PROFILE

Data Analytics Master's graduate with strong expertise in statistical modeling, machine learning, and data visualization, combined with over 15 years of leadership experience in retail operations. Proven ability to leverage advanced analytical techniques (Python, SQL, Tableau, AI/ML) to drive business insights, optimize processes, and improve performance. Skilled in cross-functional collaboration, stakeholder communication, and training teams on new technologies. Adept at bridging technical and operational domains to deliver actionable solutions and lead data-driven decision-making.

SKILLS AND CERTIFICATIONS

- Languages and Tools: Python, SQL, Microsoft Excel, Tableau, Power BI, Gephi, Jupyter Notebook, Git/Github, Alteryx
- Techniques and Methods: Time Series Forecasting, Machine Learning (Classification, Regression, Clustering), Data Wrangling, Feature Engineering, Statistical Analysis, Model Evaluation
- Workflow and other Skills: Data Visualization, Exploratory Data Analysis, A/B Testing, Version Control, Presentation of Technical Results, Dashboard Development
- Python Data Associate Certification- DataCamp, 2025
- SQL Associate Certification – DataCamp, 2025
- AI Fundamentals Certification – DataCamp- 2024
- Julia Language Coursework – DataCamp 2024
- Data Scientist's Toolbox Certification- Coursera, 2023
- Communication
- Leadership
- Problem Solving
- Adaptability
- Team Collaboration
- Project and Time Management

EDUCATION

Master of Science in Data Analytics | University of Central Florida
Graduated 2025

Bachelor of Business Administration | Florida International University
Graduated 2012

EXPERIENCE

Assistant Store Manager/ Data Analyst | Underarmour, Disney Springs, FL
July 2021- Present

- Led data-driven operational improvements using quantitative analysis, machine learning, and statistical modeling (PCA, clustering, linear & logistic regression) to inform revenue generation strategies which led to adoption company wide.
- Developed and validated AI/ML models PowerBI/Tableau using training/testing splits, confusion matrices, and performance metrics such as F1 scores.
- Advised stakeholders on AI/ML solutions and presented actionable insights to leadership.
- Managed technology rollouts and training for SAP Fiori, BI Reporting, Tableau, and RFID systems.
- Enhanced Excel KPI dashboards with advanced metrics; proposed for company-wide adoption.
- Served as liaison between corporate and Disney, collaborating on product assortment and store operations.
- Delivered presentations and training tailored to diverse audiences and skill levels.
- Conducted staff development and customer service excellence initiatives.

Operations Manager/ Data Analyst | Tory Burch, Orlando, FL

October 2017 – July 2021

- Served as the SME in Operations, Analytics and Technology who was frequently consulted and requested to support opening new stores and those with operational challenges.
- Developed and implemented a Standard Operating Procedures binder which was key in opening new stores and supporting stores with operational challenges.
- Provided SAP Fiori and Salesforce training and peer support across the district.
- Led communications with corporate partners, addressing KPIs, product knowledge, and customer feedback.
- Acted as human resources representative in-store, managing sensitive performance and development conversations with teammates.
- Created and implemented processes to support business decisions and optimize inventory planning.
- Collaborated with cross-functional teams on procurement strategies and scheduling.
- Served as acting Store Manager (Feb–Apr 2021), surpassing sales goals by 20%.

OTHER LEADERSHIP EXPERIENCE:

Visual Presentation Coach (Manager), Nike, Miami, FL

Brand and Delivery Operations Manager, Victoria's Secret, Miami, FL

Supervisor, Borders, Miami, FL

PROJECTS

Healthcare Needs Forecasting (Capstone Project)

- Partnered with KPMG to forecast COPD and CHD healthcare needs in Florida using time series analysis, alteryx for data cleaning, and interactive Tableau dashboards.
- Collaborated on technical paper with PhD researchers and presented findings to academic and healthcare leadership.

Fake News Detection Analysis

- Compared fake news prevalence from social media and media outlets using three supervised models: logistic regression, neural networks (MLP), and transformer-based NLP.
- Conducted performance evaluation and model comparison to identify optimal approach for fake news detection.

Theme Park Fast Pass Simulation

- Developed an agent-based model to analyze the impact of expedited line services on wait times and guest satisfaction using game theory concepts.
- Modeled guest behavior, patience, and satisfaction levels under varying fast pass usage scenarios.
