CAREER OBJECTIVE

Experienced .NET Full Stack Developer with 2+ years of remote or hybrid development experience and specialized expertise in Blazor for building rich, interactive web UIs. Skilled in ASP.NET Core, C#, JavaScript, and SQL Server. Seeking to contribute to a collaborative team focused on performance, clean architecture, and modern web technologies.

EDUCATION

University of Wisconsin Oshkosh

Oshkosh, WI

Bachelor of Science: Computer Science

Graduation: May 2023

TECHNICAL SKILLS

.NET Core/Framework	C#	JavaScript	JQuery
Jira	Github	SourceTree	Blazor
.NET MAUI	React	HTML5/CSS3	SQL
SQLite	JWT	RESTful APIs	Java
Agile/Scrum	Problem-Solving	Team Collaboration	Time Management

WORK EXPERIENCE

Full-Stack Developer I

Aug 2023 - Present

US Equestrian Federation | Hybrid

Lexington, KY

- Developed and maintained end-to-end web and mobile applications using ASP.NET Core/Framework, Blazor, and .NET Core APIs
- Successfully handled diverse responsibilities and collaborated on projects involving multiple programming languages and frameworks
- Created RESTful APIs to support web and mobile client applications
- Integrated third-party services and APIs using JWT for secure data exchange
- Designed and optimized database structures using SQL Server and stored procedures
- Collaborated with cross-functional teams including designers, product managers, and QA engineers to deliver features on time
- Participated in agile ceremonies including stand-ups, sprint planning, and code reviews

Web Developer Intern

Jan 2023 - Jul 2023

Wisconsin Department of Revenue | Remote

Madison, WI

- Designed and developed internal and external web pages using HTML, JQuery, and CSS
- Developed high-performance RESTful services using Java and SQL
- Developed background processes for file upload tracking and notifications utilizing Java and Batch files

PROJECTS

US Equestrian Federation: EZ Entry

- Streamlined the development process by proposing, designing, and leading the adoption of Blazor Hybrid, resulting in improved efficiency and faster project delivery
- Developed scalable Blazor application that delivers seamless functionality across both web and mobile platforms, optimizing code reuse and minimizing duplication for efficient, cross-platform development
- Designed and developed a secure API by implementing JWT best practices for robust authentication and authorization
- Implemented large-scale automated email and text notification systems using Azure Communication Services and the C# SMTP client
- Leveraged Firebase Cloud Messaging and Apple Push Notification Service for sending push notifications to the users mobile device
- Designed and implemented SignalR hubs to add real-time functionality, including live data updates and in app notifications, improving user engagement and system responsiveness
- Resolved complex data issues by analyzing data snapshots and leveraging in-depth knowledge of the C# garbage collector to identify and fix performance bottlenecks

US Equestrian Federation: United States Pony Club

- Developed using MVC architecture, implementing Razor syntax for dynamic views and Tailwind CSS for responsive, utility-first design
- Created API implementing DevExpress to streamline the creation and management of dynamic forms, enhancing the user experience and optimizing form generation processes
- Enhanced user experience with AJAX, partial page updates, and client side validation
- Collaborated closely with the project manager to ensure project alignment with goals, regularly providing updates and discussing new feature ideas to enhance functionality and meet user needs

US Equestrian Federation: Equine Disease Communication Center App

- Rewrote mobile application using .NET MAUI with MVVM architecture, enhancing code maintainability and ensuring a scalable, cross-platform solution
- Implemented a lazy-loading, real-time live update feature, optimizing performance and providing users with up-to-date information without full page reloads
