

Min Jiang

minjiangucberkeley25@gmail.com | 408-896-8929 | 726 Larch Ave, South San Francisco, CA, 94080

Technical Skills

Programming: Python, R, SQL

Statistical Analysis: Hypothesis Testing, A/B Testing, Confidence Intervals, Bootstrapping

Machine Learning & Statistics: Linear Regression, Classification, Time Series, Geospatial Analysis, Forecasting

Data Processing and Wrangling: Data Cleaning, Transformation, Integration, Manipulation

Data Visualization & BI Tools: Tableau, Power BI, Matplotlib, Seaborn, ggplot2

Databases: MySQL

Education

University of California, Berkeley

- Bachelor of Art in Statistics
 - Expected Graduation: May 2025
-

Professional Experience

Transportation Data Science Intern

Northeast Big Data Innovation Hub | Jan 2025 – Feb 2025

- Analyzed NYC OpenData transportation datasets to identify traffic patterns and road safety risks
- Applied time series and geospatial analysis to uncover trends in accident occurrences
- Developed predictive models to analyze road safety patterns and optimize traffic management
- Created dashboards to deliver actionable insights

Data Analyst Intern

Circo Digital Business Card | May 2024 – Aug 2024

- Conducted market research and data analysis to improve product-market fit, boosting sales by 15%
- Developed Python-based customer segmentation models, optimizing marketing strategies
- Designed interactive Tableau dashboards to visualize sales trends and support data-driven decisions
- Improved data processing efficiency by 50% through automation and database optimization
- Collaborated with cross-functional teams to enhance data collection and support strategic decisions

Associate Data Analyst Intern

BQ Breeding Farm | May 2023 – Aug 2023

- Managed shrimp breeding and farm performance datasets to optimize operations
 - Conducted statistical analyses to improve breeding success rates and livestock health
 - Developed Tableau dashboards to visualize key metrics and support decision-making
 - Automated data collection processes, reducing errors by 25% and improving efficiency by 20%
 - Collaborated with cross-functional teams to implement data-driven solutions
-

Projects

Amazon vs. eBay: Data-Driven Platform Selection & Profit Optimization

- Collected and cleaned data from Amazon and eBay to evaluate platform performance
- Conducted statistical analysis on fees, costs, market reach, and engagement, generating actionable insights
- Visualized findings using Tableau, and communicated results through reports and presentations
- Collaborated with cross-functional teams to implement data-driven recommendations, resulting in a 50% increase in profits and cost reduction

Sales Decline Analysis & Optimization

- Analyzed Q1 and Q2 sales data to identify key factors driving revenue decline
- Conducted correlation analysis on demographics, marketing, and competition
- Applied statistical tests and data visualization to quantify trends and uncover root causes
- Improved sales decline diagnosis by 60% through data-driven insights
