WORK EXPERIENCE

Internal Revenue Service IT Specialist, Risk Lead

Lanham, Maryland
June 2023 – Present

- Lead multiple Application Development projects in developing and implementing data management processes.
- Assist in the development of modernized technical designs, configuring system requirements, conducting testing, and managing user instructions.
- Oversee the migrations of new technologies through Item Tracking Reporting and Control (ITRAC), ServiceNow, client-server enabled databases, and PowerBI, improving system integration.
- Assist specialists in multiple functional areas such as establishing reinstallation processes and other security related issues.
- Manage and assist with Risk Management findings for Risk Tech, including coordinating and tracking upgrade mitigation actions and delivering closure documentation.
- Create and maintain Risk Management records in the GRC ServiceNow Database, ensuring updates are made based on data quality reports and feedback from controls testing.

Deloitte Consulting LLP Senior Consultant

Arlington, Virginia
August 2021 – June 2023

Internal Revenue Service, Office of Information Technology

- Led strategic planning team to evaluate and execute the best practices for reaching Application Development (AD) Infrastructure Currency (IC) goals.
- Conducted the coordination of non-compliant software upgrades by creating materials for presentation across workstreams and consolidating data call responses across the AD domains.
- Managed and maintain multiple software dispositions across AD while determining upgrade statuses and dependencies.
- Implemented SharePoint practices to determine upgrade dependencies and remove unsupported software versions by co-facilitating weekly client calls, tracking project upgrades, and maintaining key documentation.

CGI Federal Business Systems Analyst

Fairfax, Virginia
May 2020 – August 2021

Internal Revenue Service, Office of Information Technology

- Implemented SAFe Agile practices, maintained JIRA board, and conducted weekly stand ups.
- Maintained an inventory of SharePoint requirements and translated Stakeholder requirements into design specifications.
- Developed an approach for streamlining the tracking upgrade status, increasing the accuracy of information.
- Prepared weekly status updates and facilitated meetings for executive leadership to highlight risks and issues of upgrade schedules.
- Assessed impediments to meeting software upgrade deadlines and worked with projects to identify mitigation strategies.
