*Bachelor's, Economics*

- Minor in Computer and Information Science
- Relevant Coursework: Software Engineering, Business, Database Systems, Data Science, Econometrics, Industrial Organization, Statistics

## CERTIFICATIONS

Certified Scrum Product Owner®(CSPO®) - Scrum Alliance

Google Analytics Certification - Google Digital Academy (Skillshop)

Certified Business Analysis Professional™ (CBAP®) - Starweaver + Coursera

## PROFESSIONAL EXPERIENCE

### Studio 614

*Marketing & Product Analyst*

**Columbus, OH, USA**

*Jun 2024 - Present*

- Conducted data analysis with Google Analytics, SQL, and Tableau to segment user data for website campaigns, supporting A/B testing and delivering insights to optimize customer engagement.
- Utilized Excel for data validation and statistical analysis, aligning campaign outcomes with business objectives and presenting findings to cross-functional teams.

### White Castle

*IT Business Intelligence Intern*

**Columbus, OH, USA**

*Aug 2024 - Dec 2024*

- Automated invoice workflows program for the finance department with Python, Power Automate, and Excel, reducing manual processing time by 75% (10+ hours weekly), optimizing business intelligence processes.
- Built Tableau dashboards to visualize KPIs, integrating multi-source data to drive strategic decision-making and operational efficiency.
- Documented and improved system processes, ensuring compliance with data governance standards and supporting team knowledge sharing.

### Dandilyonn

*Android App Developer Intern*

**Remote**

*Jun 2022 - Aug 2022*

- Troubleshoot user experience issues by conducting 15+ stakeholder interviews, identifying 8 critical pain points, and delivering a user centric app design recognized with 3rd place in the SEEDs program.
- Worked in a remote team validating prototypes and technical solutions, enhancing product functionality and end user satisfaction.

## PROJECTS & OUTSIDE EXPERIENCE

### CSE 3241/5241 Database Systems Project

*Software Engineer*

**Columbus, OH, USA**

*Aug 2023 - Dec 2023*

- Led a 3-person team in designing a database system with 13 normalized relations and a Java-based interface and delivered comprehensive documentation, including ERDs, data flow diagrams, and over 20 SQL stored procedures.

### Beyond the Spotlight: Data-Driven Scouting of Undervalued Asian Baseball Prospects

*Data Visualization Lead, Ohio State University*

**Columbus, OH, USA**

*Jan 2025 - Apr 2025*

- Used Python and Excel to visualize KBO player data, predicting five prospects to exceed MLB's 2024 average OPS (0.711) via regression analysis ( $R^2 = 0.712$ ).
- [Link to project](#)

### Micro-Stay Booking Service Project

*Product Manager*

**Remote**

*Feb 2024 - Mar 2024*

- Led product discovery by conducting market research with 3 user personas, analyzing an \$84B market opportunity, and defining an MVP scope focused on customer needs using the MSCW framework and T-shirt sizing.
