

MILAN DESAI

(857)-472-2827 | desai27milan@gmail.com | [LinkedIn](#) | New York City, NY

WORK EXPERIENCE

- Excel IT**
Data Analyst
New York City, NY
September 2023 – September 2024
 - Leveraged **SQL** and **Python** to identify patterns in large datasets, proactively resolving issues to boost network reliability.
 - Automated reporting with **PowerBI**, reducing team reporting time by 12%.
 - Provided insights for stakeholders, supporting strategic decisions that drove business growth.
 - Developed and recommended data-driven service enhancements that broadened the networking team's capabilities, positioning the company for potential revenue expansion.
 - Collaborated with cross-functional teams to integrate data insights into strategic planning, leading to informed decision-making and improved operational efficiency across departments.
- DaVita Inc.**
Data Analyst
New York City, NY
January 2022 – June 2023
 - Utilized advanced **SQL** queries to extract and analyze clinical data, providing actionable insights that supported treatment optimizations and enhanced patient outcomes.
 - Created **Tableau** dashboards, automating reporting and saving the facility two hours daily.
 - Developed **Python** scripts for data cleaning and transformation, streamlining workflows and enabling timely insights.
 - Standardized data collection, increasing cross-departmental data reliability and analysis consistency.
 - Collaborated with data engineering teams to optimize database performance, ensuring faster access to critical clinical data and improving the efficiency of data-driven decision-making.
 - Conducted ad-hoc analyses, supporting finance, operations, and quality assurance departments.
 - Designed and implemented predictive models to identify patient risk factors, supporting proactive treatment adjustments and improving patient care outcomes.
- Revolutionary Integration Group Inc.**
Data Science Intern
Boston, MA
January 2021 – June 2021
 - Designed an **AWS**-based application to streamline electric vehicle insurance processes, achieving a 15% reduction in customer insurance costs.
 - Built **ETL** pipelines in Python for processing telemetry data, ensuring seamless data flow across systems.
 - Developed **SQL** queries for data staging, import, and quality checks, ensuring accuracy and reliability across platforms.

EDUCATION

Harrisburg University, Harrisburg, PA
Master of Science, Project Management

Northeastern University, Boston, MA
Master of Science, Engineering Management

University of Mumbai, Mumbai, India
Bachelor of Engineering, Computer Engineering

SKILLS

Languages	SQL, NoSQL, Python, R, JAVA, C/C++, Informatica, Talend
Databases/Framework	MSSQL, MySQL, PostgreSQL, Apache Cassandra, MongoDB
Business Intelligence	Power BI, Tableau, Einstein Analytics, Google Analytics, Flourish

PROJECT

- Model for Prediction of Admission**
May 2019
 - Predicted university admission decisions using Logistic Regression based on student profiles.
 - Scraped web data and transformed it with **Python** to support model training.
 - Leveraged **PowerBI** for KPI analysis of key metrics (GPA, TOEFL, GRE) to identify admission trends.
- Hospital Bed Utilization Optimization Model**
June 2023
 - Developed a data-driven model using **Python**, **SQL**, and machine learning algorithms to predict hospital bed occupancy rates.
 - Created interactive dashboards in **PowerBI**, providing hospital administrators with insights into bed availability, patient flow, and peak admission times.
 - Enhanced operational efficiency by reducing overcapacity by 15%, leading to cost savings and improved patient management during high-demand periods.
