

Meghanath Reddy Darasani | Data Analyst

Colorado, USA | meghanathreddy1125@gmail.com | +1 (719) 413-8319 | [LinkedIn](#)

PROFESSIONAL SUMMARY:

- Data Analyst with 6+ years of experience transforming complex datasets into actionable insights to drive strategic business outcomes.
- Proven expertise in designing and deploying interactive dashboards, automating ETL pipelines and building predictive models. Experienced with Snowflake, Azure Synapse, Hadoop HDFS for data warehousing and big data management.
- Expert in developing and deploying interactive dashboards using Tableau, Power BI, Google Data Studio, QlikView, SSRS and creating self-service insights for diverse stakeholders.
- Proficient in automating and optimizing complex ETL pipelines using Apache Airflow, Alteryx, SSIS, Talend, Google Cloud Dataflow and managing data ingestion from sources like Oracle, Google BigQuery, MySQL, AWS S3.
- Strong programming skills in Python (Pandas, NumPy, Scikit-learn, PySpark) and R for data wrangling, analysis and statistical modeling. Skilled in advanced SQL (PostgreSQL, SQL Server, PL/SQL) for querying and optimizing large datasets.
- Hands-on experience building and deploying predictive models using XGBoost, LightGBM, Logistic Regression, K-Means clustering, Principal Component Analysis, with model tracking using MLflow in Jupyter Notebook and Google Colab.
- Proficient in utilizing Google Cloud Platform (GCP) services like Google Cloud Dataflow and leveraging Azure Synapse for advanced analytics.
- Comprehensive understanding and implementation of HIPAA, HITECH, GDPR, RBI regulations, including PHI/PII protection protocols (data masking, encryption, tokenization) and creating detailed data documentation.
- Experienced in Agile methodologies, Jira, Confluence, Slack and Git for version control, ensuring efficient project delivery and cross-functional collaboration.
- Demonstrated ability to analyze healthcare datasets (EHR, EMR, claims, lab results, ICD-10, CPT, EDI 837/835) and financial data for risk assessment and regulatory adherence.

TECHNICAL SKILLS:

Data Visualization & BI Tools:

Tableau, Power BI, Google Data Studio, QlikView, SSRS

Programming Languages:

Python, R, SQL, PL/SQL

Python Libraries & Frameworks:

Pandas, NumPy, Scikit-learn, LightGBM, XGBoost, Statsmodels, Seaborn, Matplotlib, PySpark

Machine Learning & Analytics:

Logistic Regression, K-Means Clustering, Principal Component Analysis (PCA), A/B Testing, Hypothesis Testing, t-tests, ANOVA

ETL & Data Integration:

Apache Airflow, Alteryx, SSIS, Talend

Cloud Platforms & Services:

Google Cloud Platform (BigQuery, Dataflow, Colab), Azure Synapse, AWS S3, Snowflake, Hadoop HDFS

Databases & Warehousing:

Oracle, SQL Server, PostgreSQL, MySQL, Snowflake, Azure Synapse Analytics

Data Governance & Compliance:

HIPAA, HITECH, GDPR, PHI/PII Protection, Data Masking, Tokenization, Encryption, Metadata Catalogs, Data Lineage Tracking, RBI Compliance

Statistical & Modeling Tools:

MLflow, Jupyter Notebook, Google Colab

Workflow Automation & Scheduling:

Apache Airflow, Alteryx

Version Control & Collaboration:

Git, GitHub, Jira, Confluence, Slack

Healthcare Data Standards:

EHR, EMR, HL7, ICD-10, CPT, EDI 837, EDI 835

Agile & Project Management:

Agile, Scrum, Jira, Sprint Planning, Backlog Grooming

Other Skills:

Ggplot, Jupyter Notebook, decision tree, linear regression, Data Storytelling, Data Wrangling, Regression analysis, A/B testing, Data Modeling, Data Cleaning, Data Transformation, Data Visualization, Data warehousing

Operating Systems:

Windows, Linux, Mac iOS

PROFESSIONAL EXPERIENCE:

Cardinal Healthcare – CO | August 2024 - Present

Data Analyst

- Designed and deployed interactive Tableau dashboards to track patient outcomes, provider performance and operational KPIs, resulting in a 65% increase in data visibility for clinical teams and executives.
- Automated complex ETL pipelines using Apache Airflow and Alteryx, reducing manual reporting time by 70% and enabling near real-time ingestion of claims, HER & patient encounter data from Oracle and Google BigQuery.
- Built and deployed machine learning models (XGBoost, LightGBM, Scikit-learn) to predict patient readmission risks, improving care team intervention precision by 22% and reducing 30-day readmission rates.
- Performed advanced data wrangling and transformation on multi-source healthcare datasets (EHR, EMR, claims and lab results) using Python (Pandas, NumPy) and SQL (PostgreSQL, SQL Server) to support analytics and regulatory reporting.
- Developed Google Cloud Dataflow pipelines to process and validate high-velocity insurance claim transactions, achieving 99% SLA compliance and streamlining real-time data availability.
- Created HIPAA-compliant data documentation, including metadata catalogs, data dictionaries and lineage tracking for over 30 enterprise datasets, ensuring regulatory audit readiness and governance adherence.
- Engineered reproducible ML pipelines in Jupyter Notebook and Google Colab, integrating model tracking with MLflow, improving model monitoring and reproducibility across cross-functional teams.
- Collaborated cross-functionally with clinical, compliance and BI teams using Jira, Confluence and Slack in Agile sprints to deliver iterative enhancements to analytics products and data assets.

- Developed Google Data Studio dashboards for self-service insights into cost-of-care, length-of-stay (LOS), ED utilization and member satisfaction metrics for key decision-makers.
- Implemented PHI/PII protection protocols, including data masking, encryption and tokenization, ensuring compliance with HIPAA, HITECH and internal data security policies during development and testing.
- Conducted root cause analysis on claims discrepancies, analyzing ICD-10 codes, CPT codes, EDI 837/835 transaction sets and payer-provider mismatches, resulting in improved claims accuracy and reduced denials.

HCLTech – India | July 2020 to July 2023

Data Analyst

- Engineered a robust predictive model utilizing Logistic Regression techniques, resulting in a 25% enhancement in credit risk assessment accuracy, thereby significantly mitigating potential financial losses.
- Spearheaded the automation of data extraction and reporting workflows, achieving a 40% reduction in report generation time, which optimized operational efficiency and resource allocation.
- Executed comprehensive data analysis using advanced Python and R programming to uncover actionable insights and trends in banking operations, directly influencing strategic decision-making.
- Deployed efficient ETL processes leveraging SSIS and Talend, facilitating seamless data integration from diverse sources and ensuring high-quality data availability for analytics.
- Created dynamic and interactive dashboards in Power BI, enabling real-time tracking of key performance indicators (KPIs) and enhancing stakeholder engagement through visual data storytelling.
- Employed SQL and PL/SQL for intricate querying of large datasets, optimizing database performance and ensuring swift data retrieval for analytical purposes.
- Worked on project timelines and deliverables through Agile methodologies and Jira, ensuring timely completion of data-driven projects while maintaining high standards of quality and collaboration.
- Ensured adherence to Reserve Bank of India (RBI) regulations and data governance standards throughout the project lifecycle, safeguarding the organization against compliance risks.
- Conducted systematic audits of data quality and compliance with GDPR for international clients, reinforcing data integrity and trustworthiness in cross-border transactions.
- Leveraged Azure Synapse for advanced data warehousing and analytics, significantly enhancing data accessibility and facilitating in-depth analysis for strategic initiatives.
- Developed and maintained a comprehensive version control system using Git, ensuring meticulous documentation and collaboration across project teams, thereby streamlining workflow processes.

Cognizant – India | May 2018 - June 2020

Data Analyst

- Engineered end-to-end ETL pipelines to extract, cleanse and transform over millions of rows of retail transaction data from MySQL, Oracle and AWS S3, leveraging Python (Pandas, PySpark) for scalable data processing and ensuring 99% data accuracy for downstream analytics.
- Designed and deployed interactive QlikView dashboards visualizing real-time sales trends, inventory turnover rates and customer churn analytics, directly enabling data-driven decision-making for cross-functional business stakeholders.
- Worked on statistical A/B testing initiatives on digital promotional campaigns using advanced hypothesis testing techniques (t-tests, ANOVA) in Python, resulting in a measurable 15% increase in customer conversion rates & actionable marketing insights.
- Optimized Snowflake data warehouse performance by restructuring database schemas, indexing & query tuning, which reduced average query response times by 30% & achieved an 18% reduction in monthly cloud storage & compute costs.
- Collaborated within Agile Scrum teams using JIRA to deliver bi-weekly analytics deliverables, including sprint planning, backlog grooming & cross-functional stakeholder reporting, ensuring on-time delivery of critical business intelligence projects
- Performed advanced customer segmentation using K-Means clustering & principal component analysis in Python, successfully identifying high-value customer cohorts & informing targeted marketing strategies that improved retention rates.
- Automated SSRS executive reports showcasing key performance indicators (KPIs) such as year-over-year (YoY) revenue growth, regional sales distribution & product category performance, improving executive visibility & strategic planning.
- Authored and optimized complex SQL queries utilizing window functions, Common Table Expressions (CTEs) and subqueries to support ad-hoc business analysis and generate actionable insights for sales, operations and finance teams.
- Automated multi-source data blending workflows in Alteryx, integrating ERP and CRM datasets to streamline reporting processes, reduce manual effort by 40% and enhance data reliability for analytics initiatives.
- Monitored and maintained Hadoop HDFS data pipelines to ensure end-to-end data integrity, proactively identifying and resolving data quality issues and implementing robust validation checks for large-scale cloud-based analytics workloads.

EDUCATION and CERTIFICATIONS:

Masters of Data Analytics - Indiana Wesleyan University, Indiana, USA

Bachelor of Computer Science & Engineering - Sathyabama Institute of Science and Technology, Chennai, India

Prepare for the AWS Certified Data Analytics – Specialty (DAS-C01) – LinkedIn

Career Essentials in Data Analysis - Microsoft and LinkedIn

The Complete SQL Bootcamp: Go from Zero to Hero – Udemy

Microsoft Power BI Desktop for Business Intelligence – Udemy

100 Days of Code: The Complete Python Pro Bootcamp – Udemy
