica, SSIS, and Python to process healthcare claims and operational data in a HIPAA-compliant environment.
- Created Power BI dashboards to track clinical performance and financial KPIs, integrating structured data from SQL Server, Azure, and AWS S3.
- Conducted data modeling and performance tuning for reporting workflows, improving data accuracy and reducing report delivery time by 25%.

Environment: Python, Power BI, AWS (S3, Lambda), SQL Server, SSIS, Informatica, Azure, T-SQL, Jupyter, Control-M, Unix/Linux, ServiceNow, HIPAA Standards

Client: Zurich Farmers Insurance Group, Bangalore, India

Feb 2021 – Mar 2023

Role: BI & ETL Developer

Responsibilities:

- Developed and maintained automated reporting pipelines using SQL, SSIS, and R to analyze underwriting, claims, and risk data.
- Built Power BI dashboards for actuarial and operations teams, enhancing visibility into policy performance and KPIs.
- Supported on-premise infrastructure and managed incidents via ServiceNow, ensuring 99.9% system uptime and streamlined documentation.

Environment: Power BI, SQL Server, SSIS, R, Snowflake, Autosys, ServiceNow, Excel, Tableau, Windows Server, Linux, Structured Cabling, Patch Panels, Data Warehousing, ETL Automation

CERTIFICATIONS:

- Apache Spark Essential Training
- MLOps: Model Deployment & Monitoring
- Graph Databases: Neo4j
- REST & Web Data Essentials
- HTML Essential Training

EDUCATION:

University of Newhaven, Newhaven, USA

Jan 2024 – Aug 2025

Master of Science, Data Science

Relevant Courses:

Machine Learning & Predictive Analytics(Python), Distributed & Scalable Data Engineering (AWS, ETL Tools),Data Visualization & Storytelling (Power BI), Deep Learning & Computer Vision, Natural Language Processing (NLP), Cloud Computing for Data Applications, Advanced Statistical Methods for Data Science, Math for Data Scientists, Intro to Data Science, Artificial Intelligence, Leadership & Entrepreneurship, R Programming.
