PROFILE

As a driven software engineer with a Master's degree in Software Engineering and a Bachelor's degree in Computer Science and Engineering, I aim to leverage my skills, knowledge, and project experience to contribute to the development of innovative and impactful software solutions. My passion for technology and commitment to continuous learning enable me to collaborate effectively within teams and deliver modern, high-quality software products that address complex challenges and create value.

EDUCATION

Stevens Institute of Technology
Master's, Software Engineering

NEWJERSEY, NJ , USA
January 2023 - May 2024

Relevant Coursework: [Introduction to software development, Fundamentals of software engineer, Agile Methods for Software Development, Software Testing, Software quality and Assurance]

Jawaharlal Nehru Technological University, Anantapur
Bachelor's, Engineering [Distinction]

Nellore, INDIA
June 2018 - July 2022

SKILLS

Programming Languages and Web Technologies: Python, JavaScript, HTML, SQL, ReactJS
Developer Tools and Version Control: AWS, GitLab, GitHub, Jira
Database Technologies: MySQL, SQL, No SQL, AWS, GCP
Automated Testing Frameworks and Tools: Selenium
Cloud Technologies: SaaS
Software Development: Software Design, Software Testing
Methodologies and Project Management: Agile Methodologies, Jira, Product Lifecycle Management
Software Development:

PROJECTS

Clause Guard Fraudulent Clause Detection System (Python, Java, R): Jan2023-May2023

- Project summary: The "Clause Guard" project represents an innovative application of NLP and machine learning techniques to address the challenge of fraudulent clause detection in terms and conditions contracts.
- By harnessing the power of AI, the project aims to promote fairness, transparency, and legal compliance in contract agreements, ultimately benefiting consumers, businesses, and legal professionals alike.

Med Tracker (JavaScript, CSS, HTML): Feb2024-May2024

- Project summary: The "Med Tracker" project aims to develop a comprehensive software system for tracking and managing medications.
- Designed to improve medication adherence, promote health literacy, and enhance patient safety, the system will provide users with tools to organize, monitor, and optimize their medication regimen.
- Through intuitive user interfaces and intelligent features, Med Tracker will empower individuals to take control of their medication management process, reducing the risk of medication errors and improving overall health outcomes.

Guess THE NUMBER:

Feb2024-May2024

- Developed a Python-based interactive game challenging users to guess a randomly generated number, enhancing troubleshooting and strategic thinking skills.
- Implemented a user-friendly interface with a scoring system and difficulty levels, leading to a 25% increase in user engagement.
- Optimized game logic and utilized efficient algorithms, resulting in a 30% reduction in memory utilization and improved performance.

SLEEPY DRIVER ALERT WITH S.O.S. SYSTEM (Python, C++):

March2022-June 2022

- Improved drowsiness detection in vehicles using advanced technologies like OpenCV, frame processing, image processing, and landmark detection.
- Integrated Dlib and Twilio SMS API to promptly notify drivers in case of detected drowsiness, ensuring quick response and safety measures.
- Enhanced driver safety by implementing a comprehensive alert system that provides timely assistance during potential drowsiness-related incidents.

ONLINE VOTING PORTAL FOR COLLEGE:

jan2022- April 2022

- Played a pivotal role in developing an efficient online voting platform for electing various student body roles within the college community.
- Implemented secure login features using a college ID and a unique voting ID to ensure the integrity and accuracy of the voting process.
- Contributed to creating a user-friendly interface that streamlined the voting experience for college students, promoting engagement and participation.

PROFESSIONAL EXPERIENCE

Python, Cloud computing & DevOps – DataPro Information Technology (Pune, India)

july2022-Nov2023

- Gained practical experience in **Python, Cloud Computing & DevOps**, contributing to the development and deployment of software solutions.
- Assisted in designing, implementing, and optimizing **CI/CD pipelines**, enhancing automation and deployment efficiency in cloud-based environments.
- Supported cloud infrastructure management, ensuring system scalability, reliability, and security in alignment with industry best practices.
- Collaborated with cross-functional teams to troubleshoot deployment challenges and streamline software development workflows.

Data Engineer – Zetsoft

June2024-Present

- Developed and maintained scalable data pipelines to support real-time and batch processing across cloud environments.
- Designed and implemented data models to improve data accessibility and reporting for business stakeholders.
- Automated data ingestion and transformation workflows using Python and SQL, improving data reliability.
- Supported deployment of data infrastructure on cloud platforms, ensuring performance, security, and cost-efficiency.
- Collaborated closely with cross-functional teams to identify data needs and deliver timely, accurate solutions for analytics and decision-making.
- Monitored data pipeline performance and implemented logging/alerting to ensure data integrity and uptime.
- Contributed to documentation and knowledge sharing to support team scalability and onboarding of new engineers.

CERTIFICATIONS

Achieved AWS Certified Developer - Associate certification, showcasing expertise in crafting and deploying cutting-edge cloud solutions on the Amazon Web Services platform, solidifying a commitment to excellence in cloud dev
