Education

Virginia Tech
B.S Computational Modeling and Data Analytics

Blacksburg, VA
Expected Graduation Dec 2025

Professional Experience

MITRE Corporation

Mclean, VA

National and Defense Intelligence Intern

May 2024 - Aug 2024

- Conducted research on dark vessel detection and AIS spoofing to strengthen maritime situational awareness in the Indo-Pacific region.
- Extracted and processed geospatial data to identify naval bases and generated polygon perimeter maps for intelligence use.
- Queried and visualized regional event data with BigQuery, R, and Jupyter Labs, enabling actionable insights for defense analysts.

NetCentrics

Herndon, VA

Data Science Intern

June 2023 - Aug 2023

- Developed a Software Bill of Materials (SBOM) using Syft to enhance visibility and compliance in Azure DevOps cloud deployments.
- Investigated cybersecurity and cloud vulnerabilities, contributing to improved internal risk frameworks and security posture.
- Earned Microsoft Azure Fundamentals (AZ-900) certification, demonstrating foundational cloud knowledge for data solutions.

Persistent Systems

Bridgewater, NJ

Data Science Intern

June 2022 - Aug 2022

- Analyzed large-scale IT infrastructure datasets and created data-driven reports and visualizations using Python and R to support operational decisions.
- Researched emerging 2022 infrastructure trends, presenting findings that informed internal strategy development.
- Collaborated in Agile teams and engaged in client discussions to communicate technical insights and support solution delivery.

Skills

Programming: Python (NumPy, Pandas, Seaborn, Matplotlib, scikit-learn, TensorFlow), R, SQL, Java, C, MATLAB, Scala, PySpark

Platforms & Tools: Git, Jupyter Lab, BigQuery, Databricks, ArcGIS, VSCode, RStudio, Google Colab, Minitab, LaTeX, Tableau, PowerBI

AI & ML: Neural Networks, NLP, Generative AI

Projects

Program Exploration – Capstone Project | Virginia Tech, Spring 2025

- Developed a web application in **R Shiny** to help prospective graduate students discover programs in **data science, biostatistics, and related fields**, sponsored by the American Statistical Association.
- Automated **data collection** using Selenium and Excel; integrated filters for prerequisites, GRE requirements, and program location.
- Designed **interactive dashboards** with bar and pie charts to visualize program distributions, improving user exploration and decision-making.

Water Quality Analysis | Virginia Tech, Fall 2024

- Analyzed U.S. **EPA water quality datasets** to assess pollutant concentrations and compliance with environmental standards.
- Performed **data cleaning and transformation** in Python (Pandas, NumPy) and applied **statistical modeling** to identify trends across regions.
- Created **visualizations in Seaborn/Matplotlib** to communicate insights on contamination levels and risk factors, supporting evidence-based environmental decisions.
