EDUCATION

University of Texas at Dallas

Bachelor of Science in Computer Science

Dallas, TX

Expected August 2025

Relevant Courses: Data Structures and Algorithms, Computer Architecture, Discrete Math, Linear Algebra, Machine Learning, Data Analytics in Cybersecurity, Computer Graphics, Software Engineering, System Programming in Unix, Intro to AI, Advanced Algorithm Design

SKILLS SUMMARY

- **Languages:** Java, C++, C, Python, HTML, SQL, R, Ruby, JavaScript, TypeScript, Machine Learning, NLP
- **Frameworks and Tools:** Flutter, REACT, Node.js, Angular, Git, Docker, Postman, XCode, VSCode
- **Cloud and DevOps:** AWS (EC2, S3), Azure DevOps, CI/CD
- **Technologies:** REST APIs, Machine Learning, NLP, Data Analytics, System Programming

EXPERIENCE

Nelnet

June 2024 – May 2025

Software Engineer (Co-Op)

Lincoln, NE

- Developed features for the MIDAS application, streamlining customer data imports to improve accessibility and usability
- Enhanced UI components using Angular and HTML, increasing responsiveness and usability by 20%
- Built backend APIs in Java with SQL-based data models, reducing query execution time by 15%
- Integrated AWS (S3, EC2) to automate cloud-based data processing and improve deployment reliability
- Optimized CI/CD pipelines, accelerating deployment cycles by 30% and reducing system downtime

Stewart Title

June 2023 – Aug 2023

Software Engineer Intern

Houston, TX

- Migrated legacy on-prem databases to cloud-based SQL, achieving 99.9% data accuracy and zero rollback incidents
- Automated ETL pipelines using Python, reducing processing time by 40% and cutting manual intervention.
- Executed 30+ automated API test cases using Azure DevOps/Postman to ensure system resilience
- Optimized CI/CD deployment flow, shortening staging deployment time by 25% using YAML pipeline scripting.

Houston Methodist

May 2022 – Aug 2022

Summer Intern (Data Analytics)

Houston, TX

- Analyzed high blood cholesterol patient data using Prism and Excel, identifying patterns used in clinical studies
- Cleaned and visualized datasets, increasing data reporting efficiency by 40% using statistical models

TECHNICAL PROJECTS

Fun on the Run (FOTR) – Mobile App Developer

- Built a cross-platform mobile app using Flutter and Dart to help users discover local events and activities
- Integrated RESTful APIs for real-time content updates and leveraged AWS for authentication, storage, and backend
- Used Docker to containerize backend services; tested API functionality with Postman
- Collaborated in an agile team on UI/UX design, feature planning, and sprint reviews
- Developed and debugged across platforms using Android Studio, Xcode, and VSCode

PulseTracker – Health Analytics Dashboard

- Built a responsive health tracking dashboard using React and TypeScript to log and visualize metrics like sleep, hydration, and heart rate with interactive Recharts visualizations
- Developed 12+ reusable typed components and integrated mock REST APIs; implemented dark mode, form validation, and metric filtering using custom hooks, reducing code duplication by 40%
- Architected the app with scalable component structures and state management best practices, enhancing load speed and performance consistency across 95% of test devices

Investment and ROI App

- Built a financial investment and retirement calculator in Python, using compound interest formulas and user input to project long-term portfolio growth
- Integrated data validation and terminal-based UI to handle multiple investment scenarios; used matplotlib to visualize ROI projections
- Helped users make informed financial decisions by modeling expected returns over various timelines

CERTIFICATIONS

- AWS Certified Cloud Practitioner (2024)
- Generative AI for Everyone Certification (2024)
- Google AI Essentials (2024)
- PCEP: Entry-level Python Programmer (2023)
- Deep Learning AI for Everyone Certification (2023)
- Microsoft Certified: Azure AI Engineer Associate (2025)
