<https://www.linkedin.com/in/michaeltchu/>[Software QA Project Portfolio](#)

Residence: San Jose, CA

Phone: 408-439-5348

E-mail: michael_chu_01@hotmail.com**Summary**

- 8 years of industry experience in Quality Assurance testing on Android and iOS mobile and Web Browser QA
- Worked with a wide variety of Samsung, Google, and Apple smartphone and tablet devices for software testing
- SF Bay Area and AI startup experience leading metrics for QA in volume of bugs found on mobile and web
- Curious minded to transform from a novice to specialist when learning new software products to test end to end
- 4 years working remotely with domestic and international teams in Design, Engineering, Product, and QA
- High attention to detail having been nicknamed by some leadership as Mr. Edge Case from thoughtful use cases
- Complimented for raising the quality bar and hiring bar for every client team in QA career based on high impact
- Well versed in the SDLC and STLC lifecycles working in an Agile environment with weekly releases
- Vocal engagement in all sprint cycle meetings from daily standups, planning, backlog review, and retrospective
- 21 LinkedIn Recommendations from 6 employers having a strong track record of QA expertise coming from Product Managers, Program Managers, Engineering & QA Managers, and Senior Software Engineer Leads

Skills

- Testing Specialty: Blackbox, Manual, Exploratory, Functional, Compatibility, Usability, UX, UI, Regression
- Testing Types: Desktop Apps, iOS Mobile Apps, Android Mobile Apps, Web Browser Apps, AI LLM
- Operating Systems: Windows 11, MacOS, iOS, iPadOS, WatchOS, Android OS
- Test Management Tools: TestRail, Testmo, Radar, MS Excel
- Bug Issue Tracking Tools: Jira, Trello, Linear, Google Sheets

AI Startup Experience*Squint.ai, San Jose, CA**September 2024 to March 2025***QA Software Tester**

Description: A member of an early-stage Series B startup with fewer than 50 global employees focused on building and releasing mobile and web AI and AR technology for clients to reduce training and operational costs

Achievements:

- Collaborated with colleague as a team of 2 running 200+ test cases weekly from the regression test plan
- Performed Copilot LLM based conversational AI integration testing with existing mobile application features, finding several UI / UX bugs that were overlooked by QA and Engineering for many sprint cycles
- Built trust and confidence with the weekly on-call Software Engineers as the go-to QA expert to determine release readiness, sharing with the Sales team for demoing onsite to clients, securing 5-6 figure contracts
- Developed test strategy with QA, Product, and Engineering to navigate through the master test suite to focus on high priority scenarios for checking critical user-facing features when working on tight deadlines
- Recognized by the Product Manager and Engineering Leadership for being highly detailed and leaving a long-lasting impression on the success of the major launches for iOS and Android, raising the quality bar
- Converted from 1099 to W-2 after just one month, delivering value and strengthening the relationship

Mobile Apps QA Testing Experience*TEKsystems @ Splunk, San Jose, CA**February 2020 to November 2022***Mobile QA Quality Tester**

Description: A member of the Splunk for Mobile iOS and Android QA Teams. Splunk offered a mobile app solution for enterprise B2B SaaS customers to extend their feature rich capabilities of data ingestion and cloud analytics.

Achievements:

- Replaced and became the sole Android QA mobile app tester by the QA Manager after 3 weeks of being initially hired to help out the iOS QA mobile team. Filed in Jira 452 bugs with 30 app crashes found for Android mobile in the first year, surpassing any current and past QA on the team for both iOS and Android
- Concurrently supported 2 mobile teams with overlapping 3 week sprint cycle schedules for feature releases
- Participated regularly in team engagements from design review to engineering demos to share QA feedback
- Improved Splunk for Android mobile average star rating from 3.3 to 4.4 stars within two years of QA'ing it

Ryzen Solutions @ Apple, Cupertino, CA

January 2019 to August 2019

Apple Pay QA Engineer

Description: A member of the Apple Pay Mobile QA Contractor Team. Apple Pay is a contactless payment service that offers stored and secure payments across the Apple ecosystem including iPhone, iPad, Apple Watch, and Mac.

Achievements:

- Filed 840 bugs into Radar while testing and validating Apple Pay and Apple Wallet features on iPhone, iPad, and Watch, over an 8-month period, setting a new team performance record
- Quickly learned Apple Pay on iOS and WatchOS hardware devices within 3 weeks by learning from dry test runs of the test suites before taking on real test cycles and making a quick positive impact on the team
- Worked cohesively and strategically with the QA contractor team in helping each other meet fast-paced challenging deadlines for daily test cycles and functional cycles
- Synced up with the QA Lead during QA team meetings from captured feedback on social media to understand the problems customers were facing out in the field in order to prioritize testing coverage

Web Browser QA Testing Experience

Robert Half @ Nordic Naturals, Watsonville, CA

January 2024 to April 2024

QA Software Tester

Description: A member of the ITQA Team focused on Nordic Naturals Consumer Web and Nordic Pro eCommerce web experiences. Nordic Naturals offers online retail channels for consumer and professionals through Shopify.

Achievements:

- Led the QA team with 75 out of 109 bugs found within 90 days in Jira, which reestablished the QA team as the dominant bug-finding group in place of the Web team, which previously led in bugs found
- Designed and ran functional UX and UI visual test cases to uncover suboptimal front-end experiences with the websites that went largely unnoticed prior to joining, improving the end-to-end user shopper experience
- Took majority ownership of the TestRail test runs, freeing up the team to focus on other project initiatives
- Improved the quality of the desktop web browser experience on Chrome and Safari, and mobile responsive shopping experience on iOS and Android for promotional events, leading to increased subscriber volume
- Spotlighted early on in meetings by the IT Director, PM, and Web Teams, rebranding the quality of QA

Progle Tech @ Restoration Hardware (RH), Pleasanton, CA

December 2022 to August 2023

QA Analyst

Description: A member of the RH Purchasing Experience and eStore QA Team. Restoration Hardware offers an eCommerce shopping experience through its direct online shopping portal and physical retail Concierge Galleries.

Achievements:

- Developed detailed and well documented bug reports in Jira which made it easier for Software Developers to fix the problems. QA Manager recommended samples of them as a model for the QA team.
- Increased handoffs with better QA coverage and support within the global team of Developers, and international offshore QA and QA Leads. Accomplished this by maintaining a flexible work schedule.
- Earned the only LinkedIn Recommendation from the QA Manager out of 10+ QAs based on personal performance and challenging the current process with process improvements during Agile team meetings

Education

BS in Computer Engineering: San Jose State University
