SUMMARY

Master's student in Computer Science with hands-on experience in **software engineering** and **full-stack development**. Certified in software development by industry leaders including **Walmart** and **Datacom**. Published research in esteemed journals such as **IJAEM** and **IJSRD**. Passionate about building innovative solutions, contributing to high-performing teams, and **open to relocation**.

WORK EXPERIENCE

Software Engineer Intern

Aeripay, Chicago, IL

June 2025 - August 2025

- Developed a Python tool to convert **AWS Step Function** definitions into auto-generated flowcharts and documentation using **Jinja2**, **Mermaid**, and **YAML parsing**.
- Designed and developed a responsive **UI** with **JavaScript**, **HTML & CSS** to improve navigation & developer experience.
- Created a static **API** documentation site using **Swagger** to enhance clarity and cross-team integration.
- Enhanced webhook retry logic using **Amazon SNS**, **SQS**, and **Lambda**; wrote a **Python** script to extract error codes for automated debugging.
- Took initiative to resolve multiple bugs from sprint tickets in **ClickUp**, strengthening system stability and internal workflows.

Software Developer

Social Syncing, India

May 2023 - October 2023

- Engineered two client-facing e-commerce platforms using **React** and **Node.js** with enhanced navigation and product search to boost user engagement.
- Enhanced Toys and Games Store engagement with personalized recommendations and interactive demos, increasing interaction by 20% and conversions by 15% using **MongoDB**, **Firebase**, and **Python**.
- Delivered a clean **UI** for the Books and Stationery Shop with categorized browsing and smart filters, driving an 18% rise in customer retention using **HTML**, **CSS**, and **JavaScript**.

Web Development Instructor

Self-Employed, India

January 2022 - December 2022

- Mentored 30+ high school students in fundamental web development concepts, introducing **HTML**, **CSS**, and **JavaScript** to spark early technical confidence.
- Facilitated interactive lessons using **React** and **Python**, enabling students to deploy fully functional websites.
- Curated course materials blending **UI/UX** principles and **SQL** for database handling, enhancing students' practical programming skills.

Web Developer Intern

Nibodh Pvt. Ltd., India

May 2019 - June 2019

- Built a feature-rich college website using **React**, **HTML**, and **CSS**, increasing online admissions by 40% through dashboards, an **LMS**, and an **AI chatbot**.
- Applied SEO strategies, responsive design, and **JavaScript** to enhance interactivity and accessibility across devices.
- Collaborated with a 15+ member team to resolve 20+ complex bugs and optimized **SQL** queries, boosting team efficiency by 25%.

ACADEMIC PROJECTS

PlanItNow (Professional Development Cohort Program)

July 2024 - September 2024

- Led a team of three front-end developers to build a full-stack event planning platform for university use, leveraging **React** and **Tailwind CSS** for a modern, responsive design. The system included **RSVP tracking** and location mapping via the **Google Search API**. **Python** powered the backend logic, enabling accurate event data processing and seamless integration of location-based features enhancing organizational efficiency by 30% and boosting user engagement.
- Overcame challenges in integrating secure authentication through **OAuth** for user login and **SQLite** for efficient database management, ensuring smooth functionality and seamless cross-device user experience.
- Architected intuitive **UI/UX** wireframes in **Figma** to guide development, focusing on an accessible and user-centered experience for university event coordinators.
- Employed **Agile methodologies** and managed sprints using **Jira**, ensuring on-time delivery of a scalable, high-

performance solution.

Blogging Platform- AI-Powered Community Engagement

January 2024 - March 2024

- Engineered an interactive blogging platform using **React** and **TypeScript**, featuring robust role-based authentication for multiple user personas significantly enhancing security and user management
- Integrated **Elasticsearch** for fast and accurate content search, deploying it with **Docker** for containerization to ensure scalability and simplify search service maintenance.
- Implemented **OpenAI-driven automated replies** using the **OpenAI API** to enrich user interaction and boost productivity.
- Crafted an intuitive **UI/UX** with **Material UI**, emphasizing seamless navigation, personalized real-time recommendations, and subscription-based notifications leading to increased user engagement and retention.

Tele-Medicine- A web Portal

February 2023 - April 2023

- Implemented a **Zoom-based** medical consultation portal using **Django** for backend logic and **HTML5**, **CSS3**, and **Bootstrap4** for **front-end** design. Integrated **JavaScript** to strengthen interactivity, improving patient-doctor connectivity by 30%.
- Created a secure system for image/report uploads and appointment scheduling, utilizing **PostgreSQL** for reliable data storage and smooth medical record retrieval.
- Increased appointment efficiency by 70% through **doctor verification enabled by OpenCV** and streamlined communication channels reducing response times and enhancing overall service quality.

SKILLS

- **Programming Languages:** Python, Java, JavaScript, C++, HTML5, CSS3, TypeScript, SQL
- **Frameworks & libraries:** React, Next.js, FastAPI, Flask, Node.js (Express.js), Zustand, Angular, .NET, Tailwind, Redux
- **Databases:** PostgreSQL, MySQL, MongoDB, SQLite, Firebase, Redis, Pinecone
- **Tools & Platforms:** AWS, Docker, Git, GitHub, CI/CD Pipelines, GCP, Agile methodologies (Jira, Scrum), REST APIs
- **LLM & AI Tools:** GitHub Copilot, Cursor, LangChain, LlamaIndex, Qodo (TestGPT, AI review), Claude, GPT 4, Llama 2
- **Soft Skills:** Problem-solving, Team Leadership, Clear Communication, Adaptability, Time Management, Collaboration

EDUCATION

Illinois Institute of Technology, Chicago, IL

August 2023 - May 2025

Master's in Computer Science

GPA: 3.5/4

University of Mumbai, India

November 2020 - May 2023

Bachelor of Engineering in Computer Engineering

GPA: 3.8/4

Thakur Polytechnic, India

July 2017 - October 2020

Diploma in Computer Engineering

GPA: 3.5/4

CERTIFICATIONS

- [Software Engineer](#) – HackerRank April 2025
- [Advanced Software Engineering](#) – Walmart USA May 2024
- [Software Development](#) – J.P. Morgan April 2024

PUBLICATIONS

- Published a survey paper on [“Tele medicine a web-portal for patients to have an online consultation with doctors”](#) in International Journal of Advances in Engineering and Management (IJAEM).
- Published a survey paper on [“Object Recognition Tool for Visually Impaired”](#) and [“Introduction to Distributed Computing System”](#) in International Journal for Scientific Research and Development (IJSRD).

ACHIEVEMENTS

- Summer Intern Capstone Project, Aeropay – Winner August 2025
- Internal Hackathon for Smart India Hackathon – Winner January 2020
- Pre-qualifiers in International Space Apps Challenges September 2019

EXTRACURRICULAR ACTIVITIES & LEADERSHIP

- Head of Sports – Student Council July 2022 - June 2023
- Chairperson for a Special Event – Rotaract Club July 2022 - June 2023
- Secured First Position in Box Cricket, Kabaddi, Dodgeball and Langdi March 2022
