WORK EXPERIENCE

Idaho State University

Business Intelligence Data Analyst

Remote, Idaho, USA

Jul 2025 - Present

- Compile and create statistical data using R, Python, SQL, Argos, Tableau, Power BI from data warehouses including ODS by coordinating with cross-campus partners to obtain statistical reports and verify its accuracy.
- Develop and optimize over 50 interactive dashboards and 200 reports using Tableau and Argos, enabling stakeholders to make data-driven decisions more efficiently.
- Manage complex SQL queries across multiple databases (DataCookbook, Snowflake SQL, Banner, Oracle SQL Developer, DataGrip, Sourcetree), aggregating and analyzing institutional data from local, state, and national sources, which improved data and supported compliance with federal reporting requirements to the IPUMS and the IPEDS.
- Collaborate with Institutional Research and Enrollment, IT services, Academic Affairs, Artificial Intelligence, Finance and Operations to define standardized business processes for data integrity, resulting in successfully implementing reproducible documentation and reports, increasing transparency.

The Social Design Group

Data Analyst

Remote, Indiana, USA

Feb 2025 - May 2025

- Developed a real-time community asset framework displaying indicators of Economy, Sustainability, and Health for each county and state in the US.
- Engineered data cleaning protocols and database optimization using R, Python, PostgreSQL, Azure Data Factory, and automated data pipelines for processing government and non-profit agency data via web scraping and APIs.
- Performed database performance tuning, query optimization, and collaborated with developers to design and implement database schemas and indexes, as well as database backup, recovery, and security best practices.
- Utilized Tableau, Power BI, and Python for data visualization and dashboard automation.
- Implemented machine learning algorithms in Azure Synapse for predictive analytics on healthcare data.

Kent State University

Graduate Research Assistant

Kent, Ohio, USA

Jan 2024 - May 2025

- Developed and maintained 15+ dashboards in Power BI to track student performance and analyze course evaluations, pooling data from IPEDS and IPUMS for informed institutional decision-making.
- Managed financial aid, admissions, student success data, and online surveys, achieving a 95% accuracy rate in data collection and reducing reporting time by 30%.
- Developed course materials and presentations for graduate analytics classes.
- Supported development and maintenance of MLOps.
- Mentored students on data analysis techniques, including R, Python, Oracle SQL Developer, PostgreSQL, MS SQL Server, and data visualization tools.
- Developed instructions for survey software and maintained detailed records of survey activities.
- Conducted data analysis and generated over 20 reports on student success, faculty research, instructor evaluation, and institutional effectiveness, creating automated pipelines and interactive Power BI dashboards for data-driven decision-making in higher education administration.
- Ensured data accuracy and integrity by identifying and resolving discrepancies in various data sources.

Questt

Manager (Data Analytics and Engineering)

Bangalore, India

Sep 2022 - Jul 2023

- Mentored and trained a team of 6 data analysts in advanced data engineering practices, resulting in a 20% reduction in project delivery time and enhancing customer retention rates by 15%, elevating overall satisfaction scores by 10%.
- Spearheaded the development of AI and ML models leveraging Google BigQuery, AWS S3, Google Colab, and PostgreSQL for comprehensive data exploration and feature engineering, improving predictive accuracy by 30% across multiple projects while effectively handling missing data challenges.

Vedantu Innovations Pvt Ltd

Data Scientist

Bangalore, India

Dec 2020 - May 2022

- Developed and executed advanced predictive models utilizing supervised and unsupervised learning techniques, enhancing market investment tracking by 30% and increasing customer traction metrics by 25% for over 200 healthcare providers. Delivered actionable insights to the CTO through rigorous data analysis, resulting in a 40% improvement in project management efficiency and informed strategic initiatives across multiple departments.
- Orchestrated comparative analyses of various machine learning algorithms, leading to the implementation of an optimized ensemble model that enhanced predictive analytics capabilities by 25%.
- Tech Stack: k-NN, Naive-bayes, DBSCAN, K-means, Hierarchical clustering, GBM, OLS, SVM, XGBoost, Deep Neural Networks (CNN, RNN, Computer vision, Text Mining) using Scikit-learn, TensorFlow, Keras, Numpy, Pandas, PySpark, Google Colab, Azure Synapse.

Embibe*Data Scientist***Bangalore, India***Jun 2020 - Dec 2020*

- Orchestrated the migration of an entire codebase to GitHub, enhancing the software development lifecycle and driving a 25% increase in team collaboration metrics while decreasing deployment times by 30%, accelerating project delivery timelines.
- Directed the cloud transition of a client's on-premises healthcare and claims data infrastructure to Azure, using MySQL Server Studio, achieving a 35% reduction in overall infrastructure costs and boosting system performance metrics by 4%, resulting in improved service reliability for end-users.

Anthem Biosciences Pvt. Ltd*Research Associate***Bangalore, India***Jan 2020 - May 2020*

- Engineered and deployed machine learning models utilizing extensive healthcare COVID data, achieving an 87% accuracy rate in predicting Alzheimer's risk.
- Developed and maintained 120+ interactive dashboards using Tableau and Power BI, visualizing real-time series data trends for over 200 healthcare providers while automating data pipelines that streamlined reporting processes by reducing manual entry time by up to 60%.
- Optimized query performance in Snowflake, resulting in a 40% reduction of query execution times, saving approximately \$120K annually in resource costs for data management.

TecSoft Solutions*Senior Data Scientist***Bangalore, India***Jan 2017 - Dec 2019*

- Executed complex SQL queries on Microsoft SQL Server and Teradata SQL Assistant, enhancing data extraction processes for healthcare analytics and HIPAA claims data, resulting in the successful migration of over 5TB of data daily and a 12% reduction in retrieval time across five departments.
- Developed and deployed machine learning algorithms within Azure Synapse to automate data workflows, achieving an 8% increase in operational efficiency and enabling real-time analytics for over 100 stakeholders through customized dashboards processing an average of 2 million records per day.

EDUCATION**Kent State University***Master of Science in Business Analytics***Kent, OH***Graduation Date: May 2025**Relevant coursework: Advanced Machine Learning, Advanced Data Mining**Data Visualization, Analytics in Practice, Business Analytics***St. Joseph's College***Master of Science in Chemistry***Bangalore, India***Graduation Date: May 2020**Relevant coursework: Bioinformatics, R, Python***St. Joseph's College***Bachelor of Science in Biotechnology, Chemistry, Zoology***Bangalore, India***Graduation Date: May 2018**Relevant coursework: R, Python, PowerBI***SKILLS**

- **Coding Language:** R, Python, SQL(PostgreSQL, Oracle SQL Developer, MySQL), Java, Go; **Data Visualization:** Power BI, Tableau, matplotlib, R Shiny, Advanced Excel (Vlookup, Pivot Tables, Hlookup); **Databases:** SQL Server, Oracle, Snowflake, NoSQL, MongoDB, DynamoDB; **Cloud Platforms:** Azure, Azure Data Factory, Azure Synapse, Azure SQL Databases, GCP, AWS; **Machine Learning:** Supervised Learning, Unsupervised Learning, Recommendation systems; **Methodologies:** Agile, Waterfall, Scrum, SDLC, JIRA, Confluence; **Others:** Visual Studio Code, GitHub, PySpark, Hive, MapReduce, HIPAA, PHI, IPEDS, IPUMS, Gen AI, LLM

AWARDS

- **Beta Gamma Sigma Member, International Honor Society for Business**, Kent State University (April 2025), recognizing academic excellence and outstanding achievement in business studies across the world.
- Collaborated with faculty to **publish research papers** in prestigious journals (**National Institutes of Health, Springer, Nature**), contributing to data analysis, literature reviews, and manuscript preparation for high impact publications.
