

Manohar Reddy Karna

FLEXIBLE TO RELOCATE WITHIN USA

856-526-9512 | karnamanoharreddy07@gmail.com | [linkedin.com/in/manoharkarna](https://www.linkedin.com/in/manoharkarna) | github.com/karna1234223

SUMMARY

- Software Engineer - Full Stack, 2 years of experience building scalable, reusable, clean code with **Java, React, JavaScript, Angular, Python**.
- **Integrated AI** into workflows using tools like **Windsurf and Cursor**; automated tasks, analyzed AI insights & explored AI's impact.
- Integrated **Generative AI, LLMs, Prompt Engineering, and OpenAI API optimization** to **reduce latency by 25%**.
- Built admin UIs and analytics dashboards using **React, Vue, and Angular** with performance and extensibility in mind.
- Familiar with **Agile development, CI/CD pipelines**, IDEs, profilers, and basic **ServiceNow instance configuration**.

EDUCATION

Rowan University | Bachelor of Science, Computer Science

Aug 2021- May 2025

TECHNICAL SKILLS

- **Programming Language:** C, C++, Java, Python, C#, Go, HTML, CSS, JavaScript, TypeScript.
- **Database Tools:** Tableau, Custom React Dashboards, SQL, NoSQL, MongoDB, PostgreSQL, Unit Testing, MySQL
- **Frameworks And Tools:** Next.js, Vue.js, Angular, React.js, React, Git & GitHub, Linux, Unix, CI/CD, Node.js, Express, Test Automation.
- **AI & Cloud Platform:** OpenAI GPT, LLMs, Prompt Engineering, Cursor, Windsurf, ServiceNow(basic), AWS, Azure DevOps, Uni.
- **Courses:** Data Structures and Algorithms, Object-oriented programming, design patterns & scale architecture, software engineering

WORK EXPERIENCE

FULL-STACK SOFTWARE ENGINEER | RU

Jan 2025 – May 2025

- Developed a **full-stack** cognitive testing platform with **Django backend, React-based dashboards**, and secure role-based authentication, reducing manual clinician workload by 50% in collaboration with a team of 6.
- Engineered real-time **data visualization** workflows with **Matplotlib, Seaborn**, and web socket-based UI updates, improving clinical decision-making speed by 40%.
- Automated multi-participant **report generation with OpenPyXL and scalable APIs**, cutting processing time by 60% while achieving 100% export accuracy.

WEB APPLICATION DEVELOPER | RU

Aug 2024 - Dec 2024

- Designed user-friendly, visually engaging employee dashboards using **HTML, CSS, and JavaScript**, increasing user satisfaction by 50% and cutting page load time by 35%.
- Introduced reusable **UI components and Linux**, cutting development time by 30% and enhancing design consistency.
- Implemented interactive dashboards to improve data analysis by 15% with **Scalability and Reliability**.

AI ENGINEER INTERN | PIXELQUANT INNOVATIONS , PUNE, INDIA

Jan 2023 – May 2023

- Developed and fine-tuned a **YOLOv5-based computer vision model** to detect and classify common rice crop diseases from leaf images, achieving 70% test accuracy.
- Built a **preprocessing pipeline** to normalize, augment, and label over 5,000 agricultural images, improving model robustness to varied lighting and angles.
- Integrated the trained model into a mobile application using **TensorFlow Lite**, enabling real-time offline predictions for farmers.

PROJECTS

AI Powered Personal Budget App.

Jan 2025 – March 2025

- Built a **full stack platform using React, Node.js and PostgreSQL**, for tracking income or expenses, reducing manual effort by 80%.
- Integrated **OpenAI's GPT API** for personalized budgeting tips and summaries, boosting financial awareness by 30%.
- Implemented secure user authentication with JWT and encryption financial records, ensuring 100% data privacy.

Hospital Management Systems

Aug 2024 – Dec 2024

- Engineered a centralized Hospital Management System, patient records, boosting data retrieval by 40% cutting admin workload.
- Designed a **backend** with real time updates, decreasing appointment scheduling errors by 40%.
- Handled 5000+ patient records, developing a scalable **data architecture and integrating cloud storage solutions**.

AI Enhanced E-Commerce Web Platform

Jan 2024 – May 2024

- Integrated AI-powered product recommendations using collaborative filtering and GPT API, boosting cart values by 35%.
- Built real-time customer sentiment analysis using **NLP models** to highlight user pain points, improving ratings by 20%.
- Deployed the application on **AWS with CI/CD automation via Docker**, supporting 2000+ users with secure Stripe payments.
