Summary

Experienced Site Reliability Engineer and Software Developer with a strong foundation in automation, full-stack development, and incident response. Proven ability to bridge infrastructure and application teams, solve complex technical problems, and improve system reliability at scale.

Skills

Languages: Python, Java, C#, C/C++, JavaScript, Perl, SQL, Bash

Frameworks & Tools: ASP.NET, React, Angular, Node.js, Bootstrap, jQuery

DevOps & Infrastructure: AWS (EC2, S3, IAM), Ansible, GoCD, Checkmk, Kibana, Git, Docker, Linux

CI/CD & Monitoring: CI/CD Pipelines, GoCD, Checkmk, Kibana, Incident Response, Disaster Recovery

Databases: MySQL, SQL Server

Practices: Agile Development, Full-Stack Engineering, On-Call Support, Root Cause Analysis

Experience

- BlueMatrix – Site Reliability Engineer

Aug 2022 – Present

- Developed automation and infrastructure solutions using Ansible, Python, and Perl
- Built and maintained CI/CD pipelines using GoCD, supporting safe and consistent deployments
- Maintained system monitoring and observability using Checkmk, Kibana, and custom alerting tools
- Served in 24/7 on-call rotation; responded to production incidents, conducted root cause analysis, and implemented preventative measures
- Improved disaster recovery processes and system architecture for resilience and scalability
- Worked in Dockerized, Linux-based environments; used Git daily for version control and collaboration
- Collaborated with software engineering and infrastructure teams to align on performance and uptime goals

- Agile Ticketing Solutions – Full Stack Developer

Oct 2019 – Aug 2022

- Developed and maintained end-to-end web applications using C#, ASP.NET, SQL, JavaScript, and jQuery
- Designed and implemented custom features and database procedures to support client-specific needs
- Delivered responsive front-end interfaces and robust back-end systems
- Maintained and optimized complex SQL stored procedures and database structures

- NTT Data – IT Support Technician

May 2019 – Oct 2019

- Provided IT support for Vanderbilt University
- Troubleshoot and resolved technical issues, escalating to appropriate teams when necessary
- Managed user sessions and delivered high-touch support with excellent customer interaction

- Joup Labs – Software Developer Intern

Dec 2018 – May 2019

- Developed client-facing dashboards using JavaScript, HTML, CSS, and MySQL
- Visualized machine efficiency and performance data using real-time graphs and smart analysis tools
- Built early alert systems to detect anomalies in industrial equipment performance

Projects

- Time Management Software: Built a dynamic scheduling and tracking UI with React, JavaScript, Node.js, and Bootstrap
- Educational AI Assistant: Created a Python-based AI using NLTK to analyze student discussions and recommend helpful responses
- Stock Market Simulator: Designed an Android app that allowed users to simulate trading with live market data using Java and MySQL

Education

Middle Tennessee State University – B.S. in Computer Science

Aug 2016 – May 2018

Cleveland State Community College – A.S. in General Studies

Aug 2013 – Dec 2015
