SUMMARY

Results-driven Data Engineer with over 4 years of experience in designing scalable ETL pipelines, architecting data warehouses, and enabling real-time data processing using tools like Apache Kafka, PySpark, and Airflow. Skilled in leveraging Azure and AWS for optimized workflows and ensuring data accuracy across healthcare and HR domains. Proficient in Agile collaboration and committed to delivering data-driven insights that drive strategic decisions.

SKILLS

Programming Languages:	Python, SQL, Java
Libraries & Frameworks:	Pandas, NumPy, Apache Spark, PySpark, Dask, Apache Kafka, Hadoop, Hive
Databases:	MySQL, PostgreSQL, MS SQL Server, MongoDB, Cassandra, HBase, Amazon Redshift, Google BigQuery, Snowflake
Data Engineering:	ETL Development, Data Pipelines, Data Integration, Data Modeling, Data Lakes, Data Warehousing, Real-time Data Processing
Cloud Services:	AWS Lambda, S3, EC2, Azure, Google Cloud Platform (GCP)
DevOps/Automation:	Docker, Kubernetes, CI/CD Pipelines, Jenkins, Terraform
Tools & IDEs:	Git/GitHub, Jupyter, VS Code, Apache Airflow
Methodologies:	Agile / SCRUM, Waterfall
Operating Systems:	Linux, Windows and mac-OS

EXPERIENCE

Molina Healthcare, USA

Jan 2024 – Present

Data Engineer

- Designed and implemented scalable ETL pipelines to streamline the ingestion, transformation, and integration of healthcare data from diverse sources, ensuring data accuracy and compliance with regulatory standards.
- Optimized data workflows by integrating Azure Data Factory and Apache Spark, reducing processing time for Medicaid and Medicare claims data by 30%.
- Developed and maintained secure data warehouses using Snowflake and SQL Server, enabling efficient storage and retrieval of patient and health plan data for analytics and reporting.
- Collaborated with cross-functional teams to build real-time data processing solutions using Apache Kafka, enhancing the monitoring of healthcare service performance and patient outcomes.
- Automated data quality checks using Python and Pandas, significantly improving the reliability of datasets used in critical decision-making processes.
- Supported Agile workflows by participating in sprint planning, task prioritization, and code reviews, fostering a culture of collaboration and continuous improvement.

I Sparrow, India

Oct 2019 – July 2022

Data Engineer

- Designed scalable data architecture using Hadoop and Hive, enhancing data accessibility for analytics and improving reporting efficiency by 25%.
- Built and maintained data warehouses in Snowflake and Google BigQuery, enabling scalable and efficient storage of HR and compliance data for analytical purposes.
- Leveraged AWS services like Lambda and S3 to build automated workflows for payroll data processing, ensuring accuracy and timeliness in payroll delivery.
- Automated data transformation tasks using PySpark and Apache Kafka, reducing manual intervention by 30% and enabling real-time processing of recruitment and payroll data.
- Deployed Apache Airflow to schedule and monitor ETL jobs, improving the reliability of data ingestion processes across recruitment and compliance platforms.
- Collaborated with cross-functional teams in Agile environments, delivering timely data solutions that supported strategic decisions in recruitment and payroll management.
- Established CI/CD pipelines for automated deployment of data engineering workflows, accelerating the delivery of data solutions across departments.

EDUCATION

Master of Science, Information Technology

May 2024

The University of Texas at Dallas, Texas

Bachelor of Engineering

May 2021

Visvesvaraya Technological University
