

Mariya

Java Full Stack Developer | mariyaveena19@gmail.com | 214-380-4764

PROFESSIONAL SUMMARY:

- Java Full Stack Developer with 7+ years of experience delivering scalable, high-performance web applications using Java, Spring Boot, Hibernate, and microservices, achieving measurable improvements in system efficiency and maintainability.
- Proficient in building robust RESTful APIs and GraphQL endpoints to enable seamless communication between frontend and backend systems.
- Skilled in front-end development using React.js, Redux, Angular, Vue.js, HTML5, CSS3, and JavaScript for responsive, user-friendly interfaces.
- Strong experience in cloud-native application deployment and management on AWS and Azure, leveraging services like EC2, S3, Lambda, RDS, and Azure App Services.
- Hands-on expertise in containerization and orchestration using Docker, Kubernetes, OpenShift, and Terraform to improve deployment efficiency and system reliability.
- Adept at implementing CI/CD pipelines with Jenkins, Gradle, Maven, and Azure DevOps to accelerate development cycles and ensure high-quality releases.
- Experienced with database management using MySQL, PostgreSQL, Oracle, and MongoDB, including performance optimization and data modeling.
- Skilled in messaging and event-driven systems with Kafka, RabbitMQ, JMS, and WebSockets for high-throughput, real-time communication.
- Collaborates effectively in Agile/Scrum teams, mentoring junior developers and ensuring on-time delivery of high-quality software.
- Proven problem-solving and analytical abilities, proactively addressing technical challenges and optimizing system performance.

TECHNICAL SKILLS:

Languages: Java, JavaScript, TypeScript, SQL, PL/SQL

Backend: Spring Boot, Spring MVC, Spring Cloud, Spring Security, J2EE, Hibernate, JPA, REST, GraphQL, Microservices

Frontend: React.js, Redux, Angular, Vue.js, HTML5, CSS3, SASS/LESS, JSP, JSF, AJAX, Bootstrap

Databases: MySQL, PostgreSQL, Oracle, MongoDB

Messaging/Event Streaming: Kafka, RabbitMQ, JMS, WebSockets

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, ELB), Azure (App Service, Functions, Logic Apps, Azure AD), Docker, Kubernetes, OpenShift, Terraform, Jenkins, Gradle, Maven, Azure DevOps

Testing & QA: JUnit, Mockito, Swagger, Postman

Other: GitHub, BitBucket, Confluence, ELK Stack, Agile/Scrum, CI/CD, OAuth 2.0, SSL/TLS, Cross-browser compatibility

EDUCATION:

Bachelor of Science (B.Sc.) in Computer Science and Engineering | Loyola Degree and PG College, India

EXPERIENCE:

Champion Credit Union, Canton, NC | November 2024 – Present | Java Full Stack Developer

- Developed backend services with Spring Boot and Microservices, improving system scalability by 35% and reducing maintenance overhead.
- Developed end-to-end full-stack applications following SDLC principles, ensuring high-quality design, implementation, and deployment.
- Implemented GraphQL APIs that reduced data retrieval latency by 25% and supported seamless integration with the React frontend.
- Integrated Spring Cloud for service discovery, centralized configuration, and fault tolerance in cloud-native applications.
- Managed relational database operations using MySQL, ensuring efficient data storage, querying, and backend support.
- Developed multithreaded applications and leveraged Java Streams API to handle concurrent processes and process data efficiently.
- Built dynamic, responsive front-end interfaces using HTML5, CSS3, LESS, React.js, Redux, and React Router.
- Integrated Kafka for real-time messaging and event-driven systems, enabling high-throughput data streaming with minimal latency.
- Managed cloud deployment on AWS (Lambda, EC2, S3, RDS, ELB), optimizing resource utilization and reducing infrastructure costs by 20%.
- Containerized applications with Docker and orchestrated deployments using Kubernetes, improving system reliability and deployment speed.
- Built automated CI/CD pipelines with Jenkins and Gradle, cutting deployment time by 50% and minimizing manual errors.
- Conducted unit testing with JUnit to ensure reliable, bug-free application delivery.
- Ensured cross-browser compatibility and responsive design for seamless user experience across devices.
- Deployed applications on Apache Tomcat and monitored performance using JProfiler to identify and resolve bottlenecks.
- Documented APIs with Swagger and validated them using Postman to ensure compliance and functional correctness.
- Implemented robust security measures with Spring Security and SSL/TLS to protect sensitive data.
- Collaborated within Agile Scrum teams, using JIRA to track tasks, manage deliverables, and ensure timely project completion.

Environment: Spring Core, Spring Boot, Microservices, GraphQL, React.js, Kafka, AWS, Docker, Kubernetes, Jenkins, Gradle, JUnit, Apache Tomcat, JProfiler, Swagger, Postman, Spring Security, JIRA.

RLI Insurance, Peoria, IL | January 2023 - October 2024 | J2EE Developer

- Designed and deployed Spring Boot microservices, enabling modular architecture and independent service updates, improving system scalability by 30%.
- Designed, developed, and consumed RESTful APIs to facilitate seamless integration between services and external systems.
- Applied IoC and Dependency Injection principles to simplify component management and enhance application maintainability.
- Worked with Hibernate ORM and JDBC to manage data persistence and interact with relational databases and MongoDB.
- Built responsive web interfaces using HTML5, CSS3, SASS, JSF, and Angular; incorporating JavaScript and TypeScript for dynamic functionality.
- Integrated WebSockets for real-time client-server communication, increasing application responsiveness and user engagement by 15%.
- Implemented cross-cutting concerns such as logging and security with Spring AOP, boosting code reusability and maintainability.
- Deployed and managed cloud solutions on AWS (EC2, S3, Lambda, RDS, Autoscaling) to ensure high availability and performance.
- Developed and deployed containerized applications using OpenShift, Kubernetes, and Terraform, reducing infrastructure setup time and simplifying deployments.
- Managed enterprise application deployment and maintenance on JBoss servers, ensuring system reliability and performance.
- Configured and maintained logging and monitoring using the ELK Stack (Elasticsearch, Logstash, Kibana) to track performance and accelerate issue resolution.
- Secured applications with OAuth 2.0 by implementing authentication and authorization mechanisms.
- Implemented Jenkins CI/CD pipelines, reducing deployment errors and accelerating releases by 40%; used GitHub for version control and collaboration to improve team productivity.

Environment: Spring Boot, Microservices, RESTful APIs, Hibernate, JDBC, MongoDB, Angular, WebSockets, Spring AOP, AWS, OpenShift, Kubernetes, Terraform, JBoss, ELK Stack, OAuth 2.0, Jenkins.

Tenet Healthcare, Dallas, TX | March 2021 - December 2022 | Java Developer

- Developed JPA-based backend modules with PostgreSQL, optimizing query performance and reducing data processing time by 25%.
- Built modular applications with the Spring Framework and applied IoC and Dependency Injection for maintainable and scalable code.
- Created dynamic and responsive web interfaces using Java Servlets, HTML, CSS, JavaScript, Vue.js, and jQuery to enhance user experience.
- Designed and integrated RESTful APIs to enable smooth communication between services in a microservices environment.
- Leveraged Spring Boot for rapid application development and deployment, improving system scalability and efficiency.
- Deployed cloud applications on Azure using App Service, Functions, and Logic Apps to automate workflows and simplify operations.
- Used RabbitMQ to facilitate asynchronous messaging and ensured reliable communication between distributed components.
- Participated in Agile Scrum ceremonies to enhance sprint efficiency and maintain Confluence documentation; implemented Azure AD for secure authentication and authorization.
- Configured SLF4J for logging and monitoring to streamline debugging and track application performance.
- Managed deployments on WebLogic servers to maintain high availability, stability, and application uptime.
- Automated CI/CD pipelines in Azure DevOps to accelerate deployments and reduce manual intervention.
- Used BitBucket for source control, supporting code collaboration, pull requests, and version management.
- Performed unit testing with JUnit to ensure functionality, reliability, and high-quality application releases.

Environment: JPA, PostgreSQL, Spring (IoC, DI), Java Servlets, HTML, CSS, JavaScript, jQuery, RESTful APIs, Spring Boot, Azure, RabbitMQ, Agile, Scrum, SLF4J, WebLogic, Azure DevOps, JUnit.

Ajackson, India | July 2018 - February 2021 | Java Software Engineer

- Built and maintained Spring MVC web applications, improving UI responsiveness and user experience for multiple client projects.
- Built scalable applications in Core Java by applying object-oriented principles, design patterns, and clean coding standards.
- Enhanced front-end features using HTML, CSS, and jQuery, and created interactive and visually appealing web pages.
- Implemented Spring Framework components such as IoC and Dependency Injection to simplify development and improve code reusability.
- Utilized Hibernate ORM with Oracle Database for efficient data access and optimized SQL and PL/SQL queries.
- Designed and consumed SOAP-based web services with WSDL to ensure secure data exchange between applications.
- Performed unit testing with Mockito to validate functionality and maintain reliable, error-free code.
- Used Maven for build automation and dependency management and ensured smooth integration across modules.
- Implemented Log4J for effective logging and monitoring to streamline debugging and performance tracking.
- Collaborated in Agile sprints, contributing to the timely delivery of features while mentoring junior developers on best practices. Integrated JMS for asynchronous communication between distributed systems to improve system reliability.
- Collaborated with peers using GitHub for version control, code reviews, and project management.

Environment: Spring MVC, JSP, JSTL, AJAX, Core Java, HTML, CSS, jQuery, Spring (IoC, DI), Hibernate ORM, Oracle, SOAP, WSDL, Mockito, Maven, Log4J, Agile, JMS, GitHub.
