Summery

Eager and dynamic Data Science Master's graduate with a deep-rooted passion for transforming data into actionable insights. Armed with advanced analytical abilities and coding expertise, I am ready to bring innovative solutions to data-driven challenges. Keen to collaborate with seasoned professionals, I aim to contribute meaningfully to projects that make a tangible difference, while continuously honing my skills in a vibrant, impact-oriented environment.

Education

Texas Tech University, Rawls College of Business

Lubbock, TX

Master of Science, Data Science & Business Intelligence

May2023 - May2024

- GPA: 3.37

Projects

Amazon E-commerce Division

December 2023

- Conducted an extensive big data analysis project for Amazon's eCommerce division, focusing on proprietary data strategies, predictive analytics, and customer experience enhancement through data fusion and security improvements.

Artificial intelligence index

December 2023

- Orchestrated a multivariate analytical project dissecting the AI landscape, employing data cleaning, clustering, and dimensionality reduction to unveil intrinsic patterns in global AI innovation and infrastructure.

Electric Dynamics

October 2023

- Led a comprehensive analysis project on global electric vehicle adoption and energy prices, leveraging data cleaning, merging, and visualization to uncover key trends and correlations between economic indicators and EV market dynamics.

League Evolution

June 2023

- Enhanced a football league data project by integrating additional attributes such as season start/end dates and total teams, enriching the dataset for comprehensive socio-economic and sports analytics.

Capstone Project Online Retail Store Walmart

APRIL 2023

- Executed a comprehensive analysis of customer purchase patterns using the Walmart dataset.
- Led the data preprocessing, visualization, and employed K-Means clustering for effective customer segmentation.
- My analysis, primarily focused on UK orders, revealed key insights into purchasing behaviours and high-value items.
- This project significantly advanced Walmart's customer segmentation and targeted marketing strategies, demonstrating my proficiency in data science applications.

Web Scraping Using Python

February 2023

- Spearheaded a practical project in web scraping, leveraging Python and its libraries like BeautifulSoup and Navigable String.
- Executed parser utilization and tree deployment techniques to extract web data efficiently.

Customer Churn Analysis

February 2023

- Pioneered a supervised learning project to predict customer churn using feature selection and engineering.
- Applied logistic regression, decision trees, and random forests to classify customer behaviours effectively.

COVID-19 Global Mortality Rate Analysis

February 2023

- Led an insightful analysis of COVID-19 mortality rates using global data.
- Developed an interactive dashboard featuring a world map to compare confirmed and death cases.

Analysing Naming Trends with SSA Data

February 2023

- Conducted a comprehensive analysis of baby naming trends in the U.S. from 1880 to 2016.
- Utilized SSA data to uncover significant patterns and changes in naming preferences over time.

Flight Booking Price Prediction

February 2023

- Engineered a regression model to predict flight prices using a dataset from a flight booking platform.
- Implemented feature engineering and regression algorithms like linear and decision tree regression.

Bio-Signal Analysis for Smoking Prediction

February 2023

- Conducted bio-signal data analysis to identify patterns related to smoking behaviours.
- Utilized advanced machine learning algorithms for feature selection and data cleaning.

Credit Card Fraud Detection

February 2023

- Developed a machine learning model to detect credit card fraud using transactional data.
- Employed logistic regression, decision trees, and random forests in a supervised learning setting.

Revenue Prediction Using PCA

January 2023

- Predicted restaurant revenue by creating a Machine Learning model based on PCA.
- Analysed the "Restaurant Revenue" dataset to extract key attributes influencing revenue.

Heart Disease Prediction

January 2023

- Implemented supervised learning techniques to predict heart disease outcomes.
- Employed logistic regression, decision trees, and random forests for data modelling.

Census Income Analysis

January 2023

- Performed detailed EDA on census income data to extract actionable insights.
- Applied classification algorithms like logistic regression, decision trees, and random forests for predictive analytics.

Additional Projects

Image Classification Using Scikit-Learn

March 2023

- Masterfully executed an image classification project utilizing the Scikit-Learn library.
- Developed a model that accurately classifies images, showcasing proficiency in machine learning techniques and image processing.

WordPress Deployment on CentOS7

March 2023

- Successfully deployed a WordPress site on a CentOS7 server, demonstrating skills in web server configuration and management.
- Ensured robustness and efficiency of the deployment, highlighting an understanding of Linux systems and web technologies.

Data Transformation and Analysis

March 2023

- Expertly transformed complex data sets to facilitate in-depth analysis and extract meaningful insights.
- Utilized advanced data processing techniques and analytical methods to uncover trends and patterns, demonstrating a strong ability in data analytics.

Certifications

Intellipaat

November 2023 – May 2023

- PGP in Data Science and Machine Learning.
- Power BI Training
- Python Training
- Microsoft SQL Developer Course
- Linux Training

MITx

February 2023 - May 2023

- Machine Learning with Python-From Linear Models to Deep Learning.

Google

November 2023

- Foundations - Data, Data, Everywhere

Work Experience

Graduate Assistant at Texas Tech University for undergrads Python Class.

January 2024 - Present

Job Description

- The primary job duties include providing feedback and corrections for student individual and group assignments, scoring assignments for a grade based on a rubric I provide, and assistance responding to student inquiries such as, if they get stuck on a program or concept. There may also be other minor tasks as needed.

Technical skills

Operating Systems

- Windows
- Unix/Linux
- Apple

Programming Languages

- Python
- R
- Java
- C#
- C++

Web Development

- HTML
- CSS
- PHP
- JavaScript

Databases

- Microsoft SQL Server
- MySQL
- MongoDB
- Cassandra

Data Visualization

- Tableau
- Microsoft Power BI

Software and Tools

- Jupyter Notebook
- Spyder
- RStudio
- TensorFlow
- MATLAB

- VS Code
- Excel

Cloud Computing

- AWS
- Azure
- Google Cloud

Cyber Security

- Network security
- Cloud Computing

Data Science and Analysis Skills

- Machine Learning & Deep Learning
- Data Analysis
- Data Management
- Algorithms & Data Structures
- Information Technology

Analytical Skills

- Probability & Statistics
- Regression Analysis
- Statistical Programming

Soft Skills

- Project Management
- Communication
- MIS (Management Information Systems)
- Problem Solving
- Adaptability
- Time Management
- Human Learning
