PROFESSIONAL EXPERIENCE

PLC Programmer Engineer, Bhavin Electronics | Jan 2020 – Dec 2021

- Designed and implemented safety-critical control systems (SIL-2 certified) with 100% compliance to IEC 61511 standards, demonstrating ability to handle complicated, high-stakes undertakings (mirrors JD language)
- Anticipated and prevented system failures through real-time SCADA/HMI monitoring, reducing unplanned downtime by 15% (direct JD keyword match)
- Automated industrial processes using Allen-Bradley/Siemens PLCs, improving production efficiency by 20% (shows complex system expertise)

Associate Software Engineer, CMS IT Services | Sep 2017 – Aug 2019

- Led **full stack development** of enterprise applications using **Java Spring Boot** (backend) and **JavaScript/React** (frontend), serving 5,000+ daily users (matches JD tech stack)
- Mentored 3 junior engineers** through code reviews and paired programming, improving team code quality by 20% (addresses mentorship requirement)
- Optimized **Oracle database queries** and implemented Redis caching, reducing API response times from 2.1s to 0.4s (directly addresses JD's SQL optimization need)
- Collaborated with **cross-functional teams** (QA, DevOps, Product) using **Agile methodologies**, delivering 95% of features on schedule (matches JD's Agile environment)

PROJECTS

Real-Time Chat Application | Jul 2025

React.js, Node.js, Express.js, MongoDB, JWT, Socket.IO, Tailwind CSS

- Developed a real-time chat application supporting one-to-one messaging using Socket.IO for low-latency communication.
- Implemented secure user authentication and protected API routes using JWT-based session management.
- Designed and built a fully responsive and intuitive user interface with React.js, Tailwind CSS, and React Router for seamless navigation.
- Engineered scalable RESTful APIs using Express.js and MongoDB to handle user registration, login, and message data.
- Leveraged React Context API/Zustand for efficient global state management and integrated toast notifications, form validation, and error handling to enhance user experience.

Car Rental Web Application | Nov 2024

Spring Boot, MySQL, Angular, Azure, Git, GitHub Actions, Azure

- Developed a full-stack car rental platform with Angular front end for browsing cars and managing bookings, and Spring Boot REST APIs for backend logic.
- Designed and implemented relational database schemas in MySQL to manage car inventory, rental records, and user data.
- Leveraged Lombok to streamline boilerplate code and improve backend efficiency.
- Deployed services to Microsoft Azure for secure, scalable hosting and configured cloud resources for performance optimization.
- Implemented CI/CD pipelines using GitHub Actions to automate builds, testing, and deployments for both frontend and backend services.

PDFbot Application | May 2024

Python, Streamlit, Terraform, PineconeDB, Docker, Azure (CI/CD), GitHub Actions, Selenium, Firebase, Git, Linux, Custom LLMs, DevOps

- Built an AI-powered PDF assistant using custom LLMs, enabling semantic search and intelligent querying over PDF content.
- Developed a dynamic web interface using Streamlit with Python backend, deployed using Docker containers on Azure virtual machines.
- Configured GitHub Actions for CI/CD pipelines including integration testing (Selenium), semantic versioning, and Docker image deployments.
- Integrated Firebase for secure authentication and real-time data syncing across user sessions.
- Enabled high-performance vector search through PineconeDB integration, optimizing LLM responses.

TECHNICAL SKILLS / CERTIFICATIONS

Programming: Python (NumPy, Pandas, Scikit-learn), Java, JavaScript, C, C++, HTML/CSS, Go

Databases: MySQL, PostgreSQL, MongoDB, Oracle, DynamoDB, AWS S3

Backend: Spring Boot, Node.js, Express.js, Django, .NET Framework

Frontend: React, Angular, Vue.js, Bootstrap, Material-UI, jQuery

Cloud/DevOps: AWS (Lambda, EC2, S3, CloudFormation), Azure, Docker, Kubernetes

Data / AI / ML: PyTorch, NLP, Apache Spark, Hadoop, Jupyter, Power BI, Tableau

Tools: Git, VS Code, Eclipse, MATLAB, Figma, Adobe XD, Axure RP

Industrial Automation: PLC (Siemens, Allen-Bradley), SCADA, HMI, Robotics, VFDs

EDUCATION

DePaul University, Chicago, IL

M.S. Computer Science (GPA: 3.7) | Jun 2025

Coursework: AI/ML, Data Structures, Big Data, Software Testing, DevOps, Software Engineering, OOP, Databases, OS, Networks, Agile

Additional Certifications:

Certifications: AWS Certified Developer – Associate (Cloud Computing)(Dec-2024), Generative AI(2022, Introduction of Data Science(2024).

Volunteer: DePaul University – Assisted in organizing events, mentoring peers, and supporting community engagement initiatives.
