CAREER SUMMARY

Data Analyst Intern with expertise in dashboard development, data pipeline automation, and business intelligence. Skilled in SQL, Tableau, Power BI, Airflow, and front-end technologies including JavaScript, HTML, CSS, and Java. Currently interning at LinkedIn, where I build scalable analytics solutions that enable sales and marketing teams to make faster, data-driven decisions and improve operational efficiency. Experienced in enhancing data quality, automating workflows, and delivering actionable insights through clear and impactful visualizations.

TECHNICAL SKILLS

Data & Analytics: SQL, Tableau, Power BI, Microsoft Excel (Advanced), Google Data Studio

Programming Languages: Python, JavaScript, Java, HTML, CSS

Frameworks: Airflow, Hadoop, REST APIs, Spring Boot, PyTest, Selenium

Developer Tools: Git and GitHub

CMS: WordPress

Collaboration & Productivity: Jira, Slack, MS Office Suite (Word, Excel, Teams, SharePoint), Google Workspace, Notion, Canva, Adobe Creative Suite, Dropbox

PROFESSIONAL EXPERIENCE

LINKEDIN

New York, NY

Data Analyst Intern

February 2025 - Present

- Built and deployed CAPI Dashboard in SQL and Tableau, enabling faster decision-making and reducing redundant reporting requests by 30%.
- Led the Argonaut Project, creating a plug-and-play utility that reduced DAG argument size by 40–60%, improving code readability, scalability, and maintainability.
- Migrated nine Airflow DAGs to a new Tableau Operator to support a Tableau Server upgrade, ensuring uninterrupted dashboard refreshes and reducing the need for manual updates.
- Optimized LMS SFDC Cases Dashboard, improving visibility for 80+ sales team members and reducing issue resolution time by 20%.
- Conducted MCS case analysis using SQL to identify cases missing advertiser IDs, improving recommendation accuracy and enabling more precise goal setting.
- Eliminated hardcoded manager references in dashboard permissions by implementing department-based logic, creating a scalable and resilient access control system.
- Enhanced dashboard usability by developing targeted visuals for high- and low-usage trends, supporting optimization and sunseting decisions.
- Streamlined complex 45+ step dashboard update processes by introducing clear procedural documentation and interactive checklists, reducing errors and improving update efficiency.

RIHLA

Remote

Junior WordPress Developer

June 2024 - Present

- Facilitate key aspects of operations, contributing directly to product development, technical support, UX design, quality assurance & testing and client support initiatives.
- Ensure optimal reach and functionality of websites, user journey maps and interactive platforms, working to ensure the highest level of experiences for clients and end users.

IMAGE INSTITUTE

Karachi, Sindh, Pakistan

Application Developer

January 2017 - November 2021

- Designed, developed, and maintained fully responsive academic websites using HTML, CSS, and JavaScript, enhancing accessibility, user engagement, and cross-device compatibility.
- Led a mobile-first redesign of institutional platforms, reducing bounce rates, increasing session duration, and enhancing user experience.
- Reduced recurring maintenance issues by over 40% through modular coding, detailed documentation, and standardized development practices.
- Launched the institute's first digital student portal, streamlining access to academic resources and reducing administrative workload by 30%.

EDUCATION & TRAINING

University of Karachi

Bachelor's Degree

Karachi, Sindh, Pakistan

Sept. 2021
