

EDUCATION

University of Maryland College Park

College Park, MD

Master of Science in Information Systems; GPA: 3.7

Jan 2024 – May 2025

- **Coursework:** Database Management, Data Science, Predictive Data Analytics, Cloud Computing, Statistics

Acharya University

Bangalore, India

Bachelor of Business Administration - Data Analytics; GPA: 3.7 (9.2/10.0)

July 2019 – May 2022

SKILLS

- **Cloud Platforms:** AWS, Google Cloud Platform, Terraform
- **Programming & Scripting:** Python (NumPy, Pandas, Matplotlib, Seaborn, Scikit-Learn), R, SQL, Linux, NoSQL
- **Databases & Storage:** PostgreSQL, MongoDB, Neo4j
- **Data Engineering & Big Data:** ETL Design, Data Cleaning & Validation, Data Warehousing, Data Modeling, Data Processing, Data-Driven Decision Making, Data Mining, Apache Spark & PySpark, Hadoop (HDFS, MapReduce), Apache Hive, Apache Pig, Databricks, MLflow, Snowflake, Docker, Apache Kafka, Apache Airflow, Big Data Query
- **Machine Learning & Data Analysis:** Supervised & Unsupervised ML, Feature Engineering, Hypothesis Testing, KPI, A/B Testing, Time Series Analysis, Data Visualization
- **Business Intelligence & Visualization:** Power BI, Tableau, Google Analytics, Jupyter Notebook, Lucidchart, MS Excel (PivotTables, VLOOKUP, Macros)
- **Collaboration & Productivity:** Git & GitHub, Jira, Slack, MS Office Suite (Word, PowerPoint)

EXPERIENCE

Nexus Test Labs

Bangalore, India

Data Analyst

Oct 2022 – Nov 2023

- Performed exploratory data analysis using Python and SQL on customer, payment, and related data sets to identify revenue drivers and churn risk factors, guiding marketing strategies.
- Built interactive Tableau reports to automate KPI tracking, reducing manual reporting time by more than 50%.
- Collaborated with cross-functional teams to define metrics and data requirements, driving a 10% increase in campaign ROI.
- Implemented statistical models to forecast customer churn, ensuring the increase in the retention rate by 13%.
- Maintained detailed documentation of processes, methods used for analytics and recorded insights and findings.
- Presented monthly performance insights and strategic recommendations to managers and stakeholders, supporting data driven decision making.

Nexus Test Labs

Bangalore, India

Data Analyst Intern

Jan 2022 – May 2022

- Faced with fragmented customer, campaign, and payment data, Excel was used (PivotTables, VLOOKUP, Macros) to identify acquisition drivers, boosting engagement by 7%.
- Developed Python and Excel routines to clean, merge, and validate multi-source data, increasing accuracy by 20%.
- Built dynamic Tableau dashboards built to visualize KPIs, delivering insights that improved campaign performance by 5%.

PROJECTS

Atomic Music Data Migration (Tools & Technologies: Python, SQL, Visible Analyst, Lucidchart, Agile Method)

- Met with the client to gather requirements and uncovered legacy database limitations and Reverb-integration challenges.
- Engineered New DFDs and ERDs to streamline data flows and integration processes, enhancing cross-functional collaboration.
- Designed optimized data extraction and migration using SQL & Python for cleaning pipelines, reducing processing time by 25%.
- Researched and evaluated potential solutions, partnered with an outsourcing team to build a cloud-based system with seamless Reverb integration for inventory management, reducing operational expenses by 15%, and improving system performance by 30%.
- Developed a Python tool to automate Excel to XML conversions reducing 10 manual hours/week, ensuring police database uploads.

Yelp Business Data Analytics Pipeline (Tools & Technologies: AWS S3, Lambda, Glue, Databricks, PySpark, SQL, Athena, QuickSight, Neo4j, ETL Design)

- Collaborated with business analysts to capture requirements for near real-time insights from over 500,000 nested Yelp dataset records.
- Designed and deployed an end-to-end ETL pipeline using AWS S3, Lambda triggers, Glue Crawlers, and Databricks PySpark to ingest, clean, normalize and convert JSON to Parquet, boosting query performance by 40%.
- Feature engineering(sentiment scoring,categorical encodings) was performed, to enrich the dataset for machine learning.
- Trained, validated, and deployed classification and regression models to predict business success metrics and impactful insights.
- Reduced manual data handling by more than 90% through automation and event-driven architecture.
- Integrated Neo4j AuraDB to model and query complex user-business relationships, enabling graph-based recommendations.
- Interactive QuickSight dashboards built to visualize trends, customer satisfaction metrics, and KPIs, for data-driven decision making.

Free Kick Data Analytics (Tools & Technologies: SQL, Lucidchart, Statistical Analysis, Database Design)

- Collaborated with coaching staff to design a relational SQL database, normalizing soccer performance data for analysis.
- Conducted statistical analysis on KPIs such as pass accuracy and shots on target to generate actionable performance insights.
- Optimized match scheduling based on data-driven findings, improving operational efficiency by 35% and maximizing the use of practice sessions. Delivered visual data models that enabled strategic decision-making and objective evaluation of players.

Optimized Binary Prediction for Real-World Data (Tools & Technologies: R, Feature Engineering, Cross-Validation, Logistic Regression, XGBoost)

- Confronted with undefined success metrics for predicting Kickstarter project outcomes on a large real-world dataset leading a team.
- Feature engineering, cross-validation, logistic regression, and XGBoost implemented to train and optimize a classification model.
- Delivered 82.82% precision, the highest in contest, showing advanced predictive modeling expertise and collaborative leadership.
