PROFESSIONAL SUMMARY

- Analytical and results-driven **Business & Data Analyst** with a **Master’s Degree in Business Analytics (GPA 3.8)** and strong proficiency in Excel, Tableau, Power BI, SQL, and Python. Skilled at translating complex datasets into actionable business insights that enhance decision-making and operational efficiency.
- Strategic thinker and strong communicator who thrives in fast-paced, cross-functional environments. Brings a unique background in health, fitness, and brand representation, combining data-driven problem-solving with client-facing expertise. Passionate about delivering clear, measurable results through both technical and interpersonal strengths.

EDUCATION

Adelphi University – Garden City, NY

- Master of Science (M.S.), Business Analytics | **GPA: 3.8 | STEM-Designated** | Awarded December 2024
- Bachelor of Science (B.S.), Exercise Science | Awarded May 2021

PROJECTS

Graduate Business Analytics Projects – Adelphi University

- (1) Customer Satisfaction Modeling (Airline Industry)**
Analyzed 100K+ survey responses using Random Forest and XGBoost models to predict satisfaction levels; identified key drivers of customer loyalty and presented insights in Tableau dashboards.
- (2) Revenue Forecasting (Netrality Data Centers)**
Built revenue forecasting models by client segment using billing data and gradient boosting; delivered interactive dashboards to guide sales strategy and resource allocation.
- (3) Loan Default Prediction (Financial Risk)**
Developed classification models to predict loan defaults with ~79% accuracy; conducted exploratory analysis to uncover risk factors such as credit score and income, providing recommendations to mitigate portfolio risk.

SKILLS

- Business Intelligence, Statistical Analysis, Data Visualization, Machine Learning
- Excel, Tableau, SQL, Power BI, Python, Data Cleaning & Preparation, Dashboard Development, Descriptive & Predictive Analytics
- Analytical Problem Solving, Presentation & Report Writing, Time & Task Management

CERTIFICATIONS (in progress)

Google Data Analytics Professional, Google Business Intelligence Professional, Tableau Desktop Specialist, Microsoft Power BI Data Analyst Associate, Certified Analytics Professional, SQL (Udemy), DataCamp Python for Data Analysis

WORK EXPERIENCE

Health and Fitness Professional / Data Specialist – HealthFitness & Blink Fitness | Long Island, NY | 2021–Present

- Tracked and analyzed client wellness data (body composition, strength metrics, blood pressure, weight trends) using Excel to measure progress and guide personalized health programs.
- Developed dashboards and progress summaries to visualize individual progress, communicate results, and motivate clients to meet performance targets.
- Reported wellness outcomes and engagement statistics to management teams, contributing to organizational health initiatives and data-driven decision making.

Brand Ambassador for C4 Energy – Archival Marketing Agency (contract role) | Long Island/NYC | July 2025 – Oct 2025

- Served as Lead Brand Ambassador for multiple high-profile field activations across NYC and Long Island, overseeing event execution, on-site performance metrics, and team coordination.
- Collected and analyzed consumer engagement data—including sampling volume, demographic reach, and traffic flow—to identify high-impact locations and optimize marketing ROI.

Brand Ambassador for Body Armor at the Jalen Brunson Charity Event in Westchester, New York | Aug. 2025

- Supported a high-profile sponsorship activation with NBA athlete Jalen Brunson (NY Knicks)
- Delivered on-site reporting and event feedback to stakeholders to guide future brand activations.

Career Objective: Eager to leverage my analytical and cross-functional experience to transition into a corporate Business Analytics role, contributing measurable impact while expanding my technical and strategic expertise.
