

Medhavini Bajaj

Certified Business Analyst/ Scrum Master

i.medhavinibajaj@gmail.com | +1 650-960-5378 | Mountain View, CA | [LinkedIn](#)

PROFILE

Certified Business Analyst/Scrum Master with **8 years** of experience driving digital transformation and process optimization across Banking, Healthcare, and Retail sectors. Adept at Agile/Scrum and Waterfall methodologies, with a proven track record of leading cross-functional teams to deliver complex projects, including system integrations (e.g., Medicare program mergers), EHR implementations, and regulatory compliance initiatives. Skilled in requirements elicitation, gap analysis, and data-driven decision-making using SQL, Tableau, and FHIR/HL7 standards. Certified in **Business Analysis (Purdue University)** and Agile practices, with expertise in Jira, UML, and stakeholder collaboration to align technical solutions with business goals. Recognized for streamlining workflows, mitigating risks, and enhancing operational efficiency at organizations like **Molina Healthcare, GE Healthcare, and Canadian Western Bank.**

EDUCATION & CERTIFICATIONS

Bachelors In Business Studies

De Montfort University, Leicester, United Kingdom

- **Professional Certificate Program in Business Analysis, Purdue University, USA**
- **PG BA - IIBA/CBAP Trained Certification, Simplilearn**
- **Business Analytics with Excel Certification, Simplilearn**
- **PGP BA - Tableau Training Certification, Simplilearn**
- **PG BA - Data Analysis and Visualization with Python, Simplilearn**

WORK EXPERIENCE

Infosys

Jan 2024 – Current

Client: Molina Healthcare | Hartford, CT

Sr. Business Analyst / Scrum Master

Project Overview:

Led the integration of Bright Health's Medicare program into Molina's infrastructure post-acquisition, ensuring operational continuity across Sales & Broker, Payment Integrity, Pharmacy, and Quality modules. Focused on regulatory compliance, data migration, and cross-functional process optimization to support over 100,000 Medicare members.

Key Responsibilities:

- Aligned Bright Health's sales pipelines and broker commission models with Molina's enterprise systems, streamlining member enrollment and reducing commission errors by **25%**.
- Standardized claims processing and fraud prevention mechanisms across both systems, enhancing **claim accuracy** and ensuring compliance with **Medicare billing standards**.
- Consolidated **pharmacy benefit systems** and formularies, ensuring medication continuity and achieving **15% cost reduction** in prescription drug operations.
- Unified **CMS-aligned quality metrics** and member health initiatives, improving **HEDIS tracking** and boosting **member satisfaction scores**.
- Led **data migration and validation** across **EIM, Cozeva**, and downstream systems, ensuring **99.8% data accuracy** with minimal business disruption.
- Designed and deployed interactive **Power BI dashboards** for KPI tracking, reducing manual reporting by **30%** and enabling real-time decision-making.
- Defined and maintained **BRDs, FSDs**, and **data dictionaries** using **SQL**, aligning business objectives with technical implementation across multiple modules.
- Created **what-if analysis models** to forecast business impact, optimize operational decisions, and support Medicare integration strategy.
- Facilitated **Agile ceremonies** and coached 3 cross-functional teams in **SAFe practices**, improving **team velocity, predictability**, and delivery timelines.
- Managed **requirement traceability** using **SQL** and documented functional and technical requirements across **JIRA** and **Confluence**.
- Executed full-cycle **regression testing** and led **User Acceptance Testing (UAT)** for migrated datasets, ensuring report accuracy and successful production validation.
- Delivered executive-level insights via compelling **PowerPoint** reports, supporting data-driven roadmap and go-live decisions.
- Conducted extensive **market research** and **competitive analysis** to guide Medicare product positioning and expansion strategy.
- Championed **SAFe metrics and reporting** (velocity, flow efficiency, predictability), promoting continuous improvement through **Inspect & Adapt workshops**.

- Ensured full adherence to **HIPAA compliance standards**, protecting **PHI** across member, pharmacy, and payment data workflows.

HCL

Jan 2022 – Nov 2023

GE Healthcare, San Ramon, CA

Business Analyst / Scrum Master

Project:

Implemented and enhanced Clinical Applications, including Functional MRI and Cartilage modules, and integrated Electronic Health Record (EHR) systems within the MRI imaging modality. The project aimed to streamline patient data workflows and ensure interoperability across care-related modules such as billing, lab systems, physician portals, and health education platforms.

Key Responsibilities:

- Gathered and analyzed business and functional requirements for clinical modules within the **Hospital Management Information System (HMIS)**, identifying gaps and aligning system features with end-user workflows.
- Collaborated with radiologists, clinicians, and business users to **define use cases and workflow optimizations** for Functional MRI and Cartilage imaging systems.
- Spearheaded **FHIR API implementation**, performing **source-to-target mapping** between **HL7 v2 messages** and **FHIR resources**, ensuring seamless interoperability and adherence to **ONC** and **CMS** standards.
- Conducted functional testing and validation of **FHIR outputs**, identifying discrepancies and ensuring compliance with industry standards and **IHE ITI transactions**.
- Applied deep knowledge of healthcare data standards including **HL7 v2**, **FHIR**, **C-CDA**, and **DICOM**, improving system-wide data compatibility and patient information integrity.
- Performed **data mapping and validation** using **Advanced SQL**, ensuring accurate integration of clinical data across EHR modules and downstream systems.
- Documented **Requirement Traceability Matrix (RTM)** to ensure coverage of functional specs, test cases, and business objectives.
- Created and managed **Epics, Features, and User Stories** in **JIRA**, maintaining a refined **Sprint backlog** and supporting continuous delivery through Agile Scrum.
- Partnered with **Product Owners** and **Release Train Engineers (RTEs)** to decompose Features into INVEST-compliant stories, improving planning efficiency and stakeholder transparency.
- Supported **System Testing**, **User Acceptance Testing (UAT)**, and post-production validation, ensuring functionality met clinical, regulatory, and business needs.
- Led project release coordination across cross-functional teams, aligning software updates with clinical operations and minimizing downtime risks.
- Generated project artifacts and PMO reports including **Weekly Status Reports**, **Defect Logs**, and milestone tracking via **Excel** and **Confluence**.

HCL

Sep 2019 – Dec 2021

Canadian Tire Fulfillment Center, Alberta, Canada

Business Analyst / Scrum Master

Project:

Led analysis and defect resolution efforts for the outbound pack process to identify system and behavioral inefficiencies, minimize operational errors, and improve overall performance metrics within supply chain workflows.

Key Responsibilities:

- Acted as the primary **liaison between business operations and technical teams**, facilitating clear communication throughout the SDLC and ensuring alignment of functional goals.
- Conducted **root cause analysis** and benchmarking across fulfillment centers to identify bottlenecks, recurring system issues, and behavioral trends affecting **pack process efficiency**.
- Published **daily and weekly volume projections** and supply chain performance dashboards, enhancing **executive visibility** and decision-making through data-backed reporting.
- Created interactive **charts and visualizations** to track peak load periods, defect volumes, top performers, and resolution turnaround times using **Excel** and **Power BI**.
- Performed **impact and GAP analysis** to assess the business viability of process changes, helping prioritize enhancements aligned with operational value and stakeholder goals.
- Authored comprehensive **Business Requirements Documents (BRDs)** and **System Specifications**, detailing **functional and non-functional requirements** for new system capabilities.
- Applied **Agile methodology**, facilitating iterative implementation of improvements across development phases and leading **JIRA-based backlog management**.
- Created and managed **Epics, Features, and User Stories** in **JIRA**, ensuring story readiness and effective sprint execution.
- Participated in **JAD sessions** to resolve integration challenges between the user interface and downstream systems.
- Collaborated with UI/UX teams to **review and refine wireframes and screen mockups**, translating business needs into user-friendly interface designs.

- Managed the full **defect lifecycle**, conducting daily defect triage meetings, assigning tickets, and leading defect verification post-resolution.
- Facilitated and coordinated **User Acceptance Testing (UAT)** by drafting schedules, managing feedback loops, tracking issue resolution, and supporting sign-off readiness.
- Wrote and executed **Advanced SQL queries** for **data extraction, validation, and impact analysis**, driving actionable insights for defect resolution.
- Developed **user training materials** to support adoption of new process changes and updated technology tools, improving team onboarding and compliance.

HCL

July 2017 – Aug 2019

Canadian Western Bank, Alberta, Canada

Business Analyst / Scrum Master

Project:

Led bank-wide initiatives to enhance and modernize Wealth Management software systems by implementing upgrades, aligning with regulatory compliance standards, and optimizing business processes. The project focused on IT regulatory reporting, process re-engineering, and the integration of new business rules in response to complex and evolving financial regulations and legislative mandates.

Key Responsibilities:

- Increased performance rates by **200%** on annual compliance language assessments; contributed to team ranking among **Top 3 schools in the district** for regulatory audit readiness.
- Conducted comprehensive **Gap Analysis** of the existing Wealth Management platform, identifying legacy system inefficiencies and mapping **current vs. future-state processes** for new functionalities.
- Collaborated with **Financial Advisors** and **Client Service Managers (CSMs)** to gather business requirements for managed accounts and investment operations workflows.
- Facilitated **JAD sessions** with business users, SMEs, and IT teams to define **project scope**, resolve blockers, and finalize system design objectives for successful development sprints.
- Authored and managed **Epics, Features, and User Stories** in **JIRA**, overseeing backlog grooming and story readiness in line with Agile best practices.
- Led **requirement walkthroughs** with development and QA teams to ensure shared understanding of business logic and reduce rework during sprint cycles.
- Conducted detailed **Impact Analysis** for RFCs (Requests for Change), leveraging the **Requirements Traceability Matrix (RTM)** to assess downstream effects and presented findings to the **Change Control Board (CCB)**.
- Supported **KYC compliance** initiatives by reviewing and updating client files to reflect missing or outdated data, directly improving adherence to internal **AML/KYC policies**.
- Created and maintained robust **Requirements Traceability Matrices (RTM)** linking **BRDs, FRDs, and UCDs** to corresponding test cases, ensuring full test coverage and auditability.
- Participated in **Post-Production Validation (PPV)** and production support, validating live system functionality and triaging issues in real time with delivery and business teams.

TECHNICAL SKILLS

Methodologies: Agile (Scrum, Kanban), SAFe, Waterfall, SDLC, DevOps Practices, Lean, Six Sigma (Basics)

Documentation: BRD, FRD, SRS, User Stories, Use Cases, Process Flows, Wireframes, RTM

Project Management Tools: Jira (Advanced Roadmaps), Confluence, MS Project, MS Excel (Power Query, Pivot Tables), MS SharePoint, Trello

Analysis Skills: Cost/Benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, SWOT Analysis, Root Cause Analysis, Value Stream Mapping, Business Process Modeling (BPMN)

Tracking / Other Skills: Microsoft Visio, Lucidchart, Rational Rose, HP ALM / Quality Center, JAD, SQL, Balsamiq, Figma (for wireframing), Slack, Miro

Visualization Tools: Tableau, Power BI, Microsoft Excel (Advanced Dashboards), Google Looker Studio

Database: MySQL, SQL Server, PostgreSQL, SQLite, Oracle DB, MongoDB (Basics)

Soft Skills: Time Management, Leadership & Management, Problem-Solving, Conflict Resolution, Negotiation, Critical Thinking, Decision-Making, Stakeholder Management, Documentation & Presentation, Verbal Communication

Operating System: Windows, macOS, Basic Linux CLI
