

Summary

Dynamic Data Engineer with over 4 years of experience in designing and implementing advanced data pipelines, interactive dashboards, and machine learning models. Proficient in Python, SQL, and JavaScript, with a proven ability to transform complex datasets into actionable insights that drive strategic business decisions. Expertise in utilizing modern data engineering tools and frameworks to optimize workflows and enhance data accessibility. Demonstrated success in collaborating with cross-functional teams to gather requirements and develop effective data solutions. Committed to continuous learning and staying updated on industry trends to innovate and improve data processes, ensuring data integrity, security, and efficiency. This version retains the key elements while being more concise and focused.

Skills

**Programming Languages:** Python, Pandas, NumPy, SciPy, Matplotlib, SQL Server, MySQL, PostgreSQL, R, JavaScript  
**Web Development:** HTML, CSS, React, JavaScript  
**Data Visualization Tools:** Tableau, Power BI, Google Looker  
**Big Data Technologies:** Hadoop ecosystem, Apache Kafka, Apache Spark  
**Monitoring and Alerting:** Prometheus, Grafana, Elasticsearch, Kibana, Splunk  
**Data Analysis Tools:** Excel, Jupyter Notebook, SAS OnDemand, SAS Enterprise Miner  
**Development Tools:** Visual Studio Code  
**ETL/ELT Tools:** Informatica, Talend, Pentaho, Apache NiFi  
**Cloud Platforms:** Azure Data Factory, Databricks, Aws

Professional Experience

Accenture – Data Engineer – Remote, USAJan 2024 – Present

- Designed and implemented robust ETL data pipelines to extract, transform, and load large datasets from multiple sources, ensuring data integrity and accessibility for analytics teams.
- Collaborated with cross-functional teams, including data scientists and business analysts, to gather requirements and develop data solutions that drive actionable insights and support strategic decision-making.
- Utilized Python and SQL for data analysis and manipulation, optimizing query performance and enhancing data retrieval processes.
- Developed interactive dashboards and visualizations using Tableau and Power BI, enabling stakeholders to easily interpret complex data and monitor key performance indicators.
- Implemented data governance practices to ensure compliance with data security and privacy regulations, strengthening the organization’s data management framework.
- Engaged in Agile development processes, contributing to sprint planning and retrospectives to ensure timely delivery of data engineering projects.

INTUIT – Data Engineer – Boise, IDMay 2023 – Aug 2023

- Spearheaded the design and implementation of cutting-edge data pipelines, leveraging advanced technologies like Apache Spark and Kafka to enable seamless extraction, transformation, and loading of massive datasets from diverse sources.
- Collaborated cross-functionally with data scientists, analysts, and business stakeholders to gather requirements, define data models, and develop innovative solutions that drove actionable insights and supported strategic decision-making.
- Demonstrated expertise in Python and SQL, optimizing query performance and enhancing data retrieval processes to deliver high-quality results.
- Developed interactive dashboards and visualizations using Tableau and Power BI, empowering stakeholders to gain valuable insights and make data-driven decisions.
- Implemented robust data governance practices, ensuring compliance with data security and privacy regulations while enhancing the organization's data management framework.

VMEDIA – Data Engineer – Hyderabad, INDMay 2019 – Aug 2022

- Engineered and optimized scalable data pipelines to facilitate the efficient extraction, transformation, and loading (ETL) of large datasets from various sources, enhancing data accessibility for analytics teams.
- Collaborated closely with cross-functional teams, including data scientists and business analysts, to gather requirements and design data solutions that provided actionable insights, driving strategic business decisions.
- Leveraged advanced programming skills in Python and SQL to perform complex data analysis, improving query performance and ensuring the integrity and accuracy of data.
- Developed and maintained interactive dashboards and visualizations using Tableau and Power BI, enabling stakeholders to easily interpret data and monitor key performance indicators.
- Implemented robust data governance frameworks to ensure compliance with data security regulations and best practices, significantly enhancing the organization's data management capabilities.
- Participated in Agile development methodologies, actively contributing to sprint planning, retrospectives, and code reviews to ensure timely and high-quality delivery of data engineering projects.

Projects

WINE QUALITY CLASSIFICATION EDADecember 2023

- Conducted comprehensive Exploratory Data Analysis (EDA) on a dataset of 1,143 rows, uncovering critical patterns and insights that informed data-driven decision-making processes for the project.
- Leveraged 11 advanced classification algorithms on both original and engineered datasets, implementing k-fold cross-validation techniques to achieve an average accuracy improvement of over 15% compared to baseline models.
- Initiated and executed innovative feature engineering strategies, improving the predictive power of machine learning models and reducing false positives and negatives, which directly contributed to overall model accuracy.
- Documented the entire analysis process, including methodologies and results, to create a comprehensive report that serves as a reference for future projects and enhances knowledge sharing within the team.

WORLD STATISTICS DATASET ANALYSISAugust 2023

- Conducted an in-depth analysis of a world statistics dataset covering demographics, economy, health, and education to uncover patterns and insights for data-driven decision-making.
- Leveraged advanced data manipulation techniques and analytical tools to process the dataset, ensuring data integrity and enabling exploration of complex variable relationships.
- Developed data visualization solutions using Tableau and Power BI, creating interactive dashboards and infographics that effectively communicate key findings to stakeholders.
- Employed statistical methods and machine learning algorithms to identify correlations, predict trends, and provide actionable recommendations, delivering significant value to the organization.
- Collaborated with domain experts and stakeholders to gather requirements and validate findings, ensuring the analysis's relevance and fostering a culture of data-driven innovation.

Education

MASTER OF SCIENCE IN INFORMATION SCIENCESJanuary 2022 - December 2023

Trine University –Angola, IN

BACHELOR OF SCIENCE IN COMPUTER SCIENCESJuly 2017 - August 2020

Anurag Group of Institutions – India

Certificate

- Business Data Mining
- Web and Social Analytics
- Advanced Database Management
- Advanced Methods for Business Analytics
- Python Programming
- Supply Chain Management
- Big Data Analytics
- Web Data Management
- Project Management
- AWS Certified Cloud Practitioner
