Summary

Business Analyst with 3+ years of experience in business analysis, consulting, and data-driven decision-making. Skilled in Agile methodologies, requirements gathering, and delivering solutions across websites, mobile apps, APIs, and SQL systems. Proficient in UAT, troubleshooting, process modeling, and data visualization to drive efficiency and business outcomes. Experienced in aligning insights with business planning, scorecard metrics, and long-term strategy while evolving processes for agility and transformation. Demonstrated commitment to integrity and ethical practices in all analyses.

Skills

- Database Management:** Snowflake, SQL Server, MySQL, PostgreSQL, MongoDB
- Data Analysis & Databases:** SQL, Python (pandas, scikit-learn), R, SAP S/4HANA, Snowflake, Data Mining, Predictive Modeling
- Version Control:** Git, GitHub, GitLab, Bitbucket, JIRA, Confluence, MS Office Suite (Word, PowerPoint, Excel)
- Business Analysis Tools & Methods:** Requirements Gathering, User Stories, Functional Specs, BPMN/Visio, Agile (Scrum, Kanban)
- Data Visualization & Reporting:** Power BI (DAX, Data Modeling), Tableau (Calculated Fields, LOD Expressions), Excel (Pivot Tables, Power Query, Dashboards), Alteryx, RapidMiner, Kibana, Splunk
- Soft Skills:** Problem-solving, Effective communication, Teamwork, Adaptability, Leadership

Experience

Business Analyst – FirstKey Mortgage, LLC, St. Louis, MO (Aug 2025 – Present)

- Partner with cross-functional teams to gather, document, and analyze requirements for mortgage securitization and asset management systems, translating business needs into technical specifications using Agile (Scrum, JIRA, Confluence) practices.
- Designed and deployed Power BI and Tableau dashboards to monitor portfolio performance, loan securitization metrics, and risk factors, improving executive decision-making efficiency by 15%.
- Automated data pipelines and reporting workflows using SQL, Snowflake, and Alteryx, reducing manual reporting by 25% and ensuring timely investor deliverables.
- Conducted User Acceptance Testing (UAT), created defect logs, and coordinated with developers to resolve issues, ensuring smooth deployment of system enhancements and adherence to federal mortgage regulations.
- Collaborated with risk and compliance teams to interpret evolving guidelines, embedding rules into SQL/Snowflake queries and validation frameworks, reducing compliance gaps by 10%.
- Led a data quality initiative across multiple loan data sources, implementing business rules and automated checks with SQL and Alteryx, reducing discrepancies by 20% and increasing trust in reporting.
- Leveraged Splunk and Kibana dashboards for operational analytics, identifying system performance trends and aligning insights with business KPIs.
- Presented data-driven recommendations to senior leadership, influencing quarterly securitization strategies and improving portfolio risk-adjusted returns.

Graduate Research Assistant – Webster University, St. Louis, MO (Sep 2023 – May 2025)

- Analyzed healthcare datasets using Python, RapidMiner, and machine learning techniques, achieving 92% model accuracy and providing actionable insights to support scorecard metrics and strategic planning.
- Developed Power BI dashboards to visualize health metrics and population trends, improving stakeholder understanding and enabling data-driven long-term planning.
- Streamlined data preparation workflows, reducing processing time by 20%, demonstrating efficiency and process improvement.
- Applied statistical analysis and predictive modeling to guide decision-making, ensuring reproducibility and compliance with data confidentiality standards.
- Presented findings to academic committees and cross-functional teams, translating complex data insights into understandable recommendations.

Business Analyst Intern – Accenture, St. Louis, MO (Jun 2024 – Aug 2024)

- Analyzed datasets using SQL, Python, and Alteryx, improving campaign effectiveness by 10% and aligning KPIs with scorecard tracking for in-year benefit measurement.
- Designed Tableau dashboards to visualize scorecard metrics and business performance, providing actionable insights to leadership for decision-making.
- Automated ETL workflows, reducing data preparation time by 30%, streamlining reporting processes, and improving data reliability.
- Validated data accuracy and translated business requirements into reports, ensuring cross-team alignment and effective communication.
- Prepared and executed UAT scripts, supporting error-free deployment of new features and maintaining high-quality standards.

Business Analyst – CRED, Hyderabad, India (Jul 2022 – Jun 2023)

- Produced scorecard reports and dashboards that informed leadership decisions, linking customer and sales analysis to strategic business planning.
- Built Power BI and Tableau dashboards and automated ETL pipelines, aligning visualizations with business strategy and improving reporting efficiency.
- Conducted sales and customer analysis, increasing ROI by 12%, and applied ethical principles in data interpretation.
- Partnered with development teams to deliver solutions through SDLC, ensuring business requirements were translated into actionable outcomes.
- Led stakeholder workshops to gather requirements, monitor KPIs, and generate reports guiding leadership in product strategy and decision-making.

Education

M.S. in Business Analytics – Webster University, St. Louis, MO (Aug 2023 – May 2025)

Certifications

Google Data Analytics (2023) | Tableau Data Analyst (2024) | Alteryx Designer Core (2024) | SAP Activate Project Manager (2025) | AWS Certified Data Analytics – Specialty (2025)
