

MASEEH SARWARY

DATA ANALYST

Covington, WA | mohammadmaseeh@yahoo.com | (253) 335-6197 | [LinkedIn](#) | [Tableau](#) | [Portfolio](#)

SUMMARY

Results-oriented Data Analyst with hands-on experience in Python, SQL, and Tableau. Proven ability to transform complex data into strategic insights through dashboarding, statistical analysis. Passionate about solving real-world problems using data.

TECHNICAL SKILLS

Analytics Languages: R, SQL, Python

Database Management: MySQL, MS Access, Microsoft SQL Server

Data Visualization Tools: Tableau, PowerBI, Google Analytics, Microsoft Excel, Google Sheets

Machine Learning Algorithms: Decision Tree, Regression (Linear, Logistic, Multiple), Naive Bayes, Random Forest, SVM, Neural Network, NLP, K-Means

Libraries: Python (Pandas, NumPy, Matplotlib, Seaborn scikit-learn), R (tidyverse, tidymodels, ggplot, dplyr, plotly)

PROJECTS

- Fraud Detection through Predictive Modeling and Visual Analytics – Evaluated logistic regression model performance at varying thresholds; visualized precision/recall trade-offs in Python and Tableau
- AEMR Energy Outage Analysis – Built dashboards showing outage frequency, energy lost, and seasonal patterns among major utility providers.
- Vehicle Sales Analysis 2014-2015 – Analyzed vehicle sales data using Tableau to identify key trends and drive data-informed business decisions.

EXPERIENCE

Springboard, Data Analyst Fellow

Aug 2024 - Apr 2025

- Built SQL queries and Python scripts for data extraction, transformation, and validation.
- Designed Tableau dashboards to visualize model outputs and performance metrics.
- Conducted data integrity checks and simulated workflows for logistic regression and system exchanges.

Allied Universal, Security Account Manager

Sep 2018 - Present

- Supervise a team of 9+ security personnel across multiple sites, improving incident response time by 30%.
- Implement new scheduling protocols that reduced overtime costs by 25% annually.
- Conduct risk assessments and monthly trainings to improve safety compliance by 40%.

City of Seattle (SDOT), Data Warehousing Tech Intern

Aug 2022 - June 2023

- Assisted in building 3+ ETL pipelines to process 1M+ real-time traffic records weekly
- Cleaned and normalized datasets, increasing data accuracy by 35%
- Supported creation of 5+ dashboards and documentation used by 20+ analysts

US Dept. of State / INL – CSSP, Budgeting Advisor

Nov 2013 - Oct 2016

- Analyzed 3-year budget data, identifying a 4.2B Afs shortfall and 35–41% allocation gaps
- Uncovered a 43% drop in budget driver consistency, recommending corrective actions
- Improved budget transparency by 50% through trend analysis and visual reporting

EDUCATION

Data Analytics Career Track

Aug 2024 - Apr 2025

Springboard

Bachelor of Science in Information Technology

Sep 2021 - Jun 2023

University of Washington
