PROFESSIONAL SUMMARY

Detail-oriented Data Engineer with 4 years of experience in building scalable ETL pipelines, real-time data processing, and cloud-based solutions. Skilled in utilizing Apache Spark, Kafka, and Airflow to streamline data workflows and enhance reporting efficiency. Experienced in optimizing data lakes on AWS and Azure for fast query execution and cost-effective storage. Proficient in integrating tools like Snowflake, Tableau, and Power BI to provide real-time insights through dashboards for better decision-making. Strong background in automating data extraction and transformation using Python, SQL, and advanced automation techniques. Proven ability to collaborate with cross-functional teams, applying Agile methodologies to deliver impactful results. Demonstrated success in driving business value by increasing financial metrics and improving research data collections.

PROFESSIONAL EXPERIENCE

- | | |
|---|--|
| PTC
Data Engineer | Boston, MA
Jun 2024 - Present |
| <ul style="list-style-type: none">Architected and deployed scalable ETL pipelines using Apache Spark and Kafka for real-time ARR processing, while implementing Apache Airflow for automated workflows, resulting in a 12.3% year-over-year revenue increase and 30% faster financial reporting.Developed optimized data lakes on AWS S3 with Glue integration and Delta Lake implementation, enabling efficient analysis of free cash flow (25% increase) and facilitating large-scale unstructured data processing for AI training datasets.Led the development of a data mesh architecture in collaboration with cross-functional teams, while ensuring domain-oriented data ownership and accelerated analytics delivery.Integrated and boosted enterprise BI solutions (Tableau, Power BI) to create real-time financial and workforce analytics dashboards, supporting executive decisions including a \$2 billion share repurchase program and achieving a 19% reduction in time-to-hire metrics.Enhanced distributed system performance through advanced partitioning and caching strategies in Hadoop and Apache Spark environments, resulting in a 25% reduction in query execution time and accelerated processing of workforce analytics data supporting a 4% headcount increase. | |
| University of Texas at Arlington
Research Assistant, Data Science | Arlington, TX
Aug 2022 - May 2024 |
| <ul style="list-style-type: none">Refined and consolidated 100,000+ research articles and scholarly publications using Python and SQL, implementing regulated ETL pipelines that elevated data collection efficiency by 25% and reduced manual processing time by 39.4% for the university's digital repository.Structured custom data extraction scripts to gather research materials from multiple academic databases and institutional repositories, resulting in a 41.2% increase in the library's digital collection coverage while maintaining 97.7% data accuracy.Coordinated with library staff and faculty researchers to optimize search algorithms and database organization, resulting in a 28% improvement in resource discovery and accessibility for university students and researchers.Executed data validation protocols and cleaning procedures that improvised data integrity by 45%, ensuring consistent formatting and accurate classification of research materials across multiple academic disciplines. | |
| TATA Consultancy Services
Junior Analyst | Pune, India
Aug 2021 - Aug 2022 |
| <ul style="list-style-type: none">Spearheaded data pipeline development and analytics for a high-impact retail project, utilizing Spark, Hadoop and executing root cause analysis along with implementing data-driven solutions that increased sales by 28.8% during peak seasons and lowered system downtime by 22.3%.Engineered and facilitated reporting processes using Tableau, generating over 50 recurring reports and 15 interactive dashboards monthly, saving 20 hours per week and improving operational efficiency by 12%.Conducted comprehensive data analysis, including customer segmentation and ad-hoc studies, identifying \$500,000 in annual cost savings, increasing customer retention by 20%, and enhancing data-driven decision-making by 27% across departments.Developed predictive analytics models for sales forecasting and inventory management, reducing overstock costs by 15% and improving inventory turnover while achieving an 18.9% enhancement in data processing and analytics efficiency.Leveraged Informatica PowerCenter for ETL processes to mine, cleanse, and curate data from multiple sources, uncovering actionable insights that support product functionality improvements that led to a 14.7% increase in user satisfaction. | |

TECHNICAL SKILLS

Methodologies: SDLC, Agile/ Scrum, Waterfall

Language: Python, SQL, R, Java, C/C++

Python Packages: Pandas, NumPy, Matplotlib, SciPy, Scikit-Learn, SeaBorn, PyTorch, TensorFlow, ggplot2, Plotly, Keras

Databases: MySQL, Oracle, Postgres, MS SQL Server, RDS

Big Data & Cloud Technologies: AWS, AZURE, Hadoop, Spark, Kafka, Snowflake, Apache Airflow, Informatica

Visualization Tools: Tableau, Power BI

Other Technical Skills: Visual Studio, GIT, Jupyter Notebook, Microsoft Excel

EDUCATION

M.S. Computer Science, University of Texas at Arlington

Aug 2022 - May 2024

B.E. Computer Engineering, Savitribai Phule Pune University

Aug 2017 - Aug 2021
