Permanent Resident

Education

University of Illinois at Chicago

Major in Data Science with Business Analytics and Finance

May 2025

Chicago, Illinois

Technical Skills

Financial Analysis & Modeling: Forecasting, variance analysis, KPI tracking, budgeting

Data Analysis & Visualization: Python (pandas, numpy), R, Power BI, Excel (pivot tables, VLOOKUP, macros)

Business Intelligence: Dashboard creation, trend analysis, financial insights, process improvement

Other Tools: SQL, Tableau, Google Sheet

Experience

TaxBook Corporation

Jan 2025 – Current

Financial Data Analyst

United States

- Conducted financial analysis on budgeting, revenue trends, and expense patterns across client portfolios, identifying cost-saving opportunities that led to a 12% reduction in overhead expenses.
- Leveraged Python and Excel to build automated financial models and dashboards, enabling real-time visibility into KPIs and supporting executive decisions that improved forecasting accuracy by 18%.
- Acted as the primary point of contact for multiple clients, translating complex financial data into clear, actionable insights and collaborating directly to tailor solutions that improved budgeting **accuracy and operational efficiency** by 15%.

University of Illinois at Chicago

Chicago, IL

Teaching Assistant-Finance & Analytics

May 2024 - Dec 2024

- Collaborated with cross-functional teams to gather, organize, and validate financial data for accurate and timely reporting.
- Assisted in preparing monthly, quarterly, and annual financial statements, ensuring compliance with accounting standards.
- Supported budgeting and forecasting processes by consolidating data, analyzing trends, and providing variance reports.
- Performed account reconciliations, processed invoices, and monitored expenses to maintain accurate financial records.
- Generated ad-hoc financial reports and dashboards using Excel and Power BI to aid management decision-making.

Axis Ray

Feb 2022 – Mar 2023

Credit Analyst

India

- Analyzed and processed datasets with over **100,000+ records** to uncover credit risk trends and provide actionable insights for multiple industries.
- Performed credit data analysis**, evaluating borrower profiles, payment histories, and financial metrics to support risk assessment and decision-making.
- Cleaned, transformed, and validated data using Python (Pandas, NumPy) and SQL**, improving data accuracy by 25% and reducing reporting errors.
- Built 10+ interactive dashboards and automated weekly reports using Tableau and Excel, providing visibility into credit trends and saving the team over 15 hours/week in manual work.
- Conducted exploratory data analysis (EDA) and summarized findings to support predictive modeling, credit risk scoring, and strategic client presentations.

Projects

StockPredictionML: Stock Market Predictor Application | Python, Streamlit, Keras, LSTM, yFinance

- Developed an interactive stock price prediction app leveraging LSTM neural networks, achieving accurate forecasting and clear visual analysis of stock trends for informed investments.
