SUMMARY

Data Engineering professional with 4+ years of experience leveraging Big Data for strategic decision-making and business growth. Expert in developing efficient ETL pipelines using Hadoop and Apache Spark, handling multi-terabyte datasets. Proficient in creating automated, scalable reports and dashboards with Tableau and Power BI. Skilled in cloud technologies including AWS, Microsoft Azure and GCP.

EDUCATION

Master of science in Computer Science, CGPA: 3.9 - San Francisco Bay University, California, USA

Courses: Computer Programming, Database Management, Data Structures, Data Analytics, Data Visualization, Statistical Programming, Big Data, Machine Learning

Bachelor of Technology in Computer Science and Engineering, CGPA: 3.6

Jawaharlal Nehru Technological University Hyderabad (JNTUH), India

TECHNICAL SKILLS

Programming: SQL, Python (NumPy, Pandas, Matplotlib, SciPy, scikit-learn), R, SAS, MS Excel, VBA

Big Data Technologies: Hadoop (HDFS, MapReduce, YARN), Apache Spark (Spark SQL, Spark Streaming)

Cloud Platforms: Amazon Web Services (AWS) (S3, Redshift, EMR, Glue), Google Cloud Platform (GCP) (BigQuery, Dataflow, Dataproc), Microsoft Azure (Azure Data Lake, Azure Synapse Analytics, Azure Data Factory)

Data Visualization: Tableau, Power BI, Python (Seaborn, Matplotlib), R (ggplot2, Shiny)

Analytical Techniques: Statistical Modeling, Regression Models, Classification Models, Decision Tree Models, Random Forest, Clustering Algorithms, Feature Selection, Cross-Validation Techniques, Model Evaluation

PROFESSIONAL CERTIFICATIONS

- Tableau Certified Desktop Specialist
- Advanced Analytics with SQL
- Certified Data Analyst – Jigsaw Academy
- Microsoft Certified – Azure Data Engineer

Work Experience

Tata Consultancy Services

Senior Data Engineer

July 2023 – Present

- Orchestrated four extensive Data Engineering and Business Intelligence projects, these involved the design and implementation of automated, scalable ETL Pipelines, using best data engineering practices like data-compression, partitioning, broadcast joins etc and Tableau dashboards tailored for a prominent global payment technology client, dashboards were adeptly managed and served to over 1000+ active users monthly
- Conceptualized, designed, and implemented a bespoke DataMart for Cross-Border Transactions data, built atop core datasets, accompanied by an automated Data Quality Verification process, this strategic DataMart supplied aggregated tables specifically optimized for data scientists and data analysts, leading to a significant reduction in data retrieval time by 40%
- Developed one-of-kind Business Intelligence Solution leveraging Tableau Ask Data technology to deliver self-service data tool for clients, which generates tabular data or visualization with natural language query, resulting in reduction of Ad-hoc tasks by 80%
- Developed and implemented strategic solution to identify customers with high potential to drive Cross-Border transactions volume, using historical cross-border transactions data, which resulted in increase of cross-border volume by 30% YOY

Data Engineer

June 2020 – June 2023

- Developed and maintained ETL processes using PySpark scripts and Apache Airflow, processing over 50TB of e-commerce datasets, achieving a 25% increase in data processing efficiency and maintaining consistent data integrity.
- Designed & built 3 scalable end-to-end executive level dashboards to track, enhance and initiate various customer service programs, which involved understand business, defining KPIs and developing optimized PySpark scripts, resulting in streamlined processes that increased operational efficiency by ~50%
- Designed and implemented team specific DataMart, which holds aggregated tables with required level of granularity, facilitating advanced analytics and reporting, leading to a 20% reduction in data retrieval times and enhanced reporting accuracy.
