

MANSI BHADANI

Jersey City, NJ 07307 | mansi.bhadani31@gmail.com | +1 201-630-1123 | [LinkedIn](#) | [GitHub](#)

EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems
Master of Science (MS) in Computer Science

New York, NY
December 2026

P.P Savani University

Bachelor of Technology(BTech) in Information Technology | **GPA: 9.08/10**

Kosamba, India
May 2023

PROFESSIONAL EXPERIENCE

Techcolabs Softwares Inc.

Remote

Data Scientist Intern | Co-Team Lead

December 2022 – April 2023

Project 1: Predicting Mortgage-Backed Securities Prepayment Risk using Machine Learning Models

- Developed a robust machine learning model that achieved 92% prediction accuracy, improving prepayment risk management.
- Analyzed and preprocessed over 1 million records of mortgage data to extract 20+ key features relevant to modeling.
- Implemented various machine learning algorithms, including decision trees, random forests, and gradient boosting.
- Delivered actionable insights that streamlined risk assessment workflows by 30%..

Innovative Research Labs

Remote

Data Science Intern

July 2022 – October 2022

Project: Movie Recommender System

- Developed a movie recommender system using collaborative filtering techniques that enhanced user engagement by 25%.
- Analyzed a dataset of over 100,000 user ratings and movie metadata to extract relevant features for recommendation.
- Achieved 85% Precision@K and reduced RMSE by 15%, delivering highly accurate recommendations.

ACADEMIC PROJECTS / PERSONAL PROJECTS

NJ Transit Smart Management and Optimization System

Present

- Designed and implemented a smart transit system leveraging real-time data tracking and predictive analytics to forecast delays and optimize routes.
- Utilized time series forecasting and causal inference to model transit schedules, achieving a 15% reduction in average commute times.

EDA on Netflix Data

February 2023

- Conducted exploratory data analysis (EDA) on a dataset of Netflix data using Python, Pandas, and Matplotlib to gain insights into user preferences and identified a 20% higher engagement for original Netflix productions versus licensed content.

Omicron Tweet Analysis

January 2022

- Performed sentiment analysis and topic modeling on Omicron-related tweets using Python, Natural Language Processing (NLP) techniques, and libraries such as NLTK, and Scikit-learn to understand public sentiment and identify key discussion themes. Achieved 85% accuracy in sentiment classification, revealing that 60% of tweets expressed negative sentiment.

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, C, C++, HTML, CSS, Java | **Database Management:** SQL/MYSQL, SQL Server, PostgreSQL, Hadoop | **Data Visualization Tools:** Power BI, Tableau, MS Excel, MATLAB, Google Analytics | **Libraries:** Python (Pandas, Numpy, Matplotlib, Pyplot, Seaborn, Statsmodel, BeautifulSoup), R (Tidyverse) | **Machine Learning Algorithms:** Decision Tree, KNN, Regression, Random Forest, SVM, K-Means, Classification | **Certifications:** Google Cloud Certified Professional Cloud Data Engineer, Google Cloud Certified Professional Cloud Data Engineer

RELEVANT COURSEWORK

VOLUNTEER

Google Developer Students Club, P.P Savani University, Tech Lead

August 2022 – July 2023

- Planned and organized technical events, workshops, hackathons, and expert sessions.
- Spearheaded the recruitment process, identifying and onboarding talented individuals to join the technical team.
- Fostered a collaborative and inclusive environment within the club, encouraging members to share ideas and contribute to innovative projects.
- Managed the technical team of GDSC PPSU, ensuring smooth execution of initiatives.
