

Maor Niv, Software Engineer
Software Engineer & AI Enthusiast

Atlanta GA | 678-670-6240 | maor.niv@gmail.com | <https://www.linkedin.com/in/maor-niv/>

AI-focused Software Engineer skilled in Python, SQL, Power BI, and Tableau, with experience delivering data-driven insights, optimizing algorithms, and leveraging GenAI to create client-focused solutions.

PROFESSIONAL EXPERIENCE

IKnowFirst Fintech, Tel Aviv, Israel

<https://iknowfirst.com/>

2024

Software Engineer

- Designed, developed, and deployed reporting solutions using SQL, Tableau, and Python, translating business requirements into measurable, actionable insights for C-level executives and enterprise clients.
- Wrote and optimized SQL queries to extract, validate, and transform data, ensuring accuracy, performance, and consistency across reports.
- Utilized Docker and DBeaver to process large datasets while maintaining reliability, compliance, and governance standards.
- Performed requirement analysis and built custom datasets to align reporting with evolving business KPIs and stakeholder needs.
- Built interactive Power BI and Tableau dashboards to simplify complex financial data, enabling faster decision-making and executive adoption.
- Created Python-based analytics pipelines (pandas, NumPy, yfinance) to automate recurring reports, reducing turnaround time and enabling personalized insights.
- Partnered with sales and business development teams to design proof-of-concept dashboards during pre-sales engagements, addressing client pain points and accelerating deal closure.
- Leveraged AI models to enhance predictive reporting and deliver actionable insights for stakeholders.

PROJECT EXPERIENCE

COVID Dashboard (SQL, Python, Tableau)

- Processed and cleaned real-world health data using SQL and Python, uploaded into a relational database.
- Designed interactive Tableau dashboard to visualize trends, enabling data-driven public health insights.

AI Training Models – Reinforcement Learning with Gymnasium (Python)

- Built and trained reinforcement learning models to master multiple environments, including Lunar Lander, Pac-Man (Atari), and Kung-Fu Master (Atari). Implemented algorithms using Gymnasium and Stable-Baselines, optimizing hyperparameters for performance and learning efficiency. <https://github.com/maorn124>

NBA Prediction Stats Model (Python, API)

- Built a predictive model using the NBA API to forecast player stats (points, rebounds, assists) against specific opponent teams with historical data and recent performance trends utilizing Python libraries

TECHNICAL PROFICIENCIES

- **Platforms:** Power Bi, Tableau, DBeaver, MySQL, Jupyter Notebook, Anaconda
- **AI & Development Tools:** SQL, Python, pandas, NumPy, matplotlib, yfinance, Docker, GitHub, GitLab, CursorAI, Lovable, Base44
- **OS Language:** Windows, Linux

SOFT SKILLS

Analytical Thinking
Collaboration

Problem-Solving
Time Management

Communication
Adaptability

EDUCATION & CERTIFICATIONS

- **BA, Computer Science, College of Engineering, Auburn University, AL 2024**
- **Artificial Intelligence Certified. August 2025**
