Summary

Data Analyst with 3 years of progressive experience in data analytics, visualization, and automation, delivering impactful business insights and supporting data-driven decision-making. Proficient in SQL, Python, Excel, Power BI, and Tableau for data extraction, transformation, and advanced reporting. Skilled in building ETL pipelines, managing data warehousing, and leveraging cloud analytics (AWS, Azure, Snowflake) to optimize and automate data workflows. Demonstrated expertise in predictive analytics, A/B testing, and machine learning models to uncover actionable trends and drive business performance.

Technical Skills

- **Programming Languages:** Python (Pandas, NumPy, SciPy, Matplotlib, Seaborn, Scikit-learn), R, SQL (T-SQL, PL/SQL), SAS, Shell Scripting, Bash, PowerShell, Java, VBA for Excel, DAX, JSON, XML
- **Frameworks & Tools:** Jupyter Notebook, Git, GitHub, Docker, Jenkins, CI/CD, Apache Airflow, DBT, Statistics, Excel (Advanced), HTML, CSS, Agile, Hadoop, PySpark, ggplot2
- **Cloud & Big Data Technologies:** AWS (EC2, S3, Lambda, RDS, Redshift, Glue, QuickSight, CloudWatch), Azure (Data Factory, SQL Database, Blob Storage, Functions, Azure DevOps), Google Cloud Platform (BigQuery), Firebase
- **Databases:** MS-SQL / SQL Server, MySQL, Amazon Redshift, Snowflake, Google BigQuery, PostgreSQL, MongoDB, Spark SQL, Oracle, Azure SQL Database, Cassandra
- **Data Engineering & ETL:** SSIS, Informatica, Databricks, Data Modeling, Data Mapping, Data Extraction, Data Transformation, Data Cleansing, Data Validation, ETL
- **Data Analysis / BI & Visualization:** Power BI, Tableau, Looker, SSRS, Google Analytics, Microsoft Excel (Advanced, Pivot Tables, VLOOKUP, Formulas), Plotly, Data Mining, Statistical Analysis, Predictive Modeling, Regression Models, A/B Testing, Text Mining, Machine Learning

Professional Experience

Data Analyst, Anblicks

08/2024 – Present | Remote, USA

- Designed and automated an end-to-end data pipeline using SQL and Snowflake, reducing manual data ingestion by 50% and accelerating real-time analytics, significantly enhancing operational efficiency and data freshness.
- Developed robust data transformation workflows with Pandas, NumPy and SQL window functions for deduplication, ranking, and anomaly detection, improving data quality by 30% and enabling more accurate business insights.
- Built and deployed a machine learning model with Scikit-learn on AWS SageMaker to analyze customer behavior trends, improving retention rates by 20% through actionable, targeted engagement recommendations.
- Created interactive dashboards in Power BI to visualize customer churn, revenue forecasts, and engagement metrics, increasing forecasting accuracy by 30% and empowering business leaders with data-driven decision-making tools.
- Conducted A/B testing and cohort analysis using SQL and R, uncovering new engagement patterns that resulted in a 15% increase in customer interaction and overall satisfaction.
- Optimized cloud data infrastructure by integrating AWS S3, Lambda, and Redshift, reducing query latency by 40% and enabling scalable, cost-effective data processing for large analytics workloads.
- Automated ETL pipelines using Apache Airflow and DBT, streamlining data workflows and ensuring timely, error-free delivery of high-quality datasets to analytics and reporting teams.

Data Analyst, Tech Mahindra Pvt Ltd

07/2021 – 07/2023 | Hyderabad, India

- Extracted, transformed, and analyzed large-scale business datasets using SQL, Pandas, NumPy, and ETL pipelines, delivering actionable insights that improved operational efficiency and supported data-driven business strategies.
- Developed predictive models with Python (Scikit-learn, Statsmodels) and R, increasing forecasting accuracy by 20% for key business processes, trend analysis, and operational risk assessments.
- Automated ETL workflows using Alteryx and Apache Airflow, streamlining data ingestion and transformation, reducing processing times by 50%, and ensuring reliable, high-quality data delivery for business analytics teams.
- Built and deployed interactive dashboards in Tableau to visualize operational metrics, project performance, and resource allocation, reducing report turnaround time by 40% and enhancing management decision-making.
- Conducted business process analysis using Excel (VBA, PivotTables), evaluating process efficiency, resource utilization, and scenario analysis, helping identify bottlenecks and optimize resource allocation across teams.
- Applied advanced statistical techniques such as A/B testing, hypothesis testing, regression analysis, and time-series forecasting to uncover patterns and optimize key business processes for improved outcomes.
- Collaborated with cross-functional teams to ensure data governance, process compliance, and alignment with organizational standards, enhancing data reliability and supporting successful project delivery.

Education

Master of Arts, Webster University
Information Technology

08/2023 - 05/2025 | San Antonio, USA

Bachelor of Technology, MLR Institute of Technology

08/2019 - 05/2023 | Hyderabad, India
