Summary

I'm a results-driven Senior Data Analyst with 4+ years of experience transforming complex data into actionable insights across healthcare, retail, and finance. I specialize in building end-to-end reporting systems using SQL, Python, PowerBI, Tableau, Snowflake, and Databricks. I'm most excited about solving data challenges that uncover hidden insights, optimize performance and drive strategic decision-making.

Technical Skills & Technologies

Languages: Python,SQL ,R, C++

Databases: MSSQL, Snowflake, Databricks

Cloud: IBM Watson, AWS, Microsoft Azure

Container Software: GitHub (Git), Docker

Tools: Tableau, PowerBI , IPSS Modeler, Gephi

Development Methodologies: Agile, Waterfall, Scrum

Experience

Senior Data Analyst- Bayada | Jersey City,NJ

September 2022-Present

- Built and automated **ETL pipelines** using **Python**, streamlining data integration across multiple systems and increasing reporting accuracy by **20%**, while developing scalable dashboards that supported leadership in tracking KPIs and operational performance
- Increased reported revenue by **\$10M** and billed employee amounts by **\$7.5M** by performing **SQL-driven cohort analysis** and **data modelling**, integrating missing data into centralized pipelines, and enabling unified **Tableau reporting** for executive reviews
- Optimised **complex SQL queries and data models** in Redshift, Snowflake, and Databricks, reducing data retrieval time by **40%** and improving reliability of recurring reporting, which strengthened stakeholder confidence in automated dashboards and financial reporting processes
- Designed new **reporting and automation frameworks** that merged datasets across SQL Servers, Snowflake and Databricks, resulting in a **30% increase in tracked revenue metrics** previously unreported, enhancing visibility into operational and financial KPIs
- Collaborated with cross-functional stakeholders to integrate Snowflake and AWS data sources into **self-service dashboards**, improving data availability by **50%** and empowering business, finance, and operations teams to independently analyze trends and performance metrics
- Performed **exploratory data analysis and linear regression using Python** to forecast applicant-to-hire conversions and analyze cost-per-hire trends across channels, uncovering optimization opportunities while performing **A/B testing** that improved recruiter efficiency by **25%** and were implemented by business teams
- Presented findings and recommendations through **executive-ready presentations**, translating complex datasets into clear narratives that guided strategy and contributed to a **15% increase in ROI** across digital and operational initiatives

Data Analyst Intern- Bethel Industries, Inc | Jersey City, NJ

May 2022-August 2022

Private company with a contract to manufacture Bullet proof vests and uniforms for the US army.

- Implemented **ERP** for the company while providing data related analysis, research, management and reporting services
- Used **TSQL** to perform ETL on datasets using **SSMS** for generating queries
- Improved operator efficiency and generated reports on a regular basis along with removal of outliers in the data
- Developed **data models** using **SQL Data Modeler** representing and maintained the data process life cycle
- Created **dynamic** live Dashboards using real time data with **Tableau** while implementing and developing KPI metrics

Data Research Analyst Intern- Wakefern | Hoboken, NJ

August 2021-December 2021

- Conducted **Time Series Forecasting** and **Market Basket Analysis** for ShopRite stores located in and around Hoboken on the data provided
- Manipulated data and generated **reports** using **Python** and gained useful insights related to inventory management
- Used **Tableau** for visualizing the data and presenting to the stakeholders to improve sales
- Compared** combination of items best sold to provide an idea for organizing the combination of products inside the store

Data Analyst- Synnefo Softech LLP

July 2019-December2020

- Collected, cleaned, and modeled structured and unstructured data for key initiatives; analyzed **40+** client datasets to help double software engagement and reduce drop-off by **25%**
- Visualized data using **Tableau** and presented visually impactful dashboards to gain useful insights to the company and customers and data reporting was done using **MS Excel pivot tables**

Data Analyst Intern- Andromeda Bank

February 2019 - July 2019

- Developed, performed** and **managed** the analysis of business and financial metrics as well as performance measures while providing insights on key performance measures
- Participated in changing the company's strategic approach to billing methods, boosting the overall revenue by **9%** as well as reducing the accounts receivable by **20%**
- Tracked and fixed any financial database discrepancies and significantly reduced expenses of in-depth financial analysis by **15%** in 5 months

Education

Stevens Institute of Technology

January2021-December 2022

Master of Science, Management Information Systems

NMIMS University

August 2016-May 2020

Bachelor of Technology, Information Technology

Certifications & Research

- Tableau CRM Certification-Salesforce
- Data Warehouse Certification-Snowflake
- Google Data Analytics Certification-Google Analytics
- Wrote a research paper on Visi Light Communication (Li-Fi) in June 2019.- <http://cikitusi.com/gallery/21-june-865.pdf>
