## Summary

Accomplished Security Engineer with a proven track record at Deloitte & Touche, excelling in threat detection, incident response, and enterprise vulnerability management. Skilled in SIEM administration, security automation, and application hardening, achieving a 30% reduction in incident response time. Proficient in cloud and application security engineering, risk mitigation, and compliance alignment across complex, cross-functional environments. Adept at leveraging cutting-edge tools and emerging technologies to enhance security posture and protect mission-critical assets.

## Skills

- Cross-functional collaboration
- Strategic planning and execution
- Continuous learning and adaptability
- Stakeholder engagement and influence
- Analytical thinking and problem-solving
- Technical documentation and communication
- Infrastructure and application monitoring
- SIEM management (Splunk, LogRhythm, Fortinet)
- Threat detection and incident response (Imperva, playbooks, SIEM correlation)
- Vulnerability assessment and penetration testing (Nessus, Tenable, Burp Suite)
- Generative AI and machine learning (LangChain, LlamaIndex, VectorDB, Pinecone, FAISS)
- Application and cloud security engineering (AWS WAF, Security Hub, S3 bucket policies)

## Experience

SECURITY ENGINEER - WEB APPLICATIONS AND INCIDENT RESPONSE | 07/2019 - 08/2025

Deloitte & Touche

- Engineered and administered advanced Web Application Firewalls (Fortinet FortiWeb, AWS WAF, Imperva), proactively mitigating OWASP Top 10 risks, zero-day exploits, and advanced persistent threats (APTs) through robust rule sets, threat modeling, and secure policy implementation.
- Led and optimized end-to-end security incident detection, investigation, and response for AWS-hosted government applications, reducing incident response time by 30% via standardized detection playbooks, root cause analysis, and rapid remediation workflows.
- Developed and automated SIEM monitoring and alerting using Splunk and LogRhythm, correlating multi-source logs to identify anomalies, lateral movement, privilege escalation, and exfiltration attempts, while delivering actionable intelligence through real-time dashboards.
- Strengthened application and infrastructure security by executing patch management, performing vulnerability assessments aligned with OWASP, CWE, and NIST 800-53, and collaborating with development teams on secure code reviews, secure SDLC integration, and security awareness training.

GENAI DEVELOPER | 07/2019 - 08/2025

Deloitte & Touche

- Engineered advanced LLM-powered solutions for document triage and summarization, leveraging AWS Bedrock,

LangChain, and RAG pipelines, streamlining workflows, and boosting operational efficiency in regulated sectors.

- **Architected secure, multi-tenant Generative AI infrastructures with robust access controls, encryption, and data isolation strategies** in AWS-hosted environments.
- **Integrated secure development principles (DevSecOps) into AI-driven applications, ensuring adherence** to data privacy mandates, AWS cloud compliance frameworks, and industry regulations.
- **Led comprehensive risk assessments, threat monitoring initiatives, and regulatory compliance programs**, establishing security policies that mitigated vulnerabilities and safeguarded critical assets.

**APPLICATION SECURITY ENGINEER** | 04/2014 - 04/2016

#### **Wipro Technologies**

- **Performed in-depth vulnerability assessments of enterprise web applications using Burp Suite, HP Fortify, and IBM AppScan**, detecting security flaws, and driving timely remediation.
- **Executed Static Application Security Testing (SAST) and Dynamic Application Security Testing (DAST) to identify and mitigate risks, enhancing** the application security posture.
- **Utilized advanced security tools, including Burp Suite, SQLMap, Nmap, and Nessus, to conduct** manual and automated penetration testing on applications and infrastructure.
- **Delivered comprehensive security assessment reports, guided development teams through remediation strategies**, and ensured the closure of identified vulnerabilities before production deployment.

---

## **Education**

**University of Central Florida - Orlando | Master of Science**

Engineering Management, 05/2019

**Bachelors in Anna University - Chennai, TamilNadu, India | Bachelor of Engineering**

Computer Science and Engineering, 05/2013

---

## **Certifications**

- Fortinet NSE 1
- Fortinet NSE 2
- Security+, pursuing

---

## **Tools Technologies**

AWS WAF, Splunk, LogRhythm, Fortinet, Imperva, LangChain, LlamaIndex, S3 bucket policies, Security Hub, playbooks, SIEM correlation, Splunk, LogRhythm, Fortinet, Imperva, Tenable, Nessus, VectorDB, Pinecone, and FAISS

---

## **Core Functions Specializations**

- Application and cloud security engineering
- Generative AI and machine learning
- Enterprise Cloud and Infrastructure Operations
- Cross-industry application development
- Risk assessment and management
- Secure development (DevSecOps)
- Regulatory compliance and security policy
- Threat monitoring And review
