I am a Entry-Level Software Engineering student (GPA 3.95) with hands-on experience in Java, JavaScript, Node.js, and MongoDB. Strong foundation in data structures, algorithms, debugging, and Agile principles. Skilled collaborator with experience supporting technical courses and delivering functional applications. Eager to contribute to high-impact projects and grow within Synergie Systems' mentorship-driven environment.

Education

University of North Carolina at Charlotte

May 2025

Bachelor's in Computer Science - Software Engineering

GPA: 3.95

Course Projects

Mobile Application Development

Fall 2024

Technology Used: Java, Android Studios

Project Name: Assignment 14

- Developed an Android app to store and retrieve billing records, enabling persistent local data storage.
- Developed database logic and UI workflows for seamless, user-friendly operation.

Mobile Application Development

Fall 2024

Technology Used: Java, Android Studios

Project Name: Weather App

- Created a weather application that dynamically integrates weather data and displays results in custom dialogs.
- Created a dialog box with preexisting data
- Incorporated existing android studios boilerplate code to develop the application

Network Based Application Development

Fall 2024

Technology Used: JavaScript, Node.js, CSS, EJS, MongoDB

Project Name: FowlerEthanProject5

- Designed and deployed a website with user authentication, file uploads, data validation, and rate limiting.
- Implemented MongoDB backend to manage user accounts and stored items, simulating production-ready conditions.

Work Experience

University of North Carolina at Charlotte

Instructional Assistant – College of Computing and Informatics

September 2023-December 2024

- Supported Web Application Development and Data Structures courses for **70+ students**.
- Graded assignments and provided timely feedback.
- Collaborated with faculty to refine course structure and clarify objectives.

Skills

Languages, Frameworks, and Tools: Java, JavaScript, C#, HTML, CSS. Node.js, MongoDB. Git, Linux, android studios
