Publications

- Object Detection using YOLO V3 with Python, IJNRD
- Network Traffic Analysis using Python, IJNRD
- Presented Walter AI from WNEU at NEean 2024

Professional Experience

Research Intern – WNE FinTech Incubator

Feb 2024 – May 2024

- Managed databases, automated user workflows, and extracted data using APIs to support data-driven decision-making.
- Analyzed investment opportunities and assisted in strategy development; presented findings to senior management.

FinTech + AI Startup Launch Series Fellow

Jun 2024 – Present

- Secured fellowship by winning the FinTech + AI 413 Startup Launch Series.
- Received support and resources to develop my startup idea – EZReceipts.

Student IT Specialist – Office of Information Technology, WNEU

Jun 2024 – Present

- Managed financial operations: processed payments, maintained records, tracked departmental expenses, and liaised with 250+ vendors while supporting IT and Facilities purchases and audit compliance.
- Led data-driven projects in Power BI using Argos, Colleague, and Self-Service data—delivered dashboards, budget comparisons, vendor analysis, and account-level reporting to guide decision-making.
- Conducted financial analysis to identify trends, optimize procurement, support budget forecasting and software catalog management; collaborated with OIT leadership on strategic reporting initiatives and summer internship analytics projects.

College of Business, WNEU

Teaching Fellow

Aug 2024 – Dec 2024

- Provided instructional support to Undergraduate Students engaged in ‘Prob Solving with Business Tools’.
- Collaborated with faculty members to enhance the learning experience.

Research Assistant

Aug 2024 – May 2025

- Developed and refined AI grading rubrics for Walter in collaboration with faculty to improve assessment accuracy and reliability.
- Built Tableau dashboards comparing AI vs. human grading and supported academic research with data-driven reports.
- Presented findings at NEean 2024, highlighting research impact and the effectiveness of student–faculty collaboration.

Entrepreneurial Venture

Founder & CEO—EZReceipts , a Smart Expense Management Platform

Jun 2024 – Present

- Developed the concept and strategy for EZReceipts, and secured funding by winning the FinTech + AI 413 Startup Launch Series.
- Oversee planning and operations while continuously refining the business model based on market research and emerging trends.
