Professional Experience

Data Analyst

Samba Sips

Austin, Texas | June 2024 - Current

- Designed and executed customer behavior analyses using Python and SQL to uncover insights that informed product strategy, increased operational efficiency, and improved engagement.
- Applied market research and SEO insights to optimize video content, resulting in a sustained 140%+ lift in average reach across reels.
- Designed and executed A/B tests to evaluate product positioning strategies; identified top-performing SKU through sales trend analysis and optimized promotional focus, resulting in a 22% increase in sales.
- Built marketing performance dashboards to monitor KPIs (CTR, conversion rates, customer retention), contributing to a measurable lift in campaign effectiveness and brand visibility.
- Developed data-backed brand and UX identity by translating consumer research into design decisions that aligned with market trends and user preferences.

Data Analyst

Popfeed App

Austin, Texas | July 2024 - April 2025

- Independently led the development of a pre-launch music app by designing its end-to-end user interface and building its visual identity, from brand assets to functional prototypes.
- Applied data strategy principles to map out key retention metrics and design user flows aimed at maximizing early adoption and community engagement.
- Created interactive mockups and usability scenarios to test design hypotheses and simulate user behavior ahead of product release.
- Conducted market research and behavioral benchmarking to guide UX decisions and inform feature prioritization based on anticipated user journeys.

ICD Coding Specialist

Felício Rocho Hospital - Department of Diagnostic Related Groups

Belo Horizonte, Brazil | February 2024 - June 2024

- Executed ICD coding of patient records with precision to ensure compliance with regulatory standards and support accurate, system-wide clinical data analysis and reporting.
- Partnered cross-functionally with physicians, nurses, administrative teams, and health informatics to validate data inputs and enhance overall data quality.
- Utilized Excel to track and analyze trends in treatment outcomes, complications, and readmission rates; built internal dashboards to visualize findings and support decision-making.
- Delivered actionable insights that informed patient care strategies, improved resource allocation, and optimized clinical workflows.

- Focused on patient-centered outcomes by using data analysis to drive improvements in care quality, reduce risks, and enhance overall patient well-being.

Operations Manager

*Felício Rocho Hospital - Department of Orthopedics and Medical Specialties Outpatient Clinic
Belo Horizonte, Brazil | February 2023 - February 2024*

- Led operations for two high-volume departments, implementing KPI tracking systems to evaluate clinical performance, optimize workflows, and improve service delivery using data-driven insights.
- Created and presented monthly performance dashboards focusing on patient satisfaction (Net Promoter Score), increasing NPS from 88% to 93% within a single month — earning the department the hospital's top client satisfaction award.
- Translated patient feedback and operational data into actionable process improvements, directly enhancing care quality, wait times, and provider responsiveness.
- Managed a multidisciplinary team of physicians, nurses, and support staff; provided leadership in both routine operations and surgical environments, fostering continuous improvement in team efficiency and patient experience.

Intern

*Felício Rocho Hospital - Department of Diagnostic Medical Imaging
Belo Horizonte, Brazil | August 2020 - September 2021*

- Supported multidisciplinary imaging teams across departments including MRI, CT, Ultrasound, Cardiology, and Nuclear Medicine within one of Brazil's top diagnostic centers.
 - Contributed to operational process improvements by developing new workflows, optimizing emergency response protocols, and training nurse technicians.
 - Assisted with department-level management initiatives aimed at improving scheduling, team coordination, and patient experience.
-

Research Experience

Researcher - GLIDERS Initiative

*Yale University - Yale Stem Cell Center
Remote | 2021 - 2022*

- Participated in a competitive academic research program under Dr. Jun Lu, with a focus on cancer immunology, translational research, and academic development.
- Designed and presented an independent research proposal for an AI-driven sepsis detection tool aimed at identifying early symptoms in emergency and inpatient settings; the system incorporated early warning scores, symptom clustering, and potential integration with hospital EHRs.
- Conducted literature reviews and conceptual modeling involving the STING, cGAMP, and cGAS signaling pathways — exploring the immunological basis for anti-tumor responses.
- Contributed to weekly research discussions, developed structured project proposals, and received feedback from senior investigators, strengthening both scientific writing and research communication skills.

Researcher

*National Paraplegics Hospital - Experimental Neurophysiology and Neuronal Circuits Laboratory
Toledo, Spain | 2021 - 2022*

- Led a neuroscience research project investigating cerebellar circuit remodeling following spinal cord injury, in collaboration with the laboratory's principal investigator.
 - Designed experimental groups using A/B testing methodology to evaluate the effects of injury across cerebellar regions, applying statistical analysis to compare morphological and molecular outcomes.
 - Performed advanced in vivo and biochemical techniques, including brain dissection, cryoprotection, immunofluorescence, and Nissl staining, with imaging analysis conducted using ImageJ.
 - Interpreted experimental results through statistical testing (t-tests, ANOVA), drawing conclusions on proprioceptive signaling pathways and neuroplasticity in injured tissues.
 - Authored a dual-language scientific dissertation (English and Portuguese) that synthesized experimental design, results interpretation, and literature review; received highest honors from the thesis committee.
-

Education

Data Science Associate's Degree

Infinity School | May 2024 - February 2025

- Course that includes mechanisms for data analysis and visualization, neuroscience, databases, machine learning algorithms for predictive modeling, and intelligent systems with AI techniques.

Bachelor of Nursing

Pontificia Catholic University of Minas Gerais, Brazil | 2018 - 2022

Universidad de Castilla-La-Mancha, Toledo, Spain | Sep 2021 - Feb 2022

- Awarded a scholarship for a semester abroad.
 - Held leadership roles in student associations.
-

Skills

- **Software:** SQLite, VS Code, PowerBI, Excel, ImageJ, Adobe Lightroom, Prezi, Photoscape.
 - **Biochemical:** Immunofluorescence, Nissl Staining.
 - **In vivo:** Mouse perfusion, brain dissection, cryoprotection, tissue sectioning.
 - **Languages:** Portuguese (Native), English (Fluent - C1), Spanish (Advanced - B2), Italian (Beginner - A1).
-

Publications

- **Extension at the Association of Protection and Support for Convicts (APAC): Experience Report from the Nursing College of PUC Minas**
Júlio César Batista Santana, Mariana Andrade Nannetti, Gabrielle Ferreira Damascena | INTERDISCIPLINARY EXTENSION MAGAZINE - PUC MINAS, 2020.
- **Book "Ethical Conflicts"**
Júlio César Batista Santana, 2023 - Contributed four chapters on bioethical conflicts.
