WORK EXPERIENCE

IBM | Software Development Engineer | Los Angeles, CA **August 2021 - Present**

- Leverage the K2Fabric studio development tool to construct robust parsers and populations, facilitating the generation of Cassandra tables.
- Institute comprehensive application validations and error-handling procedures to enhance application reliability and user experience.
- Engage in meticulous code reviews with the Client manager, ensuring strict adherence to AT&T coding standards.
- Devised and implemented the initial load logic for seamless data migration from Oracle to DB Cassandra.
- Amass extensive hands-on experience in modernizing, refactoring, and migrating application workloads from On-Premises systems to the Azure cloud platform.
- Utilize Lean kit for efficient bug and issue tracking, promoting a rapid response and resolution to software glitches.
- Demonstrate proficiency in implementing CI/CD pipelines using Azure Pipelines, GIT/GitHub, and Fabric tools, fostering a swift and efficient development workflow.

T-Mobile | Software Development Engineer | Bellevue, WA **Feb 2020 - August 2021**

- Amplified API performance by 30%, leading to a sufficient reduction in access time.
- Orchestrated deployment of microservices-based applications leveraging Spring Boot and Spring Cloud technologies. Engineered a fully automated continuous integration system using Git and Jenkins.
- Employed Splunk for proficient logging, analysis, and real-time monitoring of data, while also leveraging Swagger for efficient automation of API processes.

3Desire Networks | Full stack Java Developer | Orange, CA **June 2019 - Dec 2019**

- Pioneered the development of advanced frontend modules leveraging AngularJS, HTML5, and CSS3, demonstrating innovative design and coding strategies.
- Engineered RESTful APIs utilizing Express, integrated with AngularJS data binding for efficient logic return. Implemented robust server-side and client-side testing procedures with Mocha and Jasmine, respectively, enhancing system reliability and performance.

Plutus Inc. | Full stack Developer | Mumbai, IN **May 2016 - July 2017**

- Spearheaded the design and development of an intuitive User Interface for customer service modules and reports leveraging cutting-edge technologies like Angular 2.0, HTML5, CSS3, Bootstrap, JavaScript, and JQuery. Successfully implemented a web application prototype utilizing JavaScript and AngularJS.
- Demonstrated expertise in backend development by orchestrating the creation of RESTful Web Services using Node.js, while delivering advanced PHP scripts, including PHP cookies, Sessions, Exceptions, and Error Handling, bolstering the overall functionality and user experience.

TECHNICAL SKILLS

Languages: Java, JavaScript, C, C++, Python, PHP, HTML5, CSS3, Spring, SAS

Frameworks: Spring Boot, Spring Framework, AngularJS, jQuery, ReactJS, NodeJS, Web Service, SOAP, JUnit

Databases: MySQL, MongoDB, Cassandra, MSSQL Server, Microsoft Access, Oracle.

Tools: Amazon Web Services, Azure, Pivotal Cloud Foundry, Git, Maven, Jenkins, Jira, Selenium, Kafka, K2 View Fabric Studio

Office: Microsoft Word, Excel, PowerPoint, Outlook

EDUCATION & HONORS

University of the Cumberlands | Williamsburg, KY **(Pursuing)**

- Ph.D. in Information technology

California State University | Fullerton, CA **(May 2019)**

- Master's in Computer Science – GPA 3.64/4

Rajiv Gandhi Institute of Technology | University of Mumbai, India **(May 2016)**

- Bachelor's in Engineering – Information Technology – CGPA- 7.62/10
