Professional Summary

Data analyst with 5 years of hands-on experience analyzing AHRQ healthcare and financial datasets, specializing in data wrangling, visualization, and predictive modeling to extract actionable insights. Skilled in executing server-based workflows to process complex healthcare data while optimizing performance and ensuring integrity. Proficient in Azure services, including Power BI, Synapse Analytics, and Azure SQL Database for scalable data solutions, with advanced capabilities in SAS for healthcare data manipulation and analysis.

Education

University of South Florida

Masters in Data Analytics and Information Systems

Aug 2023 - May 2025

Technical Skills

Programming & Query Languages: SQL (queries, joins, aggregations), Python, R, VBA

Data Management: Healthcare Claims Data, AHRQ Datasets, EHR Systems, Data Cleaning & Validation, HIPAA Compliance

Visualization & BI Tools: Power BI, Tableau, Excel (Pivot Tables, Charts, VLOOKUP, Power Query)

Analytics & Reporting: Descriptive Statistics, Trend & Anomaly Detection, KPI Dashboards, Ad-Hoc Reporting

Other Competencies: Healthcare Data Standards (ICD-10, CPT), Requirements Gathering, Process Documentation, Data Quality Assurance, Machine Learning (scikit-learn, PySpark MLlib – exposure)

BI & Visualization Tools: Power BI, Tableau, Looker, Qlik Sense, Excel (Advanced Dashboards, Pivot Tables, Power Query)

Analytics & Modeling: Predictive Analytics, Trend & Cohort Analysis, Data Mining

Other Competencies: Data Pipeline Optimization, Data Security & Compliance, Cross-Functional Collaboration, Requirements Gathering, Architecture Strategy

Certifications: Azure Data Engineer Associate, SAS Certified Specialist (Base Programming)

Experience

Data Analyst – (Blue Cross Blue Shield Association)

Jul 2024 – May 2025

- Processed and validated AHRQ healthcare datasets to ensure accuracy, HIPAA compliance, and data integrity across reporting projects
- Developed SQL queries and Power BI dashboards to analyze claims and clinical trends, helping leadership monitor utilization patterns
- Performed data quality checks and anomaly detection on large healthcare datasets, identifying errors and ensuring reliable analytics
- Collaborated with cross-functional teams to translate business needs into actionable data reports and visualizations
- Supported process improvements that reduced manual reporting effort by 40% and enhanced efficiency of healthcare analytics workflows

Data Analyst – (Tata Consultancy Services)

Dec 2021 – Jul 2023

- Cleaned, validated, and transformed large-scale claims datasets to support healthcare reporting and decision-making
- Created Tableau dashboards and Excel reports to highlight KPIs and trends in patient outcomes and operational performance
- Collaborated with healthcare stakeholders to define reporting requirements, ensuring compliance with HIPAA and client standards
- Performed ad-hoc data analyses to uncover inefficiencies and support improvements for payer-provider operations

Data Analyst – (Star Health Insurance)

Nov 2019 – Dec 2021

- Prepared and validated healthcare claims data for reporting, ensuring data accuracy and compliance with privacy regulations
- Built Excel and Power BI dashboards to track patient claims, anomalies, and utilization trends for leadership reviews
- Performed statistical and trend analyses to identify inefficiencies in claims workflows and recommend improvements
- Documented requirements and processes to support ongoing development of reporting systems and ensure reproducibility
- Supported ETL testing and debugging for claims data imports, maintaining accuracy and stability of reporting pipelines

Projects

Optimizing Healthcare Outcomes: A Power BI Analysis (GitHub)

Apr - Jun 2024

- Developed a Power BI dashboard analyzing 50K+ hospital records to uncover mortality trends across 5+ demographic groups, improving risk identification by 30%
- Transformed hospital performance data using advanced DAX to optimize resource allocation and enhance operational decision-making

Comprehensive Analysis of Financial Data (Tableau) (GitHub)

Mar - May 2024

- Designed Tableau dashboards to track revenue, cost, and profitability across 4 regions and 1K+ customers, enabling 40% faster financial insights
